

Preface

This volume contains the papers presented at SECITC 2015, the 8th International Conference on Security for Information Technology and Communications (www.secitc.eu), held during June 11–12, 2015, in Bucharest.

There were 34 submissions and each submitted paper was reviewed by at least three Program Committee members. The committee decided to accept 15 papers, and the program also included three invited guest speakers.

For seven years SECITC has been bringing together computer security researchers, cryptographers, industry representatives, and graduate students. The conference focuses on research on any aspect of security and cryptography. The papers present advances in the theory, design, implementation, analysis, verification, or evaluation of secure systems and algorithms.

One of SECITC's primary goals is to bring together researchers belonging to different communities and provide a forum that facilitates the informal exchanges necessary for the emergence of new scientific collaborations. We would like to acknowledge the work of the Program Committee, whose great efforts provided a proper framework for the selection of the papers.

The conference was organised by Advanced Technologies Institute, Bucharest University of Academic Studies and Military Technical Academy.
