

Contents

1	Addressing the Issues of Non-isotropy and Non-additivity in the Development of Quantum Chemistry-Grounded Polarizable Molecular Mechanics.	1
	Nohad Gresh, Krystal El Hage, Elodie Goldwasser, Benoit de Courcy, Robin Chaudret, David Perahia, Christophe Narth, Louis Lagardère, Filippo Lipparini and Jean-Philip Piquemal	
2	Proton Transfer in Aqueous Solution: Exploring the Boundaries of Adaptive QM/MM.	51
	T. Jiang, J.M. Boereboom, C. Michel, P. Fleurat-Lessard and R.E. Buló	
3	Recent Progress in Adaptive-Partitioning QM/MM Methods for Born-Oppenheimer Molecular Dynamics	93
	Soroosh Pezeshki and Hai Lin	
4	Probing Proton Transfer Reactions in Molecular Dynamics—A Crucial Prerequisite for QM/MM Simulations Using Dissociative Models.	115
	Thomas S. Hofer	
5	Accelerating QM/MM Calculations by Using the Mean Field Approximation	135
	M. Elena Martín, M. Luz Sánchez, Aurora Muñoz-Losa, Ignacio Fdez. Galván and Manuel A. Aguilar	
6	Development of a Massively Parallel QM/MM Approach Combined with a Theory of Solutions	153
	Hideaki Takahashi and Nobuyuki Matubayasi	

7	Structure and Electronic Properties of Liquids and Complex Molecular Systems in Solution: Coupling Many-Body Energy Decomposition Schemes to Born-Oppenheimer Molecular Dynamics	197
	Benedito J.C. Cabral, K. Coutinho and S. Canuto	
8	Free Energy Gradient Method and Its Recent Related Developments: Free Energy Optimization and Vibrational Frequency Analysis in Solution	219
	Yukichi Kitamura, Norio Takenaka, Yoshiyuki Koyano and Masataka Nagaoka	
9	Towards an Accurate Model for Halogens in Aqueous Solutions	253
	M.I. Bernal-Uruchurtu, A. Alcaraz Torres, F.A. Batista Romero and R. Hernández-Lamoneda	
10	Theoretical Studies of the Solvation of Abundant Toxic Mercury Species in Aqueous Media	275
	J.I. Amaro-Estrada and A. Ramírez-Solís	
11	Advances in QM/MM Molecular Dynamics Simulations of Chemical Processes at Aqueous Interfaces	303
	Marilia T.C. Martins-Costa and Manuel F. Ruiz-López	
12	QM/MM Approaches for the Modeling of Photoinduced Processes in Biological Systems	325
	Benedetta Mennucci	
13	The Non Empirical Local Self Consistent Field Method: Application to Quantum Mechanics/Molecular Mechanics (QM/MM) Modeling of Large Biomolecular Systems	343
	Jean-Louis Rivail, Antonio Monari and Xavier Assfeld	
14	Computational Study of the Initial Step in the Mechanism of Dehaloperoxidase A: Determination of the Protonation Scheme at the Active Site and the Movement of the His55 Residue	367
	Fiorentina Bottinelli, Patricia Saenz-Méndez and Oscar N. Ventura	
15	Exploring Chemical Reactivity in Enzyme Catalyzed Processes Using QM/MM Methods: An Application to Dihydrofolate Reductase	383
	J. Javier Ruiz-Pernía, Vicent Moliner and Iñaki Tuñón	

16 Multiscale Modelling of In Situ Oil Sands Upgrading with Molybdenum Carbide Nanoparticles	415
Xingchen Liu, Baojing Zhou, Farouq Ahmed, Alexander Tkalych, Akira Miyamoto and Dennis R. Salahub	
17 Computational Spectroscopy in Solution: Methods and Models for Investigating Complex Systems	447
Vincenzo Barone, Enrico Benassi and Ivan Carnimeo	
Index	519

Quantum Modeling of Complex Molecular Systems

Rivail, J.-L.; Ruiz-Lopez, M.; Assfeld, X. (Eds.)

2015, IX, 523 p., Hardcover

ISBN: 978-3-319-21625-6
