

Contents

1	Normal Stem Cell: Entity or State?	1
	Organogenesis from Adult Stem Cells and Problems	
	with Different Tissues	4
	Therapeutic Implications for TCSCs as a New Concept	5
	The Concept of VSEL	7
	The Concept of Mesenchymal Stem Cell (with Dental Pulp	
	Cells as an Example)	9
	Mobilization as a New Noninvasive Therapeutic Concept	12
	Emphasizing Bioengineering Aspects to Stem Cell Engineering	13
	Directions and Relevant Studies: We and Others	13
	What Is “Stemness?”	13
	Breakthrough: Induced Pluripotent Stem Cells	16
	Reprogramming as a Therapeutic Event	17
	References	19
2	Normal Stem Cells: Biology, Collection/Harvesting,	
	and Ex Vivo Manipulations	25
	Introduction	25
	Bone Marrow Derived Stem Cell Collection	28
	Peripheral Blood Derived Stem Cell Harvesting/Purification	30
	Umbilical Cord Blood Derived Stem Cell Usage	35
	Long-Term Storage of Stem Cells by Cryopreservation	36
	References	39
3	A Concept of Cancer Stem Cells: Entity and Theories	43
	Introduction	43
	What Are Cancer Stem Cells?	43
	Isolation and Characterization of Stem Cells	46
	Novel Treatment Modalities	50
	Conclusions	53
	References	54

4	Cancer Stem Cell Markers: Classification and Their Significance in Cancer Stem Cells	57
	Introduction.....	57
	Background and Significance	58
	Cancer Stem Cell Markers: Classification	60
	Are Cancer Cells Transformed Normal Stem Cells?	60
	Cancer Stem Cell Markers and Their Function in Normal and Cancer Stem Cells	62
	Conclusions.....	62
	References.....	68
5	Genetic Mechanisms Involved in Cancer Stem Cell Emergence	71
	References.....	72
6	Epigenetic Mechanisms Involved in Cancer Stem Cell Profiles	73
	Introduction.....	73
	Background and Significance	75
	Genetic and Epigenetic Phenomenon in Cancer Development	76
	Cancer Stem Cell Concept.....	77
	Cancer Stem Cell Models: Theories and Possible Explanations	78
	Cancer Stem Cell Markers: Conceptual Features	79
	Significance of Computational Approaches for Cancer Prediction: Identifying Methylation Profiles in Cancer Stem Cells.....	80
	Conclusions.....	84
	References.....	84
7	Mitochondrial Respiration of Cancer Stem Cell.....	89
	Introduction.....	89
	The Role of Mitochondria in Energy Metabolism: Oxidative Phosphorylation and Uncoupling Effect, Apoptosis, Calcium, and ROS Balancing	89
	The Change in Lipid Content on the Inner Mitochondrial Membrane and Uncoupling Effect of Mitochondria in the Cancer Cells	91
	Therapeutic Approaches: Targeting Mitochondria in Cancer Stem Cells.....	91
	Conclusions.....	92
	References.....	94
8	Metabolism in Cancer Stem Cell.....	97
	References.....	101
9	Different Approaches for Anticancer/Antitumor Therapy.....	103
	Introduction.....	103
	Cancer-Targeted Therapy.....	103
	Antibody-Targeted Therapy	104
	Small Molecules-Targeted Therapy	104

Ligand-Targeted Therapy	106
Kinase Inhibitors Targeting Multiple Signaling Pathways	107
Attacking Multiple Targets	108
Agents Targeting Serine/Threonine Kinases.....	109
Heat Shock Protein Targets	110
Cancer Stem Cells Therapy: Concept and Novelties	111
Possibilities of Engineering Targeted Cancer SC Therapy	
Using Principles of Magnetism.....	112
Cancer Therapy Outlook.....	116
Chemoresistance, Radioresistance, and Reactive Oxygen	
Species as Targets	116
Conclusions.....	118
References.....	118
10 Targeted Cancer Stem Cell Therapy.....	123
General: Remote Control of Targeted Drug Delivery	
as Possibility for Cancer Stem Cell Therapy	123
Nanotechnology/Nanoparticles.....	124
Biomagnetism/Magnetic Particles	126
Immunotherapy (Rational Vaccine Design) for CSCs	126
Epigenetic Synthetic Lethal Therapeutic Approaches	
to ARID1A Mutated Cancers.....	126
Genetic Engineering-Based Therapy: Engineered Normal	
(Toxic) Stem Cells as a Therapeutic Tool for Cancer	127
Conclusions.....	128
References.....	128
11 Bioengineered CSC Tumors.....	133
Introduction.....	133
First Tumor Models Based on CSCs.....	134
3-D Printing as “Universal” Bioengineering Method	134
3-D Printed Tumor Models: State of the Art	135
References.....	137
12 Summary on the Role of Bioengineering in Cancer	
Stem Cell Paradigm	139
Stem Cell Paradigm: Resume	139
Self-Renewal of Stem Cells	141
The Role of Bioengineering in Understanding	
CSCs Paradigm: Resume	142
The Concept of Targeted CSC Therapy: Resume	142
References.....	143

Bioengineering and Cancer Stem Cell Concept

Pavlovic, M.; Balint, B.

2015, XIII, 144 p. 54 illus., 2 illus. in color., Softcover

ISBN: 978-3-319-25668-9
