Full Papers

A Game-Theoretic Approach to IP Address Randomization in Decoy-Based Cyber Defense	3
<i>Andrew Clark, Kun Sun, Linda Bushnell, and Radha Poovendran</i>	
Attack-Aware Cyber Insurance for Risk Sharing in Computer Networks	22
<i>Yezekael Hayel and Quanyan Zhu</i>	
Beware the Soothsayer: From Attack Prediction Accuracy to Predictive Reliability in Security Games	35
<i>Benjamin Ford, Thanh Nguyen, Milind Tambe, Nicole Sintov, and Francesco Delle Fave</i>	
Games of Timing for Security in Dynamic Environments.	57
<i>Benjamin Johnson, Aron Laszka, and Jens Grossklags</i>	
Threshold FlipThem: When the Winner Does Not Need to Take All	74
<i>David Leslie, Chris Sherfield, and Nigel P. Smart</i>	
A Game Theoretic Model for Defending Against Stealthy Attacks with Limited Resources	93
<i>Ming Zhang, Zizhan Zheng, and Ness B. Shroff</i>	
Passivity-Based Distributed Strategies for Stochastic Stackelberg Security Games	113
<i>Phillip Lee, Andrew Clark, Basel Alomair, Linda Bushnell, and Radha Poovendran</i>	
Combining Online Learning and Equilibrium Computation in Security Games	130
<i>Richard Klíma, Viliam Lisý, and Christopher Kiekintveld</i>	
Interdependent Security Games Under Behavioral Probability Weighting	150
<i>Ashish R. Hota and Shreyas Sundaram</i>	
Making the Most of Our Regrets: Regret-Based Solutions to Handle Payoff Uncertainty and Elicitation in Green Security Games	170
<i>Thanh H. Nguyen, Francesco M. Delle Fave, Debarun Kar, Aravind S. Lakshminarayanan, Amulya Yadav, Milind Tambe, Noa Agmon, Andrew J. Plumptre, Margaret Driciru, Fred Wanyama, and Aggrey Rwetsiba</i>	

A Security Game Model for Environment Protection in the Presence of an Alarm System	192
<i>Nicola Basilico, Giuseppe De Nittis, and Nicola Gatti</i>	
Determining a Discrete Set of Site-Constrained Privacy Options for Users in Social Networks Through Stackelberg Games	208
<i>Sarah Rajtmajer, Christopher Griffin, and Anna Squicciarini</i>	
Approximate Solutions for Attack Graph Games with Imperfect Information	228
<i>Karel Durkota, Viliam Lisý, Branislav Bošanský, and Christopher Kiekintveld</i>	
When the Winning Move is Not to Play: Games of Deterrence in Cyber Security	250
<i>Chad Heitzenrater, Greg Taylor, and Andrew Simpson</i>	
Sequentially Composable Rational Proofs.	270
<i>Matteo Campanelli and Rosario Gennaro</i>	
Flip the Cloud: Cyber-Physical Signaling Games in the Presence of Advanced Persistent Threats	289
<i>Jeffrey Pawlick, Sadegh Farhang, and Quanyan Zhu</i>	
Short Papers	
Genetic Approximations for the Failure-Free Security Games	311
<i>Aleksandr Lenin, Jan Willemson, and Anton Charnamord</i>	
To Trust or Not: A Security Signaling Game Between Service Provider and Client	322
<i>Monireh Mohebbi Moghaddam, Mohammad Hossein Manshaei, and Quanyan Zhu</i>	
Game Theory and Security: Recent History and Future Directions.	334
<i>Jonathan S.A. Merlevede and Tom Holvoet</i>	
Uncertainty in Games: Using Probability-Distributions as Payoffs	346
<i>Stefan Rass, Sandra König, and Stefan Schauer</i>	
Incentive Schemes for Privacy-Sensitive Consumers	358
<i>Chong Huang, Lalitha Sankar, and Anand D. Sarwate</i>	
Author Index	371

Decision and Game Theory for Security

6th International Conference, GameSec 2015, London,

UK, November 4-5, 2015, Proceedings

Khouzani, M.; Panaousis, E.; Theodorakopoulos, G.

(Eds.)

2015, X, 371 p. 90 illus. in color., Softcover

ISBN: 978-3-319-25593-4
