

Contents

1	Classical results	1
1.1	Sums of independent random variables	1
1.1.1	Strong law of large numbers for sums	1
1.1.2	Central limit theorem for sums	2
1.1.3	Large deviations	2
1.2	Martingales	6
1.2.1	Strong law of large numbers for martingales	8
1.2.2	Central limit theorem for martingales	9
	References	10
2	Concentration inequalities for sums	11
2.1	Bernstein's inequalities	11
2.1.1	One-sided inequalities	11
2.1.2	Two-sided inequalities	17
2.1.3	About the second term in Bernstein's inequality	18
2.2	Hoeffding's inequality	21
2.3	Binomial rate functions	26
2.4	Bennett's inequality	31
2.5	SubGaussian inequalities	36
2.5.1	Random variables bounded from above	37
2.5.2	Nonnegative random variables	40
2.5.3	Symmetric conditions for bounded random variables	42
2.5.4	Asymmetric conditions for bounded random variables	43
2.6	Always a little further on weighted sums	45
2.7	Sums of Gamma random variables	48
2.8	McDiarmid's inequality	52
2.9	Complements and Exercises	57
	References	59

3	Concentration inequalities for martingales	61
3.1	Azuma-Hoeffding inequalities	61
3.1.1	Martingales with differences bounded from above	62
3.1.2	Symmetric conditions for bounded difference martingales	65
3.1.3	Asymmetric conditions for bounded difference martingales	66
3.2	Freedman and Fan-Grama-Liu inequalities	68
3.3	Bernstein's inequality	71
3.4	De la Pena's inequalities	74
3.4.1	Conditionally symmetric martingales	74
3.4.2	The missing factors	75
3.5	Gaussian martingales	78
3.6	Always a little further on martingales	80
3.7	Martingales heavy on left or right	85
3.8	Complements and Exercises	90
	References	97
4	Applications in probability and statistics	99
4.1	Autoregressive process	99
4.2	Random permutations	102
4.3	Empirical periodogram	108
4.4	Random matrices	111
4.4.1	Independent entries with mixture matrix	113
4.4.2	Independent columns with dependent coordinates	114
4.4.3	Proofs	115
	References	119

Concentration Inequalities for Sums and Martingales

Bercu, B.; Delyon, B.; Rio, E.

2015, X, 120 p. 9 illus. in color., Softcover

ISBN: 978-3-319-22098-7
