

Contents

1	Introduction	1
2	Background	5
2.1	Constraint satisfaction problem (CSP)	6
2.2	CSP-solvers	8
2.2.1	Search	9
2.2.2	Constraint propagation	11
2.2.3	Combining propagation and search	15
2.3	Boolean satisfiability problem (SAT)	15
2.4	SAT-solvers	15
2.4.1	Search	17
2.4.2	Boolean constraint propagation (BCP)	18
2.4.3	Conflict analysis	19
2.5	Hybrid solvers and SMT-solvers	21
2.6	Summary	21
3	Solver performance on tractable CSPs: empirical evaluation	25
3.1	Preliminaries	27
3.2	Constant-closed constraints	28
3.3	Max-closed constraints	31
3.4	0/1/all constraints	32
3.5	Connected-row-convex constraints	35
3.6	Bounded-width structures	37
3.7	Summary	40
4	SAT encodings	43
4.1	Sparse encodings	43
4.2	The log encoding	46
4.3	Regular and interval-based encodings	47
4.4	Other encodings	49
4.5	What is a <i>good</i> SAT encoding?	51
4.6	Summary	53

5 From CSP to SAT: width restrictions	55
5.1 Preliminaries	55
5.1.1 Constraint satisfaction problems and k -consistency	55
5.1.2 Inference rules	57
5.2 k -consistency and negative-hyper-resolution	58
5.3 Negative-hyper-resolution and SAT-solvers	61
5.4 k -consistency and SAT-solvers	67
5.5 Experimental results	68
5.6 Summary	73
6 From CSP to SAT: language restrictions	75
6.1 Tractable CSP languages	75
6.1.1 The Boolean case: tractable languages for SAT	75
6.1.2 A trivial case: Constant-closed constraints	76
6.1.3 Max-closed constraints	76
6.1.4 Connected-row-convex constraints	77
6.2 Standard SAT encodings	78
6.3 The order encoding	78
6.4 Full regular encodings	81
6.5 Performance of DPLL-based SAT-solvers on tractable CSPs	82
6.5.1 Constant-closed constraints	83
6.5.2 Max-closed constraints	84
6.5.3 Connected-row-convex constraints	86
6.6 Summary	87
7 SAT encodings of a classical problem: a case study	89
7.1 SAT encodings of the pigeonhole principle	89
7.2 Theoretical analysis	91
7.3 Experimental results	94
7.4 Theory vs. practice	95
7.5 Empirically good encodings	96
7.6 Summary	98
8 Conclusions	99
8.1 Summary of contributions	99
8.2 Open questions	102
Bibliography	105

Bridging Constraint Satisfaction and Boolean
Satisfiability

Petke, J.

2015, XI, 113 p. 19 illus., Hardcover

ISBN: 978-3-319-21809-0
