

Contents

1	The Three Levels of Aristotle’s Theory of Material Bodies in Forced Motion	1
	Level 1: The Basic Relationship Between Mover, Load, and Speed . . .	1
	Level 2: The Medium and Resistance to Motion	6
	Level 3: Why Motion Persists After the Initial Moving Cause Has Been Removed	8
2	Heaviness, Lightness, Sinking and Floating	15
	Summary: The Main Features of Aristotle’s Theory of Terrestrial Locomotion.	27
3	Some Refinements of the Basic Theory	29
	The Threshold of Motion	29
	Segments of Time, Instants of Time, and the Concept of Speed.	31
	Formal and Dynamical Objections to Motion of Unlimited Extent	34
	Reversal of Motion and Collisions	36
	Heaviness, Lightness, and “the Dense Is Heavy and the Rare Light”	43
	The Geometry of Heaviness: On Projectiles that Reach Peak Speed at Midflight	48
4	The Dynamics of Balance: The Winch and the Lever in the Pseudo Aristotelian <i>Mechanical Problems</i>	55
	How to Balance a Winch Using Aristotle’s <i>Physics</i> , VII.V	55
	The Winch in the Pseudo-aristotelian <i>Mechanical Problems</i>	59

5 Hipparchus on the Theory of Prolonged Motion	67
Appendix A: Do Heavy Objects Become Heavier as they Approach Their Natural Place?	71
Appendix B: A Threshold of Motion in Time, as well as in Force? . . .	73
Appendix C: A Mathematical Formulation of Aristotle's Theory of Forced Horizontal Motion	81
Appendix D: A Mathematical Formulation of Aristotle's Theory of Natural and Forced Vertical Motion	85
Appendix E: A Mathematical Formulation of Hipparchus's Theory of Vertical Motion	91
Appendix F: Alternative Translations of the Quotations Used in the Main Text.	97
Bibliography	117

Bodies and Media

On the Motion of Inanimate Objects in Aristotle's
Physics and On the Heavens

Yavetz, I.

2015, XVII, 118 p. 20 illus., Softcover

ISBN: 978-3-319-21262-3
