

Contents – Part I

Cloud Computing Security

Inferring the Stealthy Bridges Between Enterprise Network Islands in Cloud Using Cross-Layer Bayesian Networks	3
<i>Xiaoyan Sun, Jun Dai, Anoop Singhal, and Peng Liu</i>	
A Secure Architecture for Inter-cloud Virtual Machine Migration	24
<i>Tayyaba Zeb, Abdul Ghafoor, Awais Shibli, and Muhammad Yousaf</i>	
STRE: Privacy-Preserving Storage and Retrieval over Multiple Clouds	36
<i>Jingwei Li, Dan Lin, Anna Squicciarini, and Chunfu Jia</i>	
An Effective Search Scheme Based on Semantic Tree Over Encrypted Cloud Data Supporting Verifiability	45
<i>Zhangjie Fu, Jiangang Shu, and Xingming Sun</i>	
Policy Driven Node Selection in MapReduce	55
<i>Anna C. Squicciarini, Dan Lin, Smitha Sundareswaran, and Jingwei Li</i>	

Authentication and Identity

GridMap: Enhanced Security in Cued-Recall Graphical Passwords	75
<i>Nicolas Van Balen and Haining Wang</i>	
UAuth: A Strong Authentication Method from Personal Devices to Multi-accounts	95
<i>Yazhe Wang, Mingming Hu, and Chen Li</i>	
TPM-Based Authentication Mechanism for Apache Hadoop	105
<i>Issa Khalil, Zuochao Dou, and Abdallah Khreishah</i>	
An Authentication and Key Management Scheme for Heterogeneous Sensor Networks	123
<i>Sarmadullah Khan, Rafiullah Khan, Inam Bari, and Naveed Jan</i>	
Social Authentication Identity: An Alternate to Internet Real Name System . . .	132
<i>Chengcheng Shao, Liang Chen, Shuo Fan, and Xinwen Jiang</i>	
On the Usability of Two-Factor Authentication	141
<i>Ding Wang and Ping Wang</i>	

Network Security

Securing Resource Discovery in Content Hosting Networks	153
<i>Sushama Karumanchi, Jingwei Li, and Anna Squicciarini</i>	
Detection of Botnet Command and Control Traffic by the Identification of Untrusted Destinations	174
<i>Pieter Burghouwt, Marcel Spruit, and Henk Sips</i>	
Keep the Fakes Out: Defending Against Sybil Attack in P2P Systems	183
<i>Kan Chen, Peidong Zhu, and Yueshan Xiong</i>	

Privacy and Wireless Security

Anonymous Publish-Subscribe Systems	195
<i>Binh Vo and Steven Bellovin</i>	
Friendly Jamming for Secure Localization in Vehicular Transportation	212
<i>Bhaswati Deka, Ryan M. Gerdes, Ming Li, and Kevin Heaslip</i>	
Visual-Assisted Wormhole Attack Detection for Wireless Sensor Networks.	222
<i>Eirini Karapistoli, Panagiotis Sarigiannidis, and Anastasios A. Economides</i>	
Implementing an Affordable and Effective GSM IMSI Catcher with 3G Authentication	239
<i>Max Suravev</i>	

System and Software Security

A Simple and Novel Technique for Counteracting Exploit Kits.	259
<i>Byungho Min and Vijay Varadharajan</i>	
Policy Enforcement Point Model.	278
<i>Yosra Ben Mustapha, Hervé Debar, and Gregory Blanc</i>	
Control Flow Obfuscation Using Neural Network to Fight Concolic Testing.	287
<i>Haoyu Ma, Xinjie Ma, Weijie Liu, Zhipeng Huang, Debin Gao, and Chunfu Jia</i>	
EFS: Efficient and Fault-Scalable Byzantine Fault Tolerant Systems Against Faulty Clients	305
<i>Quanwei Cai, Jingqiang Lin, Fengjun Li, Qiongxiao Wang, and Daren Zha</i>	
SCADS: Separated Control- and Data-Stacks	323
<i>Christopher Kugler and Tilo Müller</i>	

Crypto

Improving the Security of the HMQV Protocol Using Tamper-Proof Hardware	343
<i>Qianying Zhang, Shijun Zhao, Yu Qin, and Dengguo Feng</i>	
TST: A New Randomness Test Method Based on Coupon Collector's Problem.	362
<i>Qinglong Zhang, Zongbin Liu, Quanwei Cai, and Ji Xiang</i>	
Tree-Based Multi-dimensional Range Search on Encrypted Data with Enhanced Privacy	374
<i>Boyang Wang, Yantian Hou, Ming Li, Haitao Wang, Hui Li, and Fenghua Li</i>	
Hardware Implementation of Cryptographic Hash Function Based on Spatiotemporal Chaos	395
<i>Yuling Luo, Junxiu Liu, Lvchen Cao, Jinjie Bi, and Senhui Qiu</i>	
An Information-Theoretic Approach for Secure Protocol Composition	405
<i>Yi-Ting Chiang, Tsan-Sheng Hsu, Churn-Jung Liao, Yun-Ching Liu, Chih-Hao Shen, Da-Wei Wang, and Justin Zhan</i>	

Mobile Security

Towards a Systematic Study of the Covert Channel Attacks in Smartphones. . .	427
<i>Swarup Chandra, Zhiqiang Lin, Ashish Kundu, and Latifur Khan</i>	
DroidKin: Lightweight Detection of Android Apps Similarity.	436
<i>Hugo Gonzalez, Natalia Stakhanova, and Ali A. Ghorbani</i>	
Detecting Malicious Behaviors in Repackaged Android Apps with Loosely-Coupled Payloads Filtering Scheme	454
<i>Lulu Zhang, Yongzheng Zhang, and Tianning Zang</i>	
Defending Blind DDoS Attack on SDN Based on Moving Target Defense. . .	463
<i>Duohe Ma, Zhen Xu, and Dongdai Lin</i>	
Function Escalation Attack.	481
<i>Chen Cao, Yuqing Zhang, Qixu Liu, and Kai Wang</i>	
RAMSES: Revealing Android Malware Through String Extraction and Selection	498
<i>Lautaro Dolberg, Quentin Jérôme, Jérôme François, Radu State, and Thomas Engel</i>	
Detecting Mobile Malware with TMSVM	507
<i>Xi Xiao, Xianni Xiao, Yong Jiang, and Qing Li</i>	

Posters

Research on Credible Regulation Mechanism for the Trading of Digital Works.	519
<i>Guozhen Shi, Ying Shen, Fenghua Li, Mang Su, and Dong Liu</i>	
Coordination and Concurrency Aware Likelihood Assessment of Simultaneous Attacks.	524
<i>Léa Samarji, Nora Cuppens-Boulahia, Frédéric Cuppens, Serge Papillon, Wael Kanoun, and Samuel Dubus</i>	
Domain Algorithmically Generated Botnet Detection and Analysis	530
<i>Xiaolin Xu, Yonglin Zhou, and Qingshan Li</i>	
Towards Improving Service Accessibility by Adaptive Resource Distribution Strategy	535
<i>Jinqiao Shi, Xiao Wang, Binxing Fang, Qingfeng Tan, and Li Guo</i>	
Hybrid Detection Using Permission Analysis for Android Malware	541
<i>Haofeng Jiao, Xiaohong Li, Lei Zhang, Guangquan Xu, and Zhiyong Feng</i>	
Content Security Scheme for Content Centric Networks.	546
<i>Fawad Khan, Sarmad Ullah Khan, and Inam Bari</i>	
Detection of Food Safety Topics Based on SPLDAs	551
<i>Jinshuo Liu, Yabo Li, Yingyue Peng, Juan Deng, and Xin Chen</i>	
Platform Neutral Sandbox for Analyzing Malware and Resource Hogger Apps	556
<i>Parvez Faruki, Vijay Kumar, Ammar B., M.S. Gaur, Vijay Laxmi, and Mauro Conti</i>	

Web Security

JumpBox – A Seamless Browser Proxy for Tor Pluggable Transports	563
<i>Jeroen Massar, Ian Mason, Linda Briesemeister, and Vinod Yegneswaran</i>	
Abusing Browser Address Bar for Fun and Profit - An Empirical Investigation of Add-On Cross Site Scripting Attacks.	582
<i>Yinzhi Cao, Chao Yang, Vaibhav Rastogi, Yan Chen, and Guofei Gu</i>	
Characterizing Google Hacking: A First Large-Scale Quantitative Study	602
<i>Jialong Zhang, Jayant Notani, and Guofei Gu</i>	

Detecting Malicious Sessions Through Traffic Fingerprinting Using Hidden Markov Models	623
<i>Sami Zhioua, Adnene Ben Jabeur, Mahjoub Langar, and Wael Ilahi</i>	
Author Index	633

Contents – Part II

Doctoral Symposium

A Performance Comparison Study of a Coverage-Preserving Node Scheduling Scheme and Its Enhancement in Sensor Networks	3
<i>Qun Wang, Huanyan Qian, Peiyu Ji, Yu Xie, and Shuhui Yang</i>	
An Improved Authorization Model in Trust Network.	10
<i>Xianming Gao, Xiaozhe Zhang, Baosheng Wang, and Huiting Shi</i>	
KEMF: Key Management for Federated Sensor Networks	17
<i>Piers O'Hanlon, Joss Wright, Ian Brown, and Tulio de Souza</i>	
CPS ² : A Contextual Privacy Framework for Social Software	25
<i>Rula Sayaf, Dave Clarke, and Richard Harper</i>	
Are You Really My Friend? Exactly Spatiotemporal Matching Scheme in Privacy-Aware Mobile Social Networks	33
<i>Ben Niu, Xiuguang Li, Xiaoyan Zhu, Xiaoqing Li, and Hui Li</i>	
RFID Authentication Protocol Resistant to the Man-in-the-Middle Attack. . .	41
<i>Li Zhai and ChuanKun Wu</i>	

Intrusion Detection

METIS: A Two-Tier Intrusion Detection System for Advanced Metering Infrastructures	51
<i>Vincenzo Gulisano, Magnus Almgren, and Marina Papatriantafylou</i>	
Online Detection of Concurrent Prefix Hijacks	69
<i>Shen Su, Beichuan Zhang, and Binxing Fang</i>	
Countermeasures for Mitigating ICN Routing Related DDoS Attacks	84
<i>Eslam G. AbdAllah, Mohammad Zulkernine, and Hossam S. Hassanein</i>	
A New Anomaly Detection Method Based on IGTE and IGFE.	93
<i>Ziyu Wang, Jiahai Yang, and Fuliang Li</i>	

International Workshop on Applications and Technologies in Cyber Security (ATCS)

Forensic Potentials of Solid State Drives	113
<i>Zubair Shah, Abdun Naser Mahmood, and Jill Slay</i>	

Cloud Security from Users Point of View: A Pragmatic Study with Thematic Analysis	127
<i>Saira Syed and Quazi Mamun</i>	
A Secure Real Time Data Processing Framework for Personally Controlled Electronic Health Record (PCEHR) System	141
<i>Khandakar Rabbi, Mohammed Kaosar, Md Rafiqul Islam, and Quazi Mamun</i>	
Novel Iterative Min-Max Clustering to Minimize Information Loss in Statistical Disclosure Control	157
<i>Abdun Naser Mahmood, Md Enamul Kabir, and Abdul K. Mustafa</i>	
Securing Sensor Networks by Moderating Frequencies	173
<i>Pinaki Sarkar, Priyatosh Mahish, Morshed Uddin Chowdhury, and Kouichi Sakurai</i>	
Intelligent Financial Fraud Detection Practices: An Investigation	186
<i>Jarrold West, Maumita Bhattacharya, and Rafiqul Islam</i>	
Network Traffic Pattern Analysis Using Improved Information Theoretic Co-clustering Based Collective Anomaly Detection	204
<i>Mohiuddin Ahmed and Abdun Naser Mahmood</i>	
A Survey on Mining Program-Graph Features for Malware Analysis	220
<i>Md. Saiful Islam, Md. Rafiqul Islam, A.S.M. Kayes, Chengfei Liu, and Irfan Altas</i>	
Defence Against Code Injection Attacks	237
<i>Hussein Alnabulsi, Quazi Mamun, Rafiqul Islam, and Morshed U. Chowdhury</i>	
False Data Injection Attack Targeting the LTC Transformers to Disrupt Smart Grid Operation	252
<i>Adnan Anwar, Abdun Naser Mahmood, and Mohiuddin Ahmed</i>	
A Domain-Based Multi-cluster SIP Solution for Mobile Ad Hoc Network . . .	267
<i>Ala‘ Aburumman and Kim-Kwang Raymond Choo</i>	
DAPRO 2014 and SSS 2014 International Workshop on Data Protection in Mobile and Pervasive Computing (DAPRO) International Workshop on Secure Smart Systems (SSS)	
virtio-ct: A Secure Cryptographic Token Service in Hypervisors	285
<i>Le Guan, Fengjun Li, Jiwu Jing, Jing Wang, and Ziqiang Ma</i>	
Blind Format String Attacks	301
<i>Fatih Kilic, Thomas Kittel, and Claudia Eckert</i>	

An Empirical Evaluation of Software Obfuscation Techniques Applied to Android APKs	315
<i>Felix C. Freiling, Mykola Protsenko, and Yan Zhuang</i>	
Towards Privacy-Preserving Web Metering via User-Centric Hardware	329
<i>Fahad Alarifi and Maribel Fernández</i>	
Towards Efficient Update of Access Control Policy for Cryptographic Cloud Storage.	341
<i>Weiyu Jiang, Zhan Wang, Limin Liu, and Neng Gao</i>	
International Workshop on System Level Security of Smartphones	
Uncovering the Dilemmas on Antivirus Software Design in Modern Mobile Platforms	359
<i>Heqing Huang, Kai Chen, Peng Liu, Sencun Zhu, and Dinghao Wu</i>	
Transplantation Attack: Analysis and Prediction	367
<i>Zhongwen Zhang, Ji Xiang, Lei Wang, and Lingguang Lei</i>	
Timing-Based Clone Detection on Android Markets	375
<i>Yingjun Zhang, Kezhen Huang, Yuling Liu, Kai Chen, Liang Huang, and Yifeng Lian</i>	
A New Trust Chain Security Evaluation Model and Tool.	382
<i>Wei Hu, Dongyao Ji, Ting Wang, and Gang Yao</i>	
A System for Privacy Information Analysis and Safety Assessment of iOS Applications.	392
<i>Bin Li and Zhijie Feng</i>	
How We Found These Vulnerabilities in Android Applications.	399
<i>Bin Ma</i>	
Author Index	407

International Conference on Security and Privacy in
Communication Networks

10th International ICST Conference, SecureComm 2014,
Beijing, China, September 24-26, 2014, Revised
Selected Papers, Part I

Tian, J.; Jing, J.; Srivatsa, M. (Eds.)

2015, XIX, 635 p. 193 illus. in color., Softcover

ISBN: 978-3-319-23828-9
