

Contents

1	Operators, Spaces, and Main Results	1
1.1	Functional Framework	1
1.2	Properties of N	11
1.3	Elliptic Estimates on f	22
1.4	Statement of Results	25
1.5	Friedrichs' Mollifiers	33
2	Weak Solutions	35
2.1	Existence of Weak Solutions	36
2.2	Continuity at $t = 0$	48
2.3	Uniqueness Implies Continuity	56
3	Strong Solutions, $m + k \geq 4$	59
3.1	Regularity of $N(f, u^{(m-1)})$	59
3.2	Well-Posedness	66
3.3	Existence	72
4	Semi-strong Solutions, $m = 2, k = 1$	79
4.1	Two Technical Lemmas	79
4.2	Lipschitz Estimates	82
4.3	Well-Posedness	86
4.4	Existence	95
5	The Parabolic Case	101
5.1	Well-Posedness	101
5.2	Existence, $k \geq 1$	105
5.3	Existence, $k = 0$	109
5.4	Weak Solutions	116
5.5	The Case $m = 2, k = 0$	117

6 The Hardy Space $\mathcal{H}^1$ and the Case $m = 1$	125
6.1 The Space $\mathcal{H}^1$	125
6.2 The Classical von Karman Equations	133
Bibliography	137
Index	139

Evolution Equations of von Karman Type

Cherrier, P.; Milani, A.

2015, XVI, 140 p., Softcover

ISBN: 978-3-319-20996-8
