

Contents

State of the Art and Future of AS

Developing an Ontology for Autonomous Entities in a Virtual Reality: The PRESTO Experience.	3
<i>Paolo Busetta, Mauro Fruet, Piero Consolati, Mauro Dragoni, and Chiara Ghidini</i>	
Modelling and Simulation in the Autonomous Systems' Domain – Current Status and Way Ahead.	17
<i>Jan Hodicky</i>	
Improving Robotic and Autonomous Systems Information Interoperability: Standardizing Data Exchanges with XML	24
<i>Steve Litwiller, Matt Weber, and Frank Klucznik</i>	
Modeling and Simulation for UAS Integration into the United States National Airspace System and NextGen	40
<i>Richard S. Stansbury, John Robbins, Massood Towhidnejad, Brent Terwilliger, Mohammad Moallemi, and Jayson Clifford</i>	
Modeling and Simulation Interoperability Concepts for Multidisciplinarity, Interdisciplinarity, and Transdisciplinarity – Implications for Computational Intelligence Enabling Autonomous Systems	60
<i>Andreas Tolk</i>	

MS Experimental Frameworks for AS

Interoperability Issues Reduction in Command and Control for Multi-robot Systems	77
<i>Francesco Fedi and Francesco Nasca</i>	
Practical Applications and Experiments with the SyRoTek Platform	90
<i>Miroslav Kulich, Jan Chudoba, and Libor Přeučil</i>	
MedALE RTS Campaign: Data Analysis and Reporting.	102
<i>Marco Pasciuto, Giovanni Riccardi, Paolo Galati, Fausto Pusceddu, Paolo Nurra, Maurizio Goiak, Emilio Banfi, Francesco Grimaccia, Paolo Alviani, and Maurizio Romano</i>	

Methods and Algorithms for AS

Collided Path Repanning in Dynamic Environments Using RRT and Cell Decomposition Algorithms	131
<i>Ahmad Abbadi and Vaclav Prenosil</i>	
Virtual Operator Station for Teleoperated Mobile Robots	144
<i>Tomáš Kot, Ján Babjak, and Petr Novák</i>	
A State-of-the-Art SWIL (Software in the Loop) Electronic Warfare System Simulator for Performance Prediction and Validation	154
<i>Timothy Battisti, Gerardina Faruolo, and Lorenzo Magliocchetti</i>	
Employing Observation Angles in Pose Recognition; Application for Teach-and-Repeat Robot Navigation.	165
<i>Martin Dörfler and Libor Přeučil</i>	
Multispectral Stereoscopic Robotic Head Calibration and Evaluation	173
<i>Petra Kocmanova and Ludek Zalud</i>	
Marker-Less Augmented Reality for Human Robot Interaction	185
<i>Karel Košnar, Axel Vick, Libor Přeučil, and Jörg Krüger</i>	
Comparison of Local Planning Algorithms for Mobile Robots	196
<i>Miroslav Kulich, Viktor Kozák, and Libor Přeučil</i>	
Exploration Mobile Robot for Coal Mines	209
<i>Petr Novák, Ján Babjak, Tomáš Kot, Petr Olivka, and Wojciech Moczulski</i>	
A Generic Testing Framework for Test Driven Development of Robotic Systems	216
<i>Ali Paikan, Silvio Traversaro, Francesco Nori, and Lorenzo Natale</i>	
Multi-objective Aircraft Trajectory Optimization for Weather Avoidance and Emissions Reduction	226
<i>Gabriella Serafino</i>	
Author Index	241

Modelling and Simulation for Autonomous Systems
Second International Workshop, MESAS 2015, Prague,
Czech Republic, April 29-30, 2015, Revised Selected
Papers

Hodicky, J. (Ed.)

2015, XII, 241 p. 104 illus., Softcover

ISBN: 978-3-319-22382-7
