

Contents

1	Introduction	1
1.1	Molecular Chaperones and the Special Subgroup of Chaperonins	1
1.2	Protein Folding and Protein Quality Control	2
2	Historical Sketch of the Discovery and Recognition of the Function of Chaperonins	5
3	Molecular Structure of Chaperonins	9
3.1	Structure of Type I Chaperonins	9
3.2	Type II Chaperonins: The Archaeon Thermosome and the Eukaryotic TRiC Chaperonin	11
4	Folding by Enclosure in the Chaperonin Cavity	13
4.1	In Vitro Studies of Bacterial GroEL/GroES	13
5	Evolutionary Origins and Family Relations	17
5.1	A Chaperonin Ancestor	17
5.2	Evolutionary Relationships Between Type I, II, and III Chaperonins	17
5.3	High Sequence Similarity Between Representatives of the Large Type I Chaperonin Subunit	19
5.3.1	Co-chaperonin Diversity	20
5.4	Type II Chaperonins	22
6	Chaperoning Mechanisms: Folding Helpers, Folding Protectors, or Misfolding Blockers?	23
6.1	Which Proteins Use and Which Proteins Need Chaperonin Assistance for Folding?	24
6.1.1	Theoretical Considerations	26
6.1.2	Experimental Assessment of Proteins Interacting with the GroEL/GroES Complex	27

6.1.3	Do Specific Fold Types Have Increased Chaperonin Requirements?	29
6.1.4	Size Limits of Client Proteins	30
7	Sequence Variations in Proteins Affecting Chaperonin Dependence	31
7.1	Chaperonins as Capacitors of Protein Evolution	32
7.2	Disease-Associated Protein Variants	34
7.3	Studies of the Yeast Hsp60/Hsp10 System	37
7.4	Substrates of Type II Chaperonins	38
7.4.1	The Interactome of the Archaea Thermosome	38
7.4.2	The Interactome of the Mammalian TRiC	38
7.5	What Determines the Dependence of Proteins for Chaperonins?	39
8	Genetic Organization of Type I Chaperonin Genes	41
9	Regulation of Type I Chaperonin Gene Expression	45
9.1	Bacterial GroEL/GroES Expression	45
9.2	Regulation of Expression of the Mammalian Type I Chaperonin Genes	45
9.3	Hsp60 and Hsp10 Dysregulation in Cancer Cells	48
10	Subcellular Localization	51
11	Posttranslational Modifications	53
12	Variations in Hsp60 and Hsp10 in Humans	55
13	Type I Chaperonins Are Essential for Cell Viability	57
14	Human Diseases Caused by Genetic Mutations in the Hsp60/Hsp10 System	59
14.1	Unconfirmed Hsp60 Deficiency-Related Diseases	59
14.2	Hereditary Spastic Paraplegia SPG13	59
14.2.1	Clinical Phenotype	61
14.3	MitCHAP60 Disease	62
15	Molecular Investigations of Disease Mechanisms	65
15.1	Cultured Patient Cells	67
15.2	Mouse Model for Hereditary Spastic Paraplegia SPG13	68
15.2.1	Hspd1(+/-) Mice Display Morphological Changes in the Corticospinal Tract	69
15.2.2	Hspd1(+/-) Mice Display Mitochondrial Respiratory Chain Deficiency	70

15.2.3	Hspd1(+/-) Mice Display Increased Protein Carbonylation and That Is at Least in Part Due to Defective Folding of the MN-Dependent Superoxide Dismutase SOD2.....	71
16	Outlook.....	73
	Bibliography.....	75

The Hsp60 Chaperonin

Bross, P.

2015, XV, 85 p. 19 illus., 4 illus. in color., Softcover

ISBN: 978-3-319-26086-0
