1	Introduction	1
1.1	Energy and Building Sector	1
1.2	Energy Regulation	5
1.3	Energy Certification	5
1.4	EU Directives and Standards	6
1.5	The Implementation of EPBD and the Recast of EPBD in Europe	9
	References	10
2	Review and State of the Art on Methodologies of Buildings’ Energy-Efficiency Classification	13
2.1	Introduction	13
2.2	Review on Building Energy-Efficiency Benchmarking Methods	13
2.3	Review on Energy Rating Methodologies	20
2.4	Review on Energy Labeling Methods	23
2.5	Review on Integrated Building Energy Classification Methods	25
	References	29
3	Office Building Simulation Models and Simplified Audits	33
3.1	Introduction	33
3.2	The Simulation Model Description	36
3.2.1	TRNBuild Input Data	36
3.2.2	Model Output Data	37
3.2.3	TRNSYS Files	41
3.3	Small Audits of Case Study Office Buildings	42
3.3.1	Building Data Collection	42
3.3.2	The Office Buildings’ Simulations in TRNSYS	46
3.4	Conclusions	48

4 Detailed Audit and Detailed Case-Study Building Model: Virtual Building Dataset (VBD) for Benchmarking and Classification of Office Buildings	51
4.1 Part A: Detailed Audit and Detailed Case Study Building Model in Central Athens, Greece	51
4.1.1 Introduction	51
4.1.2 General Information	52
4.1.3 Envelope Data	53
4.1.4 Mechanical/Electrical Equipment Description	53
4.1.5 The BMS System	57
4.1.6 The Simulation Model of Byte Building	97
4.2 Part B: Virtual Building Dataset (VBD) for Benchmarking and Classification of Office Buildings	115
4.2.1 Virtual Building Dataset (VBD) for Benchmarking and Classification of Office Buildings	115
4.2.2 VBD Results	126
4.2.3 Classification According to CEN Standard Using VBD	132
4.2.4 Adaptability of VBD	135
4.2.5 Conclusions	136
References	139
5 Environmental Rating of Buildings	143
5.1 Introduction	143
5.2 Summary Table of Credits	144
5.3 Sustainable Sites (SS)	146
5.3.1 Control of Erosion and Sedimentation	146
5.3.2 Site Selection	146
5.3.3 Development Density	147
5.3.4 Brownfield Redevelopment	148
5.3.5 Alternative Transportation (Public Transportation Access)	148
5.3.6 Alternative Transportation (Bicycle Storage and Changing Rooms)	149
5.3.7 Alternative Transportation (Low-Emitting and Fuel-Efficient Vehicles)	149
5.3.8 Alternative Transportation (Parking Capacity)	150
5.3.9 Minimized Site Disturbance (Protect or Restore Open Space)	150
5.3.10 Stormwater Design (Quality Control)	151
5.3.11 Stormwater Design (Quantity Control)	151
5.3.12 Heat Island Effect (Nonroof)	152
5.3.13 Heat Island Effect (Roof)	152
5.3.14 Light Pollution Reduction	153

5.4	Water Efficiency (WE)	154
5.4.1	Efficient Water Management (Reduce by 50 %)	154
5.4.2	Efficient Water Management (Wastewater Use or Avoid Irrigation)	154
5.4.3	Innovative Wastewater Technologies and Water Use Reduction	155
5.5	Energy and Atmosphere (EA)	155
5.5.1	Fundamental Commissioning of Building Energy Systems	155
5.5.2	Minimum Energy Performance	156
5.5.3	CFC Reduction of Heating and Cooling Systems	157
5.5.4	Optimize Energy Performance	157
5.5.5	Renewable Energy Sources (5 %)	158
5.5.6	Renewable Energy Sources (10 %)	159
5.5.7	Renewable Energy Sources (20 %)	159
5.5.8	Ozone Protection	160
5.5.9	Measurement and Verification	160
5.5.10	Green Power	161
5.6	Materials and Resources (MR)	161
5.6.1	Storage and Collection of Recyclables	161
5.6.2	Building Reuse—(75 % Maintain of the Existing Building Envelope)	162
5.6.3	Building Reuse—(100 % Maintain of the Existing Building Envelope)	162
5.6.4	Building Reuse—(100 % Maintain of the Existing Building Envelope and 50 % Maintain of the Existing Interiors)	163
5.6.5	Construction Waste Management (50 % Reduction of Waste Going to the Dump)	164
5.6.6	Construction Waste Management (75 % Reduction of Waste Going to the Dump)	164
5.6.7	Materials Reuse (5 %)	165
5.6.8	Materials Reuse (10 %)	165
5.6.9	Recycled Content (5 %)	166
5.6.10	Recycled Content (10 %)	166
5.6.11	Regional Materials (20 % Regionally Manufactured)	167
5.6.12	Regional Materials (35 % Regionally Manufactured)	168
5.6.13	Rapidly Renewable Materials	168
5.7	Indoor Environmental Quality (IEQ)	169
5.7.1	Minimum Indoor Air Quality Performance	169
5.7.2	Environmental Tobacco Smoke (ETS) Control	170
5.7.3	Carbon Dioxide (CO ₂) Levels Monitoring	170
5.7.4	Low-Emitting Materials (Adhesives and Sealants)	171
5.7.5	Low-Emitting Materials (Paints and Coatings)	171

5.7.6	Low-Emitting Materials (Flooring Systems)	172
5.7.7	Low-Emitting Materials (Composite Wood)	172
5.7.8	Indoor Chemical and Pollutant Source Control	173
5.7.9	Thermal Comfort (Based on International Standards) . . .	173
5.7.10	Thermal Comfort (Permanent Monitoring System)	174
5.7.11	Daylight and Views (75 % Space Daylight)	175
5.7.12	Daylight and Views (90 % Space Daylight)	175
