Part I Papers by Invited Speakers

1	The Beverton–Holt q-Difference Equation with Periodic Growth Rate	3
	Martin Bohner and Sabrina H. Streipert	
1.1	The Beverton–Holt Difference Equation	3
1.2	Some Quantum Calculus Essentials	5
1.3	The Beverton–Holt q -Equation with Periodic Coefficients	7
	References	14
2	Spectral Measures on Local Fields	15
	Aihua Fan	
2.1	Introduction	15
2.2	Preliminaries	19
2.3	Criterion of Spectral Measure	24
2.4	Perturbation of Bessel Sequences	26
2.5	Landau Operators and Beurling Density	27
	References	35
3	Pullback and Forward Attractors of Nonautonomous Difference Equations	37
	Peter Kloeden and Thomas Lorenz	
3.1	Introduction	37
3.2	Nonautonomous Difference Equations	38
3.3	Invariant Sets and Attractors of Processes	39
3.4	An Example	41
3.5	Forward and Pullback Attractors	41
3.6	Limitations of Pullback Attractors	42
3.7	Construction of Nonautonomous Forward Attractors	45

3.8	Conditions Ensuring Forward Convergence	46
3.9	Final Remarks	47
	References.	48
4	Necessary and Sufficient Conditions for Hyperbolicity	49
	Kenneth J. Palmer	
4.1	Introduction	49
4.2	Statement of Theorem	50
4.3	Proof of Theorem 4.1	53
4.4	Anosov Diffeomorphisms and Structural Stability	59
4.5	Necessary and Sufficient Condition for Exponential Dichotomy for $\dot{X} = A(t)x$	61
	References.	62
 Part II Contributed Papers		
5	On Hausdorff Dimension of Invariant Sets for a Class of Piecewise Linear Maps	67
	Yiming Ding, Hui Hu and Yueli Yu	
5.1	Introduction	67
5.2	Invariant Sets with Positive Hausdorff Dimensions	71
5.3	Proof of Theorem 5.1	75
	References.	81
6	Generalized Zeros and Nonpositivity of Energy Functionals Associated with Half-Linear Even-Order Difference Equations . . .	83
	Ondřej Došlý	
6.1	Introduction	83
6.2	Hamiltonian Type Difference Systems	85
6.3	Remarks and Open Problems	92
	References.	93
7	Eigenvalue Comparison for Discrete Symplectic Systems	95
	Roman Šimon Hilscher	
7.1	Introduction	95
7.2	Discrete Symplectic Systems	97
7.3	Comparison of Finite Eigenvalues.	99
	References.	106
8	Cookie-Cutter-Like Dynamic System of Unbounded Expansion. . .	109
	Qing-Hui Liu	
8.1	Introduction	109
8.2	Cookie-Cutter-Like Dynamic System of Bounded Expansion	111

8.3	Connection Between Spectrum Problem and Cookie-Cutter-Like Dynamic System.	113
8.4	Cookie-Cutter-Like Dynamic System of Unbounded Expansion	114
	References.	117
9	A Discrete Dynamic Model for Computer Worm Propagation . . .	119
	Wanping Liu, Chao Liu and Xiaoyang Liu	
9.1	Introduction	119
9.2	Model Description	121
9.3	Model Analysis	123
9.4	Numerical Simulations.	125
9.5	Conclusions	130
	References.	130
10	Almost Periodic Solutions of Neutral Functional Dynamic Systems in the Sense of Stepanov.	133
	Qi-Ru Wang and Zhi-Qiang Zhu	
10.1	Introduction	133
10.2	Preliminaries	135
10.3	Main Results	139
10.4	Applications.	142
	References.	143
11	On a Linear Delay Partial Difference Equation with Impulses . . .	145
	Gengping Wei	
11.1	Introduction	145
11.2	Main Results	146
	References.	152
12	Nonstationarity of Stock Returns.	153
	Kekun Wu	
12.1	Introduction	153
12.2	The Nonstationary Measure	154
12.3	Nonstationarity of Stock Returns.	156
12.4	Conclusion.	164
	References.	164
13	Pricing Convertible Bonds with Credit Risks and Stochastic Interest Rates.	167
	Rong Xu	
13.1	Introduction	167
13.2	Realistic Compound Option Model	170
13.3	Numerical Method	175

13.4 Conclusion.	179
References.	179
14 Dynamical Systems Disjoint from Any Minimal System Under Group Actions	181
Tao Yu	
14.1 Introduction	181
14.2 Preliminaries	182
14.3 Main Theorem	185
14.4 Characterization of Systems in \mathcal{M}^\perp	193
References.	195

Difference Equations, Discrete Dynamical Systems and
Applications

ICDEA, Wuhan, China, July 21-25, 2014

Bohner, M.; Ding, Y.; Došlý, O. (Eds.)

2015, XVI, 195 p. 20 illus., 7 illus. in color., Hardcover

ISBN: 978-3-319-24745-8
