

Contents

- 1 Building Information Models: An Introduction 1**
 - 1.1 Introduction 1
 - 1.2 Defining Building Information Modelling 3
 - 1.3 Industry Foundation Classes Model 5
 - 1.4 Storage and Exchange of Building Information Models 6
 - 1.5 Views of Building Information Models 7
 - 1.6 The Role of BIM in the Enterprise 8
 - References 11
- 2 The Future of Building Information Modelling: BIM 2.0 13**
 - 2.1 Introduction 13
 - 2.2 Research Dimensions of Building Information Modelling 14
 - 2.2.1 Information Model-Related Aspects 15
 - 2.2.2 Organizational Aspects 16
 - 2.2.3 Domain-Specific Aspects 17
 - 2.2.4 Project Management Aspects 17
 - 2.2.5 Integration and Interoperability Aspects 17
 - 2.3 BIM-M: Utilization of BIM in Construction Management 18
 - 2.4 Technologies for BIM 2.0 19
 - 2.5 BIM-Based Management of Construction Processes 20
 - References 23
- 3 Foundational SOA Patterns for Complex Information Models 25**
 - 3.1 Introduction 25
 - 3.2 Design Principles of Service Orientation 26
 - 3.3 Complex Information Models 28
 - 3.4 Service-Oriented Patterns 30
 - 3.4.1 Data Definition Language Provider 30
 - 3.4.2 Model View Selector 31
 - 3.4.3 Model View Entity Extractor 32
 - 3.4.4 Sub-view Generator 33

3.4.5	View Observer	34
3.4.6	View Updater	35
3.4.7	Extended Model Observer	36
3.4.8	Extended Model View Observer	37
3.4.9	Extended Model View Updater	38
3.4.10	Model Controller	39
