Part I On Mica and Mica Related Systems

1	Tracks in Mica, 50 Years Later: Review of Evidence for Recording the Tracks of Charged Particles and Mobile Lattice Excitations in Muscovite Mica	3
	F. Michael Russell	
1.1	Basic Facts	4
1.2	Origin and Properties of Charged Particles in Mica Underground	6
1.3	Measurement of the Sensitivity and Duration of Recording	11
1.4	Interaction Between Theory and Experiment	12
1.5	The Role of Atomic Chains in Propagation of Energy	13
1.6	Ejection of Atoms by Elastic Scattering of Quodons	16
1.7	Thermal Stability of Lattice Excitations	18
1.8	Creation of Quodons by High Energy Particles	20
1.9	Nuclear Scattering of Muons	20
1.10	Recording Process	22
1.11	Interactions of Mobile Lattice Excitations with Stored Energy	24
1.12	Confined Lattice Excitations	27
1.13	Internal Structure of Fans	28
1.14	The Position at the Beginning of 2015	31
1.15	The Puzzle Solved: Quodons Have Charge	31
	References	32

2	Numerical Simulations of Nonlinear Modes in Mica:	
	Past, Present and Future.	35
	Janis Bajars, J. Chris Eilbeck and Ben Leimkuhler	
2.1	Introduction	35
2.1.1	Solitons, Kinks and Breathers in Two Dimensions. . .	37
2.1.2	The Work of Marín, Eilbeck and Russell on Breathers in the Potassium Layer of Mica	39
2.2	Preliminary Results from Numerical Experiments	43
2.2.1	On-Site Potential	44
2.2.2	Interaction Potential	44
2.2.3	Time Integration Method	47
2.2.4	Parameter Values	47
2.2.5	Numerical Results	49
2.3	Conclusions and Future Plans	64
	References.	66
3	A Supersonic Crowdion in Mica	69
	Juan F.R. Archilla, Yuriy A. Kosevich, Noé Jiménez, Víctor J. Sánchez-Morcillo and Luis M. García-Raffi	
3.1	Introduction	70
3.2	Description of the System.	73
3.3	The Magic Mode Revisited.	75
3.3.1	Basic Variables	75
3.3.2	Fundamental Ansatz	75
3.3.3	Phasors for the Magic Mode.	78
3.4	Kinks with Substrate Potential: The Crowdion	81
3.5	Phonons and Crowdions.	83
3.5.1	Phonons in Presence of a Substrate Potential	83
3.5.2	Crowdion Phonon Tail.	85
3.6	Some Numerical Simulations with Ultradiscrete Kinks or Crowdions	86
3.6.1	Excess Energy	86
3.6.2	Thermalized Medium.	88
3.7	Recoil Energy of ^{40}K	90
3.7.1	^{40}K Decay Branches	91
3.7.2	Secondary Processes	94
3.8	Summary	94
	References.	95

Part II Two-dimensional Lattices

4	Pattern Formation by Traveling Localized Modes in Two-Dimensional Dissipative Media with Lattice Potentials . . .	99
	Valentin Besse, Hervé Leblond, Dumitru Mihalache and Boris A. Malomed	
4.1	Introduction	100
4.1.1	Dissipative Solitons: A Brief Overview	100
4.1.2	The Subject of the Consideration in the Present Chapter	104
4.2	The Cubic-Quintic Complex Ginzburg-Landau Model with the Cellular Potential	106
4.3	The Pattern Formation by Kicked Dipoles	107
4.3.1	Generation of Multi-dipole Patterns by a Dipole Moving in the Transverse Direction	107
4.3.2	Dynamical Regimes Initiated by the Longitudinal Kick Applied to the Dipole.	109
4.3.3	Collision Scenarios for Moving Dipoles in the System with Periodic Boundary Conditions	110
4.4	The Pattern Formation by Kicked Quadrupoles	112
4.5	The Pattern Formation by Kicked Vortices	116
4.5.1	Chaotic Patterns Generated by Kicked Rhombic (Onsite-Centered) Vortices	116
4.5.2	Kicked Square-Shaped (Offsite-Centered) Vortices	118
4.6	Conclusions	123
	References.	123
5	A Numerical Study of Weak Lateral Dispersion in Discrete and Continuum Models.	129
	Luis A. Cisneros-Ake and Antonmaria A. Minzoni	
5.1	Introduction	129
5.2	Numerical Approximation to the Kadomtsev-Petviashvili I Equation	132
5.2.1	Continuous and Discrete Lump Propagation	133
5.3	Lateral Motion and Interaction of Pulses with Obstacles.	137
5.4	The Effect of Impurities in a Prestressed Lattice	140
5.5	Conclusions	144
	References.	145
6	Breather Mobility and the Peierls-Nabarro Potential: Brief Review and Recent Progress.	147
	Magnus Johansson and Peter Jason	
6.1	Introduction	147

6.2	PN-Barriers and Discrete Soliton Mobility in 1D.	150
6.3	Discrete Soliton (Breather) Mobility in 2D.	153
6.3.1	Discrete Soliton Mobility in the 2D Saturable DNLS Model	155
6.3.2	The Kagome Lattice	161
6.4	Travelling Discrete Dissipative Solitons with Intrinsic Gain.	164
6.5	Mobility of Quantum Lattice Compactons	169
6.6	Conclusion	174
	References.	175
7	Asymptotic Approximation of Discrete Breather Modes in Two-Dimensional Lattices	179
	Jonathan A.D. Wattis	
7.1	Introduction	179
7.1.1	Background	181
7.1.2	The One-Dimensional FPU System	182
7.1.3	Generalisation to Two Dimensions	183
7.2	The Asymptotic Reduction for the FPU Chain	184
7.3	Two-Dimensional Square Lattice.	187
7.3.1	Asymptotic Calculations.	187
7.3.2	Case I: The Symmetric Potential ($a = 0$)	189
7.3.3	Form and Stability of Soliton Solutions	190
7.3.4	Higher Order Asymptotic Analysis for Stationary Breathers	192
7.4	Honeycomb Lattice	193
7.4.1	$\mathcal{O}(\varepsilon)$ —Dispersion Relation for the Honeycomb Lattice	194
7.4.2	General Approach for the Higher Order Terms	195
7.5	Conclusions	198
7.5.1	Future Directions.	198
	References.	199

Part III Molecular Dynamics

8	Moving Discrete Breathers in 2D and 3D Crystals	205
	Sergey V. Dmitriev, Andrei A. Kistanov and Vladimir I. Dubinko	
8.1	Introduction	206
8.2	Moving DB in 2D Hexagonal Lattice with Long-Range Morse Potentials	207
8.2.1	Simulation Setup and Moving DB Ansatz	208
8.2.2	Head-On Collision of Moving DB.	211

8.3	DB in Pure Metals	212
8.3.1	Collision of Moving DB	212
8.3.2	Application to Radiation Effects	215
8.4	Wandering DB in an Ionic Crystal.	218
8.4.1	Simulation Details	218
8.4.2	Pairs of Discrete Breathers	219
8.5	Summary	223
	References.	224
9	Standing and Moving Discrete Breathers with Frequencies Above the Phonon Spectrum	229
	Vladimir Hizhnyakov, Mati Haas, Alexander Shelkan and Mihhail Klopov	
9.1	Introduction	229
9.2	Mean Field Theory of Discrete Breathers	230
9.3	Splitting of Discrete Breathers from the Top of the Phonon Spectrum	233
9.4	Standing Discrete Breathers Above the Phonon Spectrum.	235
9.4.1	Standing DBs in Ge and Diamond.	238
9.5	Moving Discrete Breathers with Frequencies Above the Phonon Spectrum.	241
9.6	Concluding Remarks	243
	References.	244
10	Phonon Interference and Energy Transport in Nonlinear Lattices with Resonance Defects	247
	Yuriy A. Kosevich, Haoxue Han, Lyudmila G. Potyomina, Alexandre N. Darinskii and Sebastian Volz	
10.1	Introduction	248
10.2	Model Structures and Simulation Methodology	249
10.2.1	Model Structure	250
10.2.2	Methodology	250
10.3	Results and Discussions	252
10.3.1	Interference Resonance Profile	252
10.3.2	Isotopic Shift of Resonances.	254
10.3.3	Phonon Screening Effect	255
10.3.4	Two-Path Phonon Interference in Si Crystal with Ge Impurities.	256
10.3.5	Random Distribution of Atoms	257
10.3.6	Nonlinear Effects	258
10.3.7	Wave Packet Coherence Length Determination	259
10.4	Conclusions	260
	References.	261

Part IV Electrons and Lattice Vibrations

11 Electron Transfer and Tunneling from Donor to Acceptor in Anharmonic Crystal Lattices	267
Alexander P. Chetverikov, Leonor Cruzeiro, Werner Ebeling and Manuel G. Velarde	
11.1 Introduction	268
11.2 Hamiltonian and Equations of Motion of the Electron-Lattice Dynamics.	270
11.3 Free Electron Dynamics with One Bound State in a Lattice with Periodic Boundary Conditions	272
11.4 Free Electron Dynamics in a Lattice with Fixed Boundary Conditions	275
11.5 Computer Simulations of ET from Donor to Acceptor in a Lattice at Low Temperature	280
11.6 Dependence of Transition Time on α	284
11.7 Discussion and Conclusions	284
References.	287
 12 Bound States of Electrons in Harmonic and Anharmonic Crystal Lattices	 291
Larissa S. Brizhik, Alexander P. Chetverikov, Werner Ebeling, Gerd Röpke and Manuel G. Velarde	
12.1 Introduction	292
12.2 Hamiltonian of the System and Dynamic Equations.	295
12.3 Bisolitons in Harmonic Lattices.	297
12.4 Bisolelectrons in Anharmonic Lattices	300
12.5 Bisolelectrons with Account of the Coulomb Repulsion	307
12.6 Comparison with Numerical Simulations	309
12.7 Supersonic Bisolelectrons	312
12.8 Conclusion	316
References.	317
 13 Solitons and Charge Transport in Triangular and Quadratic Crystal Lattices	 321
A.P. Chetverikov, W. Ebeling and M.G. Velarde	
13.1 Introduction	321
13.2 Excitations in Square Lattices	322
13.3 Dispersion Relation for Two-Dimensional Excitations and KP Equation.	328
13.4 Tight-Binding Dynamics of Charges Interacting with the Lattice Atoms.	331

13.5	Control of Electrons and Losses-Free Transport on Longer Distances	334
13.6	Discussion	336
	References.	337

Part V Semiconductors

14	Experimental Observation of Intrinsic Localized Modes in Germanium	343
	Juan F.R. Archilla, Sergio M.M. Coelho, F. Danie Aurret, Cloud Nyamhere, Vladimir I. Dubinko and Vladimir Hizhnyakov	
14.1	Introduction	344
14.2	Germanium.	345
14.3	Phonons in Ge	346
14.4	Defects and Their Detection with DLTS.	351
14.5	Experiment of Plasma Induced Annealing.	355
14.6	ILM Hypothesis	356
14.7	Thermal Annealing	358
14.8	Comparison of Thermal and Plasma-Induced Annealing.	359
14.9	Summary	360
	References.	361
15	The Origin of Defects Induced in Ultra-Pure Germanium by Electron Beam Deposition	363
	Sergio M.M. Coelho, Juan F.R. Archilla, F. Danie Aurret and Jackie M. Nel	
15.1	Introduction	364
15.2	Experimental	368
15.3	Results and Discussion.	369
15.4	Intrinsic Localized Modes or Breathers	372
	15.4.1 Limitations of Harmonicity	373
	15.4.2 Effect of Intrinsic Localized Modes	376
15.5	Conclusions	377
	References.	378
16	Rate Theory of Acceleration of Defect Annealing Driven by Discrete Breathers	381
	Vladimir I. Dubinko, Juan F.R. Archilla, Sergey V. Dmitriev and Vladimir Hizhnyakov	
16.1	Introduction	381
16.2	Discrete Breathers in Metals and Semiconductors	382
	16.2.1 Metals	383
	16.2.2 Semiconductors.	387

16.3	DB Excitation Under Thermal Equilibrium and External Driving	389
16.3.1	Thermal Activation	390
16.3.2	External Driving	391
16.4	Amplification of Sb-Vacancy Annealing Rate in Germanium by DBs.	392
16.5	Summary	396
	References.	397

Part VI Other Systems

17	The Amide I Band of Crystalline Acetanilide: Old Data Under New Light	401
	Leonor Cruzeiro	
17.1	Setting the Problem	401
17.2	Theory.	404
17.3	The Acetanilide Crystal Structure and Dynamics.	408
17.4	No Orientational Influence on the Amide I Energy	411
17.5	Weak Orientational Dependence of the Amide I Energy.	416
17.6	Strong Orientational Dependence of the Amide I Energy	417
17.7	Discussion and Conclusions	419
	References.	422
18	Extreme Waves and Branching Flows in Optical Media	425
	Marios Mattheakis and George P. Tsironis	
18.1	Introduction	425
18.2	Mathematical Tools for Electromagnetic Wave Propagation	427
18.2.1	Quasi-two Dimensional Ray Solution.	428
18.2.2	Parametric Two Dimensional Ray Solution.	431
18.2.3	Helmholtz Wave Equation Approach	433
18.2.4	Numerical Solution of Maxwell Equations	435
18.3	Branching Flow in Weakly Disordered Media.	437
18.3.1	Statistics of Caustics	438
18.3.2	Branching Flows in Physical Systems	443
18.4	Rogue Wave Formation Through Strong Scattering Random Media	447
18.4.1	Rogue Waves in Optics	448
18.5	Conclusion	451
	References.	452

19	Discrete Bright Solitons in Bose-Einstein Condensates and Dimensional Reduction in Quantum Field Theory	455
	Luca Salasnich	
19.1	Introduction	455
19.2	Bose-Einstein Condensate in a Quasi-1D Optical Lattice	457
19.2.1	Axial Discretization of the 3D Gross-Pitaevskii Equation	458
19.2.2	Transverse Dimensional Reduction of the 3D Discrete Gross-Pitaevskii Equation	458
19.2.3	Numerical Results	460
19.2.4	Collapse of the Discrete Bright Soliton	462
19.3	Dimensional Reduction of a Continuous Quantum Field Theory	464
19.3.1	Dimensional Reduction of the Hamiltonian	465
19.3.2	1D Nonpolynomial Heisenberg Equation	467
19.3.3	Generalized Lieb-Liniger Theory	468
19.4	Dimensional Reduction for Bosons in a Quasi-1D Lattice . . .	469
19.5	Conclusions	470
	References	471

Part VII An Historical Perspective

20	I Saw a Crystal: An Historical Account of the Deciphering of the Markings in Mica	475
	F. Michael Russell	
20.1	Introduction	475
20.2	The Early Years	477
20.3	Hunting for Mica	492
20.4	The Discovery of Charged Particle Tracks	497
20.5	Rebuttal	504
20.6	Decay of Potassium Nuclei	510
20.7	Lattice Excitations from Scattering of Muons	518
20.8	Experimental Confirmation of Quodons	528
20.9	Still Not Understood Tracks	536
20.10	Quodons, Breathers and Extraterrestrials	545
20.11	Question Time	550
20.12	After Dinner Discussion	552
20.13	Recent Developments	556
