

Contents

1	A Brief Overview of Atmospheric and Space Sciences	1
1.1	Earth as a Special Habitat	1
1.2	Atmospheric and Space Sciences: Toward Unification.	4
1.3	International Activity in Atmosphere-Ionosphere Science.	5
1.4	Planetary Science Context	7
	References	8
2	Introduction to Atmospheric Physics	9
2.1	Introduction to Earth’s Atmosphere.	9
2.2	Basic Atmospheric Parameters and Coordinate System	11
2.3	Continuum Hypothesis	12
2.4	Atmospheric Composition	13
2.5	Universal Gravity	14
2.6	Equation of State: Ideal Gas Law	15
2.7	Thermodynamic Laws.	17
2.8	Heat Capacity	18
2.9	Geopotential	19
2.10	Hydrostatic Equilibrium	19
2.11	Potential Temperature	21
2.12	Atmospheric Stability	21
	2.12.1 Lapse Rate	21
	2.12.2 Static Stability	22
2.13	Transport Phenomena	22
	2.13.1 Diffusion.	23
	2.13.2 Viscosity	24
	2.13.3 Conduction	25
	2.13.4 Radiation.	26
2.14	Richardson Number	27
2.15	Reynolds Number.	27
	References	28

3	Some Mathematical Basics: Conservation Laws	29
3.1	Introduction	29
3.2	Reference Frames in Fluid Dynamics	30
3.3	Material Derivative	31
3.4	Rotational Effects	32
3.5	Conservation of Momentum	33
3.6	Conservation of Energy	34
3.7	Conservation of Mass	34
3.8	Incompressible Flow	35
3.9	Governing Equations of Atmospheric Dynamics	35
3.10	Vertical Coordinate System	38
	References	39
4	Earth's Atmosphere and Geospace Environment	41
4.1	Sun-Earth Connection	41
4.2	Sun	42
4.3	Heliosphere	43
4.4	Magnetosphere	45
4.5	Plasmasphere	46
4.6	The Atmosphere-Ionosphere System	46
4.7	Neutral Atmosphere	47
4.7.1	Troposphere	47
4.7.2	Stratosphere	47
4.7.3	Mesosphere	48
4.7.4	Thermosphere	49
4.7.5	Exosphere	49
4.8	Ionosphere	50
	References	51
5	Waves in Terrestrial and Planetary Atmospheres	53
5.1	Notion of Waves	53
5.2	Introduction to Basic Wave Parameters	55
5.3	Wave Equation	58
5.4	Internal Waves	59
5.5	Wave Generation	60
5.6	Gravity Waves	60
5.6.1	Boussinesq Approximation	61
5.6.2	Gravity Wave Dispersion Relation	62
5.7	Large-Scale Waves	62
5.8	Wave Decay	63
5.9	Observation of Waves in the Atmosphere	64
5.9.1	Observations in the Lower Atmosphere	65
5.9.2	Observations in the Upper Atmosphere	66

5.10	Effects of Waves in Terrestrial and Planetary Atmospheres	68
5.10.1	Gravity Wave Processes	69
	References	75
6	Atmospheric Circulation and Dynamical Processes	81
6.1	Eddy and Vortex	81
6.2	Radiative Equilibrium	83
6.3	Concept of Circulation	84
6.4	General Circulation.	85
6.5	General Circulation Modeling	85
6.6	Circulation Patterns in the Atmosphere	88
6.7	Eulerian Mean	88
6.8	Transformed Eulerian Mean (TEM)	90
6.9	Sudden Stratospheric Warming.	92
6.10	Atmospheric Vertical Coupling and Gravity Waves During Sudden Warmings	94
	References	97
	Appendix A: Physical Constants and Parameters	101
	Appendix B: Useful Mathematical Tools	105
	Glossary	107
	Index	109

Atmospheric and Space Sciences: Neutral Atmospheres

Volume 1

Yiğit, E.

2015, XVII, 110 p. 29 illus., 19 illus. in color., Softcover

ISBN: 978-3-319-21580-8
