

# Contents

## Data Security

|   |     |
|---|-----|
| VH: A Lightweight Block Cipher Based on Dual Pseudo-random Transformation . . . . .   | 3   |
| <i>Xuejun Dai, Yuhua Huang, Lu Chen, Tingting Lu, and Fei Su</i>  |     |
| Security Against Hardware Trojan Attacks Through a Novel Chaos FSM and Delay Chains Array PUF Based Design Obfuscation Scheme . . . . . | 14  |
| <i>Mingfu Xue, Jian Wang, Youdong Wang, and Aiqun Hu</i>  |     |
| Secure and Efficient Protocol for Outsourcing Large-Scale Systems of Linear Equations to the Cloud . . . . .                            | 25  |
| <i>Cheng Qian and Jian Wang</i>   |     |
| A Provably Secure Ciphertext-Policy Hierarchical Attribute-Based Encryption . . . . .   | 38  |
| <i>Ziying Wang and Jian Wang</i>  |     |
| Privacy-Preserving Multidimensional Range Query on Real-Time Data . . . . .   | 49  |
| <i>Zhong Ting, Han Xiao, Yang Yunshuo, and Zhu Aixiang</i>  |     |
| ARM-Based Privacy Preserving for Medical Data Publishing . . . . .  | 62  |
| <i>Zhang Fengli and Bai Yijing</i>  |     |
| Attribute-Based Encryption Without Key Escrow . . . . .   | 74  |
| <i>Xing Zhang, Cancan Jin, Zilong Wen, Qingni Shen, Yuejian Fang, and Zhonghai Wu</i>   |     |
| An Efficient Access Control Optimizing Technique Based on Local Agency in Cryptographic Cloud Storage . . . . .                         | 88  |
| <i>Shidong Zhu, Liu Jiang, and Zhenliu Zhou</i>   |     |
| Complete Separable Reversible Data Hiding in Encrypted Image . . . . .  | 101 |
| <i>Yin Zhaoxia, Wang Huabin, Zhao Haifeng, Luo Bin, and Zhang Xinpeng</i>   |     |
| Multi-threshold Image Segmentation Through an Improved Quantum-Behaved Particle Swarm Optimization Algorithm . . . . .                  | 111 |
| <i>Wang Jiali, Liu Hongshen, and Ruan Yue</i>   |     |
| Coverless Image Steganography Without Embedding. . . . .  | 123 |
| <i>Zhili Zhou, Huiyu Sun, Rohan Harit, Xianyi Chen, and Xingming Sun</i>  |     |

|   |     |
|---|-----|
| Coverless Information Hiding Method Based on the Chinese<br>Mathematical Expression . . . . . | 133 |
| <i>Xianyi Chen, Huiyu Sun, Yoshito Tobe, Zhili Zhou, and Xingming Sun</i>                     |     |

**System Security**

|  |     |
|--|-----|
| Network Information Security Challenges and Relevant Strategic Thinking<br>as Highlighted by “PRISM” . . . . . | 147 |
| <i>Jing Li</i>   |     |

|  |     |
|--|-----|
| A Lightweight and Dependable Trust Model for Clustered Wireless<br>Sensor Networks . . . . . | 157 |
| <i>Nannan Shao, Zhiping Zhou, and Ziwen Sun</i>  |     |

|   |     |
|---|-----|
| The Optimization Model of Trust for White-Washing . . . . . | 169 |
| <i>Zhidan Wang, Jian Wang, and Yanfei Zhao</i>              |     |

|  |     |
|--|-----|
| Malware Clustering Based on SNN Density Using System Calls . . . . . | 181 |
| <i>Wang Shuwei, Wang Baosheng, Yong Tang, and Yu Bo</i>              |     |

|   |     |
|---|-----|
| Analyzing Eventual Leader Election Protocols for Dynamic Systems<br>by Probabilistic Model Checking . . . . . | 192 |
| <i>Jiayi Gu, Yu Zhou, Weigang Wu, and Taolue Chen</i>   |     |

|  |     |
|--|-----|
| A Dynamic Resource Allocation Model for Guaranteeing Quality<br>of Service in Software Defined Networking Based Cloud Computing<br>Environment . . . . . | 206 |
| <i>Chenhui Xu, Bing Chen, Ping Fu, and Hongyan Qian</i>  |     |

|  |     |
|--|-----|
| Research and Development of Trust Mechanism in Cloud Computing . . . . . | 218 |
| <i>Jun Xu, Feng Xu, Wenna Chang, and Haiguang Lai</i>                    |     |

|  |     |
|--|-----|
| Analysis of Advanced Cyber Attacks with Quantified ESM . . . . . | 230 |
| <i>Blaž Ivanc and Tomaž Klobučar</i>                             |     |

|  |     |
|--|-----|
| A Web Security Testing Method Based on Web Application Structure . . . . . | 244 |
| <i>Xueyong Yu and Guohua Jiang</i>   |     |

|  |     |
|--|-----|
| An Improved Data Cleaning Algorithm Based on SNM . . . . . | 259 |
| <i>Miao Li, Qiang Xie, and Qiulin Ding</i>                 |     |

|   |     |
|---|-----|
| Enhancing Security of IaaS Cloud with Fraternal Security Cooperation<br>Between Cloud Platform and Virtual Platform . . . . . | 270 |
| <i>Jie Yang, Zhiqiang Zhu, Lei Sun, Jingci Zhang, and Xianwei Zhu</i>   |     |

**Cloud Platform**

|  |     |
|--|-----|
| Cluster Analysis by Variance Ratio Criterion and Quantum-Behaved PSO . . .   | 285 |
| <i>Shuihua Wang, Xingxing Zhou, Guangshuai Zhang, Genlin Ji, Jiquan Yang, Zheng Zhang, Zeyuan Lu, and Yudong Zhang</i> |     |
| Failure Modes and Effects Analysis Using Multi-factors Comprehensive Weighted Fuzzy TOPSIS . . . . .                   | 294 |
| <i>Wenjun Zhang and Fenglin Zhang</i>  |     |
| Efficient Query Algorithm of Coallocation-Parallel-Hash-Join in the Cloud Data Center . . . . .                        | 306 |
| <i>Yao Shen, Ping Lu, Xiaolin Qin, Yuming Qian, and Sheng Wang</i>   |     |
| Dynamic Data Driven Particle Filter for Agent-Based Traffic State Estimation . . . . .                                 | 321 |
| <i>Xiang-wen Feng, Xue-feng Yan, and Xiao-lin Hu</i>   |     |
| An Improved Dynamic Spectrum Access Scheme in Cognitive Networks. . . .  | 332 |
| <i>Qingwei Du and Yimmeng Wang</i>   |     |
| The Design and Implementation of a Dynamic Verification System of Z . . . .  | 344 |
| <i>Jun Wang, Yi Zhuang, and Siru Ni</i>  |     |
| Maximizing Positive Influence in Signed Social Networks . . . . .  | 356 |
| <i>Huanhuan Wang, Qun Yang, Lei Fang, and Weihua Lei</i>   |     |
| OpenFlow-Based Load Balancing for Wireless Mesh Network . . . . .  | 368 |
| <i>Hanjie Yang, Bing Chen, and Ping Fu</i>   |     |
| SPEMS: A Stealthy and Practical Execution Monitoring System Based on VMI . . . . .                                     | 380 |
| <i>Jiangyong Shi, Yuexiang Yang, Chengye Li, and Xiaolei Wang</i>  |     |
| A Total Power Control Cooperative MAC Protocol for Wireless Sensor Networks . . . . .                                  | 390 |
| <i>Xiongli Rui, Xuehong Cao, and Jie Yang</i>  |     |
| Parallel Processing of SAR Imaging Algorithms for Large Areas Using Multi-GPU . . . . .                                | 404 |
| <i>Xue Wang, Jiabin Yuan, and Xingfang Zhao</i>  |     |
| An Extreme Learning Approach to Fast Prediction in the Reduce Phase of a Cloud Platform. . . . .                       | 417 |
| <i>Qi Liu, Weidong Cai, Jian Shen, Baowei Wang, Zhangjie Fu, and Nigel Linge</i>                                       |     |

**Data Analysis in Cloud**

|   |     |
|---|-----|
| Wind Speed and Direction Predictions Based on Multidimensional Support Vector Regression with Data-Dependent Kernel . . . . . | 427 |
| <i>Dingcheng Wang, Yujia Ni, Beijing Chen, Zhili Cao, Yuhang Tian, and Youzhi Zhao</i>  |     |
| Research on Rootkit Detection Model Based on Intelligent Optimization Algorithm in the Virtualization Environment . . . . .   | 437 |
| <i>Lei Sun, Zhiyuan Zhao, Feiran Wang, and Lei Jin</i>  |     |
| Performance Analysis of (1+1)EA on the Maximum Independent Set Problem . . . . .  | 448 |
| <i>Xue Peng</i>   |     |
| A Robust Iris Segmentation Algorithm Using Active Contours Without Edges and Improved Circular Hough Transform . . . . .      | 457 |
| <i>Yueqing Ren, Zhiyi Qu, and Xiaodong Liu</i>  |     |
| An Adaptive Hybrid PSO and GSA Algorithm for Association Rules Mining . . . . .   | 469 |
| <i>Zhiping Zhou, Daowen Zhang, Ziwen Sun, and Jiefeng Wang</i>  |     |
| Sequential Pattern Mining and Matching Method with Its Application on Earthquakes . . . . .                                   | 480 |
| <i>Jiang Zhu, Dechang Pi, Pan Xiong, and Xuhui Shen</i>   |     |
| Teaching Quality Assessment Model Based on Analytic Hierarchy Process and LVQ Neural Network . . . . .                        | 491 |
| <i>Shuai Hu, Yan Gu, and Hua Jiang</i>  |     |
| Fast Sparse Representation Classification Using Transfer Learning . . . . .   | 501 |
| <i>Qi Zhu, Baisheng Dai, Zizhu Fan, and Zheng Zhang</i>   |     |
| Probing the Scheduling Algorithms in the Cloud Based on OpenStack. . . . .  | 510 |
| <i>Yang Luo, Qingni Shen, Cong Li, Kang Chen, and Zhonghai Wu</i>   |     |
| Top-k Distance-Based Outlier Detection on Uncertain Data . . . . .  | 521 |
| <i>Ying Zhang, Hongyuan Zheng, and Qiulin Ding</i>  |     |
| An Airport Noise Prediction Model Based on Selective Ensemble of LOF-FSVR . . . . .   | 536 |
| <i>Haiyan Chen, Jiajia Deng, Bo Sun, and Jiandong Wang</i>  |     |
| Application of Semantic-Based Laplacian Eigenmaps Method in 3D Model Classification and Retrieval . . . . .                   | 550 |
| <i>Xinying Wang, Fangming Gu, Gang Liu, and Zhiyu Chen</i>  |     |
| <b>Author Index</b> . . . . .   | 561 |

Cloud Computing and Security

First International Conference, ICCCS 2015, Nanjing,  
China, August 13-15, 2015. Revised Selected Papers

Huang, Z.; Sun, X.; Luo, J.; Wang, J. (Eds.)

2015, XII, 562 p. 211 illus. in color., Softcover

ISBN: 978-3-319-27050-0
