

# Contents

<b>1 Knowledge Management for Facility Management (FM) Services: a Rising Demand Within a Growing Market.</b>	1
1.1 Developments in the FM Field	2
1.2 Information for Planning, Managing and Assessing FM Processes	8
1.3 Key Performance Indicators and Service Level Agreement: Information to Request and Control the Quality of the Services	14
References	27
<b>2 Inventory for the FM: Collection and Management of Information During the Life Cycle of a Building</b>	31
2.1 Contents and Role of the Inventory	31
2.2 Information Categories	36
2.3 Sheets and Procedures for the Inventory	39
2.4 Phases and Operators in the Inventory Process	42
References	43
<b>3 The Building Registry</b>	45
3.1 Role, Basic Logic and Purpose of a Registry System	46
3.2 The Registry System	48
3.3 The Building Registry and the Documents Review	50
3.4 Developing the Building Registry: Classification and Coding Criteria	64
3.5 The System of Data Sheets	88
3.6 The Registry and the Information System	98
3.7 The Role of the Building Registry from the Design Phase	100
References	101
<b>4 Information Systems for the Information Management</b>	105
4.1 The Diffusion of Information Systems	105
4.2 Information System as a Decisional and Operational Support	108

4.3	The Core of the Information System: the Database . . . . .	113
4.4	Key Functions of the Information Systems . . . . .	117
4.5	Information Systems and Maintenance Management Process. . . . .	121
4.6	Information Systems Within Management Services . . . . .	128
	References . . . . .	131
<b>5</b>	<b>The Command Centre . . . . .</b>	<b>133</b>
5.1	The Control of the Integrated Services. . . . .	133
5.2	Key Functions and Role of the Command Centre . . . . .	135
5.3	Models of Command Centre. . . . .	140
	References . . . . .	146
<b>6</b>	<b>Building Information Modeling (BIM) and Facility Management (FM). . . . .</b>	<b>149</b>
6.1	Need for an Information Lifecycle Management . . . . .	149
6.2	BIM Definition(s) and Methodology . . . . .	152
6.3	BIM-based Knowledge and Process Management . . . . .	155
6.4	Standardized Content and Organization Requirements Along a BIM Process: LoDs (Levels of Development) . . . . .	157
6.5	Information Requirements for the Building Operational Phase: the COBie Standard. . . . .	160
6.6	Information Management for the Building Operational Phase: PAS 1192-3:2014 . . . . .	163
6.7	BIM-Objects Information Requirements and Data Standards. . . . .	166
6.7.1	NBS BIM Object Standard. . . . .	170
6.7.2	SPie: Specifiers' Properties Information Exchange. . . . .	172
6.7.3	PDTs: Product Data Template(s). . . . .	173
6.7.4	INNOVance: the Italian BIM Database . . . . .	174
	References . . . . .	176
<b>7</b>	<b>Methodological Experimentation: Proposal of a Datasheet Template for FM Activities in the BIM Environment . . . . .</b>	<b>179</b>
7.1	Need for an Implementation of Existing Data Standards in Relation to Information Needs of FM Processes . . . . .	179
7.2	Critical Review of the Reference Scenario. Analysis of Existing Data Standards . . . . .	182
7.3	Adoption of a Maintenance Plan Prototype as an Information Source for Developing a FM-Based Datasheet Template . . . . .	185
7.4	BIM Software and Information Systems. Existing Overlay and Possible Implementation . . . . .	191
	References . . . . .	196
<b>8</b>	<b>Conclusions. . . . .</b>	<b>199</b>
	<b>Glossary . . . . .</b>	<b>203</b>
