Part I Foundations and Applications of Graph Edit Distance

1	Introduction and Basic Concepts	3
1.1	Pattern Recognition	3
1.1.1	Statistical and Structural Pattern Recognition	4
1.2	Graph and Subgraph	5
1.3	Graph Matching	9
1.3.1	Exact Graph Matching	10
1.3.2	Error-Tolerant Graph Matching	15
1.4	Outline of the Book	19
	References	20
2	Graph Edit Distance	29
2.1	Basic Definition and Properties	29
2.1.1	Conditions on Edit Cost Functions	31
2.1.2	Example Definitions of Cost Functions	33
2.2	Computation of Exact Graph Edit Distance	35
2.3	Graph Edit Distance-Based Pattern Recognition	38
2.3.1	Nearest-Neighbor Classification	38
2.3.2	Kernel-Based Classification	39
2.3.3	Classification of Vector Space Embedded Graphs	41
	References	42
3	Bipartite Graph Edit Distance	45
3.1	Graph Edit Distance as Quadratic Assignment Problem	45
3.2	Bipartite Graph Edit Distance	51
3.2.1	Deriving Upper and Lower Bounds on the Graph Edit Distance	54
3.2.2	Summary	58
3.3	Experimental Evaluation	59

3.4 Pattern Recognition Applications of Bipartite Graph	
Edit Distance	61
References	62

Part II Recent Developments and Research on Graph Edit Distance

4 Improving the Distance Accuracy of Bipartite Graph	
Edit Distance	69
4.1 Change of Notation	69
4.2 Improvements via Search Strategies	70
4.2.1 Iterative Search	70
4.2.2 Floating Search	72
4.2.3 Genetic Search	74
4.2.4 Greedy Search	76
4.2.5 Genetic Search with Swap Strategy	78
4.2.6 Beam Search	80
4.2.7 Experimental Evaluation.	83
4.3 Improvements via Integration of Node Centrality Information	93
4.3.1 Node Centrality Measures.	93
4.3.2 Integrating Node Centrality in the Assignment	95
4.3.3 Experimental Evaluation.	96
References	98
5 Learning Exact Graph Edit Distance	101
5.1 Predicting Exact Graph Edit Distance from Lower and Upper Bounds	101
5.1.1 Linear Support Vector Regression	101
5.1.2 Nonlinear Support Vector Regression.	103
5.1.3 Predicting $d_{\lambda_{min}}$ from d_{ψ} and d'_{ψ}	104
5.1.4 Experimental Evaluation.	105
5.2 Predicting the Correctness of Node Edit Operations	110
5.2.1 Features for Node Edit Operations.	110
5.2.2 Experimental Evaluation.	113
References	118
6 Speeding Up Bipartite Graph Edit Distance	121
6.1 Suboptimal Assignment Algorithms	121
6.1.1 Basic Greedy Assignment.	122
6.1.2 Tie Break Strategy.	122
6.1.3 Refined Greedy Assignment	123
6.1.4 Greedy Assignment Regarding Loss	124
6.1.5 Order of Node Processing.	125
6.1.6 Greedy Sort Assignment.	126

6.2	Relations to Exact Graph Edit Distance	127
6.3	Experimental Evaluation	128
	References	134
7	Conclusions and Future Work	135
7.1	Main Contributions and Findings	135
7.2	Future Work	136
	References	137
8	Appendix A: Experimental Evaluation of Sorted Beam Search.	139
8.1	Sorting Criteria	139
8.1.1	Confident	139
8.1.2	Unique	140
8.1.3	Divergent	140
8.1.4	Leader	140
8.1.5	Interval	141
8.1.6	Deviation	141
8.2	Experimental Evaluation	142
	References	148
9	Appendix B: Data Sets	149
9.1	LETTER Graphs	149
9.2	GREC Graphs	150
9.3	FP Graphs	151
9.4	AIDS Graphs	152
9.5	MUTA Graphs	153
9.6	PROT Graphs	153
9.7	GREYC Graphs	154
	References	155
	Index	157

Structural Pattern Recognition with Graph Edit Distance
Approximation Algorithms and Applications

Riesen, K.

2015, XIII, 158 p. 28 illus., 4 illus. in color., Hardcover
