

Contents

1	Introduction	1
1.1	Background	1
1.2	From Realized to Expected Fixed Income Volatility	4
1.3	The Right <i>Numéraire</i> and Volatility Pricing	8
1.3.1	Market Risk and Model-Free Pricing	9
1.3.2	Getting the Right Volatility with the Right Model	11
1.4	Scope and Plan of the Book	16
2	Variance Contracts: Fixed Income Security Design	19
2.1	Introduction	19
2.2	Market Numéraires and Volatilities	21
2.3	Interest Rate Variance Swaps	22
2.3.1	Contracts and Model-Free Pricing	22
2.3.2	Log Versus Quadratic Contracts	26
2.3.3	Hedging	28
2.3.4	Constant Gamma Exposure	30
2.4	Implied Volatility Indexes	31
2.4.1	Model-Free Indexes	31
2.4.2	Comparisons to Model-Based Log-Normal and Normal Implied Volatility	32
2.4.3	Index Decompositions	34
2.5	Implementing Basis Point Variance Swaps	35
2.5.1	Incremental Versus Point-to-Point Realized Variance	35
2.5.2	Volatility Risk Premiums	38
2.6	Skew Shifts and the Dynamics of Volatility Indexes	40
2.6.1	Truncations	41
2.6.2	Numerical Experiments and Interpretation of Actual Index Behavior	43
2.7	Jumps	47
	Appendix A Appendix on Security Design and Volatility Indexing	49
A.1	Proof of Proposition 2.2	49

A.2	A Stochastic Multiplier Beyond the Market NumÉraire	51
A.3	Vega and Gamma in Gaussian Markets	51
A.4	Proof of Proposition 2.3	54
A.5	Approximating Indexes	55
A.6	Jumps	57
3	Interest Rate Swaps	59
3.1	Introduction	59
3.2	Risks Regarding Interest Rate Swaps	61
3.2.1	The Annuity Factor	61
3.2.2	Option-Based Volatility Trading	63
3.3	Interest Rate Swap Variance Contracts	66
3.3.1	Risks and Spanning Derivatives	67
3.3.2	Contract Designs	68
3.3.3	Pricing	70
3.3.4	Marking to Market	71
3.3.5	Hedging	72
3.3.6	Links to Constant Maturity Swaps	76
3.3.7	Physical Swap Settlement and Variance Contracts	76
3.3.8	Multiple Curves	77
3.4	Trading Strategies	78
3.4.1	Spot Trading Through IRV Swaps	78
3.4.2	Spot Trading Through Standardized IRV Swaps	81
3.4.3	Forward Trading	82
3.5	Interest Rate Swap Volatility Indexes	83
3.5.1	Basis Point Volatility Index	83
3.5.2	Percentage Volatility Index	84
3.5.3	Experiments	84
3.5.4	Jumps	87
3.6	Swap Versus Equity Variance Contracts and Indexes	87
3.7	Index Implementation	89
3.7.1	A Numerical Example	90
3.7.2	Historical Performance	93
Appendix B	Appendix on Interest Rate Swap Markets	97
B.1	P&L of Option-Based Volatility Trading	97
B.2	Spanning IRS Variance Contracts	103
B.3	Hedging	107
B.4	Constant Maturity Swaps	111
B.5	The Contract and Index in the Vasicek Market	113
4	Government Bonds and Time-Deposits	125
4.1	Introduction	125
4.2	Government Bonds	129
4.2.1	Pricing Spot Volatility	129
4.2.2	Basis Assets	134
4.2.3	Percentage <i>Price</i> Volatility	136

4.2.4	Basis Point <i>Price</i> Volatility	138
4.2.5	Marking to Market	139
4.2.6	Replication	139
4.2.7	Forward Price Adjustments	141
4.2.8	Model-Free Measures of Basis Point <i>Yield</i> Volatility . . .	142
4.2.9	Certainty Equivalent Bond Prices as Expectations of Forward Prices	145
4.2.10	Early Exercise and Futures Corrections	148
4.2.11	Implementation Example	153
4.2.12	Jumps	157
4.3	Time Deposits	157
4.3.1	The Underlying Risks	157
4.3.2	Variance Contracts and Volatility Indexes	158
4.3.3	Yield Volatility	160
4.3.4	American Future Corrections	161
4.3.5	Implementation Example	165
4.3.6	LIBOR Variance Contracts and Volatility Indexes	168
4.4	Maturity Mismatch	170
4.4.1	Government Bonds	170
4.4.2	Time Deposits	176
4.4.3	Alternative Characterizations of Variance Contracts and Indexes	182
4.4.4	Tilting the Variance Payoff	184
4.5	Index Design with Heterogeneous Market Data	185
4.5.1	Sandwich Combinations	186
4.5.2	Rolling Indexes	188
Appendix C	Appendix on Government Bonds and Time Deposit Markets	189
C.1	The Equity VIX with Stochastic Interest Rates	189
C.2	Naïve Model-Free Methodology and Bias in Vasicek's Market	191
C.3	Marking to Market	193
C.4	Replication of Variance Swaps	193
C.5	Estimates Based on Forward Price Approximations . . .	195
C.6	Certainty Equivalence, and Existence of Basis Point Yield Volatility	197
C.7	Illustrations with a Stochastic Volatility Model	199
C.8	The Future Price in Vasicek's Model	202
C.9	Future and Forward LIBOR Options in Vasicek's Model .	202
C.10	The Impact of Early Exercise Premiums and Maturity Mismatch	206
5	Credit	211
5.1	Introduction	211
5.2	Existing Credit Trading Practices	213

5.2.1	Assumptions	214
5.2.2	CDS Indexes	214
5.2.3	CDS Index Options	215
5.3	Credit Variance Contracts	218
5.3.1	Percentage	218
5.3.2	Basis Point	220
5.3.3	Marking to Market	221
5.4	Credit Volatility Indexes	225
5.4.1	Definitions	225
5.4.2	Forward Premium Adjustments	226
5.4.3	Differences with Respect to Other Fixed Income Volatility Gauges	226
5.4.4	Implementation Example	227
5.4.5	Index Design Through Option Cycles	230
5.5	Post “Big-Bang” Conventions and Index Adjustments	230
5.5.1	Index Values Under Constant Hazard Rates	231
5.5.2	Forward Positions	232
5.5.3	Option Payoffs and Evaluation	233
5.5.4	Index Corrections	236
Appendix D	Appendix on Credit Markets	237
D.1	Preliminary Facts Concerning CDS Indexes	237
D.2	Spanning Credit Variance Contracts	238
D.3	Hedging	242
References	247

The Price of Fixed Income Market Volatility

Mele, A.; Obayashi, Y.

2015, XI, 250 p. 52 illus., 45 illus. in color., Hardcover

ISBN: 978-3-319-26522-3
