Author biographies	vii
Abbreviations	ix
Preface	xi
<b>1 Introduction to pneumonia</b>	<b>1</b>
Introduction	1
Overview of bacterial pneumonia	1
References	4
<b>2 Epidemiology, etiology, and risk factors of bacterial pneumonia</b>	<b>7</b>
Epidemiology	7
Microbial etiology	11
Antibiotic resistance	15
Risk factors	19
Summary points	23
References	23
<b>3 Pathology and clinical features of pneumonia</b>	<b>29</b>
Pathophysiology of pneumonia	29
Pathogenesis of pneumonia	34
Signs and symptoms of pneumonia	34
Prognosis of pneumonia	35
Summary points	36
References	36
<b>4 Diagnosis and classification of pneumonia</b>	<b>39</b>
Diagnosis and classification of hospital-acquired and ventilator-associated pneumonia	39
Diagnosis of community-acquired pneumonia	40

Summary points	54
References	54
<b>5 Methods for preventing pneumonia</b>	<b>57</b>
Guidelines for the prevention of pneumonia	57
Preventative strategies to reduce the risk of community-acquired pneumonia in adults	58
Nonpharmacological prevention of hospital-acquired and ventilator-associated pneumonia	61
Vaccination	63
New vaccines	68
Summary points	68
References	69
<b>6 Management of pneumonia</b>	<b>75</b>
Guidelines for management and treatment of pneumonia	75
Medical management of pneumonia	77
Guidelines for the antimicrobial treatment of community-acquired pneumonia	80
Guidelines for the antimicrobial treatment of hospital-acquired/ventilator-associated pneumonia	81
Emerging therapies for the treatment of community-acquired pneumonia	84
Emerging therapies for the treatment of hospital-acquired/ventilator-associated pneumonia	88
Management of pneumonia in special populations	89
Summary points	94
References	94
