Part I Functional Statistics

Asymptotic Results for an M-Estimator of the Regression Function for Quasi-Associated Processes	3
Said Attaoui, Ali Laksaci, and Elias Ould Saïd	
BlockShrink Wavelet Density Estimator in ϕ-Mixing Framework	29
Mohammed Badaoui and Nouredine Rhomari	
Approximation of Strictly Stationary Banach-Valued Random Sequence by Fourier Integral	51
Tawfik Benchikh	
On the Strong Consistency of the Kernel Estimator of Extreme Conditional Quantiles	59
Stéphane Girard and Sana Louhichi	
Exact Quadratic Error of the Local Linear Regression Operator Estimator for Functional Covariates	79
Amina Naceri, Ali Laksaci, and Mustapha Rachdi	
Estimation of a Loss Function for Spherically Symmetric Distribution with Constraints on the Norm	91
Idir Ouassou	

Part II Applications (Signal Analysis, Epidemiology, Queuing Theory)

Impact of Nonparametric Density Estimation on the Approximation of the $G/G/1$ Queue by the $M/G/1$ One	115
Aïcha Bareche and Djamil Aïssani	
Stochastic Analysis of an $M/G/1$ Retrial Queue with FCFS	127
Mohamed Boualem, Mouloud Cherfaoui, Natalia Djellab, and Djamil Aïssani	

Dynalets: A New Tool for Biological Signal Processing	141
Jacques Demongeot, Ali Hamie, Olivier Hansen, and Mustapha Rachdi	
Demography in Epidemics Modelling: The Copula Approach	151
Jacques Demongeot, Mohamad Ghassani, Hana Hazgui, and Mustapha Rachdi	
Index	163
