## Part I Hamiltonian Systems and Celestial Mechanics

<b>On the Force Fields Which Are Homogeneous of Degree <math>-3</math> .....</b>	<b>3</b>
Alain Albouy	
<b>Bifurcations of the Spatial Central Configurations in the 5-Body Problem .....</b>	<b>9</b>
Martha Álvarez-Ramírez, Motserrat Corbera, and Jaume Llibre	
<b>Convex Central Configurations of Two Twisted <math>n</math>-gons .....</b>	<b>17</b>
Esther Barrabés and Josep Maria Cors	
<b>The Newtonian <math>n</math>-Body Problem in the Context of Curved Space.....</b>	<b>23</b>
Florin Diacu	
<b>Poincaré Maps and Dynamics in Restricted Planar (<math>n + 1</math>)-Body Problems .....</b>	<b>27</b>
Antonio García	
<b>A Methodology for Obtaining Asymptotic Estimates for the Exponentially Small Splitting of Separatrices to Whiskered Tori with Quadratic Frequencies .....</b>	<b>31</b>
Amadeu Delshams, Marina Gonchenko, and Pere Gutiérrez	
<b>Homoclinic and Heteroclinic Orbits for a Class of Singular Planar Newtonian Systems .....</b>	<b>39</b>
Joanna Janczewska	
<b>Transport Dynamics: From the Bicircular to the Real Solar System Problem .....</b>	<b>45</b>
Mercè Ollé, Esther Barrabés, Gerard Gómez, and Josep Maria Mondelo	

<b>Quasi-Periodic Almost-Collision Motions in the Spatial Three-Body Problem</b> .....	49
Jesús F. Palacián, Flora Sayas, and Patricia Yanguas	
<b>Generalized Discrete Nonlinear Schrödinger as a Normal Form at the Thermodynamic Limit for the Klein–Gordon Chain</b> .....	53
Simone Paleari and Tiziano Penati	
<b>Stability of Euler-Type Relative Equilibria in the Curved Three Body Problem</b> .....	59
Ernesto Pérez-Chavela and Juan Manuel Sánchez Cerritos	
<b>Two-Dimensional Symplectic Return Maps and Applications</b> .....	65
Regina Martínez and Carles Simó	
<b>Central Configurations of an Isosceles Trapezoidal Five-Body Problem</b> .....	71
Abdulrehman Kashif, Muhammad Shoaib, and Anoop Sivasankaran	
<b>The Discrete Hamiltonian–Hopf Bifurcation for 4D Symplectic Maps</b> ....	77
Ernest Fontich, Carles Simó, and Arturo Vieiro	
<b>Moment Map of the Action of <math>SO(3)</math> on <math>\mathbb{R}^3 \times \mathbb{R}^3</math></b> .....	83
José Antonio Villa Morales	
<b>Part II Virus Dynamics and Evolution</b>	
<b>Modelling Infection Dynamics and Evolution of Viruses in Plant Populations</b> .....	89
Aurora Fraile and Fernando García-Arenal	
<b>The Spread of Two Viral Strains on a Plant Leaf</b> .....	95
Juan Carlos Cantero-Guardeño, Vladimir Sobolev, and Andrei Korobeinikov	
<b>Tracking the Population Dynamics of Plant Virus Escape Mutants</b> .....	101
Santiago F. Elena	
<b>Evolutionary Escape in Populations with Genotype-Phenotype Structure</b> .....	107
Esther Ibáñez-Marcelo and Tomás Alarcón	
<b>Evolution of Stalk/Spore Ratio in a Social Amoeba: Cell-to-Cell Interaction via a Signaling Chemical Shaped by Cheating Risk</b> .....	113
Yoh Iwasa	
<b>Within-Host Viral Evolution Model with Cross-Immunity</b> .....	119
Narani van Laarhoven and Andrei Korobeinikov	

<b>Modelling Viral Evolution and Adaptation</b> .....	125
Susanna Manrubia	
<b>Changes in Codon-Pair Bias of Human Immunodeficiency Virus Type 1 Affect Virus Replication</b> .....	131
Miguel Ángel Martínez	
<b>Competing Neutral Populations of Different Diffusivity</b> .....	137
Simone Pigolotti	
<b>Density-Dependent Diffusion and Epidemics on Heterogeneous Metapopulations</b> .....	143
Albert Avinyó, Marta Pellicer, Jordi Ripoll, and Joan Saldaña	
<b>Are Viral Blips in HIV-1-Infected Patients Clinically Relevant?</b> .....	149
Daniel Sánchez-Taltavull and Tomás Alarcón	
<b>Models of Developmental Plasticity and Cell Growth</b> .....	155
Graeme Wake	

Extended Abstracts Spring 2014

Hamiltonian Systems and Celestial Mechanics; Virus  
Dynamics and Evolution

Corbera, M.; Cors, J.M.; Llibre, J.; Korobeinikov, A. (Eds.)

2015, VII, 160 p. 26 illus., 14 illus. in color., Softcover

ISBN: 978-3-319-22128-1

A product of Birkhäuser Basel
