Contents

Part I Getting Started

1 An Introduction to Meta-Analysis in R 3
1.1 Getting Started with R 4
1.1.1 Quitting R 5
1.1.2 R as a Calculator 5
1.1.3 Getting Help 6
1.2 Loading, Saving and Restoring Data 6
1.2.1 Importing Data from Other Packages 9
1.3 Select Variables from an R Dataset 10
1.4 Running Scripts 12
1.5 Installing and Using Libraries of Additional Functions 13
1.6 A First Meta-Analysis with R 13
1.7 Summary 16
References 16

Part II Standard Methods

2 Fixed Effect and Random Effects Meta-Analysis 21
2.1 Effect Measures for Continuous Outcomes 22
2.1.1 Mean Difference 22
2.1.2 Standardised Mean Difference 25
2.2 Fixed Effect Model 28
2.3 Random Effects Model 34
2.3.1 Estimation of Between-Study Variance 36
2.3.2 Hartung–Knapp Adjustment 37
2.3.3 Prediction Intervals 39
2.4 Tests and Measures of Heterogeneity 40
2.5 Subgroup Analysis 41

2.6 Meta-Analysis of Other Outcomes 45
2.6.1 Meta-Analysis with Survival Outcomes 46
2.6.2 Meta-Analysis of Cross-Over Trials 48
2.6.3 Meta-Analysis of Adjusted Treatment Effects 50
2.7 Summary 51
References 52

3 Meta-Analysis with Binary Outcomes 55
3.1 Effect Measures for Binary Outcomes 55
3.1.1 Odds Ratio 57
3.1.2 Risk Ratio 59
3.1.3 Risk Difference 60
3.1.4 Arcsine Difference 61
3.2 Estimation in Sparse Data 63
3.2.1 Peto Odds Ratio 66
3.3 Fixed Effect Model 68
3.3.1 Inverse Variance Method 68
3.3.2 Mantel–Haenszel Method 72
3.3.3 Peto Method 75
3.4 Random Effects Model 76
3.4.1 DerSimonian–Laird Method 77
3.5 Heterogeneity and Subgroup Analyses 79
3.6 Summary 81
References 81

4 Heterogeneity and Meta-Regression 85
4.1 Sources of Heterogeneity 85
4.2 Measures of Heterogeneity 85
4.3 Test for Subgroup Differences 88
4.3.1 Fixed Effect Model 89
4.3.2 Random Effects Model with Separate Estimates of τ^2 91
4.3.3 Random Effects Model with Common Estimate of τ^2 94
4.4 Meta-Regression 97
4.4.1 Meta-Regression with a Categorical Covariate 97
4.4.2 Meta-Regression with a Continuous Covariate 100
4.5 Summary 103
References 104

Part III Advanced Topics

5 Small-Study Effects in Meta-Analysis 107
5.1 Graphical Illustration of Small-Study Effects 108
5.1.1 Funnel Plot 109
5.1.2 Radial Plot 113

5.2 Statistical Tests for Small-Study Effects 115
5.2.1 Classical Tests by Begg and Egger 115
5.2.2 Modified Versions of Classical Tests for Binary Outcomes 120
5.3 Adjusting for Small-Study Effects 124
5.3.1 Trim-and-Fill Method 124
5.3.2 Copas Selection Model 128
5.3.3 Adjustment by Regression 135
5.4 Summary 138
References 138

6 Missing Data in Meta-Analysis 143
6.1 Missing Outcome Data: Some Considerations 143
6.1.1 Study-Level Adjustment for Missing Data 144
6.1.2 Sensitivity Analysis Strategies 146
6.1.3 Strategy 1: Fixed Equal 149
6.1.4 Strategy 2: Fixed Opposite 150
6.1.5 Strategy 3: Random Equal 151
6.1.6 Strategy 4: Random Uncorrelated 152
6.1.7 Discussion of the Four Strategies 153
6.2 Missing Precision 155
6.2.1 Multiple Imputation Approach 156
6.2.2 Missing Participant Numbers 163
6.3 Summary 163
References 164

7 Multivariate Meta-Analysis 165
7.1 Fixed Effect Model 165
7.2 Dealing with Unbalanced Data 173
7.3 Random Effects Model 179
7.3.1 Fitting the Random Effects Model 179
7.4 Discussion 183
References 184

8 Network Meta-Analysis 187
8.1 Concepts and Challenges of Network Meta-Analysis 187
8.2 Model and Estimation in Network Meta-Analysis 189
8.2.1 Fixed Effect Model 190
8.2.2 Random Effects Model 194
8.3 Using the R Package netmeta for Network Meta-Analysis 195
8.3.1 Basic Analysis and Network Plots 196
8.3.2 A First Network Plot 199
8.3.3 A More Detailed Look at the Output 200
8.3.4 Additional Network Plots 204
8.3.5 Forest Plots 205
8.4 Decomposition of the Heterogeneity Statistic 208

8.5 The Net Heat Plot 209
8.5.1 Bland–Altman Plot to Assess the Effect of Heterogeneity on Estimated Treatment Comparisons 212
8.6 Summary 214
References 214

9 Meta-Analysis of Diagnostic Test Accuracy Studies 217
9.1 Special Challenges in Meta-Analysis of Diagnostic Test Accuracy Studies 217
9.2 Analysis of Diagnostic Test Accuracy Studies 218
9.2.1 Definition of Sensitivity and Specificity 218
9.2.2 Additional Measures: Diagnostic Odds Ratio and Likelihood Ratios 220
9.2.3 Tests Based on a Continuous Marker 225
9.3 Scatterplot of Sensitivity and Specificity 227
9.4 Models for Meta-Analysis of Diagnostic Test Accuracy Studies 229
9.4.1 Hierarchical Model 230
9.4.2 Bivariate Model 231
9.5 Methods for Estimating a Summary ROC Curve 233
9.6 Summary 235
References 236

A Further Information on R 237
A.1 Installation of R 237
A.2 Importing Data into R 238
A.2.1 Import Text Files 238
A.2.2 Import Data from RevMan 5 239
A.3 R Packages for Meta-Analysis 242
A.3.1 General Purpose R Packages for Meta-Analysis 242
A.3.2 R Packages to Conduct Network Meta-Analysis 245
