## Part I History of VC Theory

<b>1</b>	<b>Chervonenkis's Recollections. . . . .</b>	<b>3</b>
	Alexey Chervonenkis	
<b>2</b>	<b>A Paper that Created Three New Fields: Teoriya Veroyatnostei i Ee Primeneniya 16(2), 1971, pp. 264–279. . . . .</b>	<b>9</b>
	R.M. Dudley	
<b>3</b>	<b>On the Uniform Convergence of Relative Frequencies of Events to Their Probabilities. . . . .</b>	<b>11</b>
	V.N. Vapnik and A.Ya. Chervonenkis	
<b>4</b>	<b>Sketched History: VC Combinatorics, 1826 up to 1975 . . . . .</b>	<b>31</b>
	R.M. Dudley	
<b>5</b>	<b>Institute of Control Sciences Through the Lens of VC Dimension . . . . .</b>	<b>43</b>
	Vasily N. Novoseltsev	

## Part II Reviews of Measures of Complexity

<b>6</b>	<b>VC Dimension, Fat-Shattering Dimension, Rademacher Averages, and Their Applications . . . . .</b>	<b>57</b>
	Vladimir V. V'yugin	
<b>7</b>	<b>Around Kolmogorov Complexity: Basic Notions and Results . . . .</b>	<b>75</b>
	Alexander Shen	

<b>8</b>	<b>Predictive Complexity for Games with Finite Outcome Spaces . . .</b>	<b>117</b>
	Yuri Kalnishkan	

### **Part III Making VC Bounds More Accurate**

<b>9</b>	<b>Making Vapnik–Chervonenkis Bounds Accurate . . . . .</b>	<b>143</b>
	Léon Bottou	
<b>10</b>	<b>Comment: Transductive PAC-Bayes Bounds Seen as a Generalization of Vapnik–Chervonenkis Bounds . . . . .</b>	<b>157</b>
	Olivier Catoni	
<b>11</b>	<b>Comment: The Two Styles of VC Bounds . . . . .</b>	<b>161</b>
	Vladimir Vovk	
<b>12</b>	<b>Rejoinder: Making VC Bounds Accurate . . . . .</b>	<b>165</b>
	Léon Bottou	

### **Part IV Advances in VC Theory**

<b>13</b>	<b>Measures of Complexity in the Theory of Machine Learning . . . .</b>	<b>171</b>
	Alexey Chervonenkis	
<b>14</b>	<b>Classes of Functions Related to VC Properties . . . . .</b>	<b>185</b>
	R.M. Dudley	
<b>15</b>	<b>On Martingale Extensions of Vapnik–Chervonenkis Theory with Applications to Online Learning . . . . .</b>	<b>197</b>
	Alexander Rakhlin and Karthik Sridharan	
<b>16</b>	<b>Measuring the Capacity of Sets of Functions in the Analysis of ERM . . . . .</b>	<b>217</b>
	Ingo Steinwart	
<b>17</b>	<b>Algorithmic Statistics Revisited . . . . .</b>	<b>235</b>
	Nikolay Vereshchagin and Alexander Shen	
<b>18</b>	<b>Justifying Information-Geometric Causal Inference . . . . .</b>	<b>253</b>
	Dominik Janzing, Bastian Steudel, Naji Shajarisales and Bernhard Schölkopf	

<b>19</b>	<b>Interpretation of Black-Box Predictive Models . . . . .</b>	<b>267</b>
	Vladimir Cherkassky and Sauprik Dhar	
<b>20</b>	<b>PAC-Bayes Bounds for Supervised Classification . . . . .</b>	<b>287</b>
	Olivier Catoni	
<b>21</b>	<b>Bounding Embeddings of VC Classes into Maximum Classes . . . .</b>	<b>303</b>
	J. Hyam Rubinstein, Benjamin I.P. Rubinstein and Peter L. Bartlett	
<b>22</b>	<b>Strongly Consistent Detection for Nonparametric Hypotheses . . . .</b>	<b>327</b>
	László Györfi and Harro Walk	
<b>23</b>	<b>On the Version Space Compression Set Size and Its Applications . . . . .</b>	<b>341</b>
	Ran El-Yaniv and Yair Wiener	
<b>24</b>	<b>Lower Bounds for Sparse Coding . . . . .</b>	<b>359</b>
	Andreas Maurer, Massimiliano Pontil and Luca Baldassarre	
<b>25</b>	<b>Robust Algorithms via PAC-Bayes and Laplace Distributions. . . .</b>	<b>371</b>
	Asaf Noy and Koby Crammer	
	<b>Index . . . . .</b>	<b>395</b>

Measures of Complexity

Festschrift for Alexey Chervonenkis

Vovk, V.; Papadopoulos, H.; Gammerman, A. (Eds.)

2015, XXXI, 399 p. 47 illus., 30 illus. in color., Hardcover

ISBN: 978-3-319-21851-9
