

Contents

MAS Engineering, Modeling, and Simulation

Tailoring Agent Platforms with Software Product Lines	3
<i>Lars Braubach, Alexander Pokahr, Julian Kalinowski, and Kai Jander</i>	
A Metrics Framework for Quantifying Autonomy in Complex Systems	22
<i>Christopher-Eyk Hrabia, Nils Masuch, and Sahin Albayrak</i>	
Measuring and Comparing Scalability of Agent-Based Simulation Frameworks	42
<i>Fabian Lorig, Nils Dammenhayn, David-Johannes Müller, and Ingo J. Timm</i>	
Integrating Agent Actions and Workflow Operations	61
<i>Thomas Wagner and Daniel Moldt</i>	
A Spatio-Temporal Multiagent Simulation Framework for Reusing Agents in Different Kinds of Scenarios	79
<i>Daan Apeldoorn</i>	

Smart Things Working Together

A Multiagent Systems Perspective on Industry 4.0 Supply Networks	101
<i>Marc Premm and Stefan Kirn</i>	
Cyber-Physical Multiagent-Simulation in Production Logistics	119
<i>Christoph Greulich, Stefan Edelkamp, and Niels Eicke</i>	
Modeling and Simulation of Web-of-Things Systems as Multi-Agent Systems	137
<i>Ion Mircea Diaconescu and Gerd Wagner</i>	
A Conceptual Approach to Place Security in Systems of Mobile Agents	154
<i>Héla Hachicha, Donies Samet, and Khaled Ghedira</i>	

Innovative and Emerging Applications of MAS

Dynamic Agent-Based Scheduling of Treatments: Evidence from the Dutch Youth Health Care Sector	173
<i>Erik Giesen, Wolfgang Ketter, and Rob Zuidwijk</i>	

Agent-Based Voting Architecture for Traffic Applications	200
<i>Sophie L. Dennisen and Jörg P. Müller</i>	
Trading Strategies of a Champion Agent in a Multiagent Smart Grid Simulation Platform.	218
<i>Serkan Özdemir and Rainer Unland</i>	
Agent-Based Decision Support for Allocating Caregiving Resources in a Dementia Scenario	233
<i>Tobias Widmer and Marc Premm</i>	
A Comparison of Agent-Based Coordination Architecture Variants for Automotive Product Change Management.	249
<i>Janek Bender, Stefan Kehl, and Jörg P. Müller</i>	
Selected Extended Abstracts of Doctoral Papers	
Electric Vehicles: An Agent-Based Approach to Sustainability	271
<i>Micha Kahlen and Wolfgang Ketter</i>	
Towards A Formal Model of Opportunism Based on Situation Calculus	275
<i>Jieting Luo, Frank Dignum, and John-Jules Meyer</i>	
Adaptive Services Reconfiguration in Manufacturing Environments Using a Multi-agent System Approach.	280
<i>Nelson Rodrigues, Paulo Leitão, and Eugénio Oliveira</i>	
Hydrogen: A Fuel Option to Future Transportation as a Part of Smart Grid . . .	285
<i>Serkan Özdemir and Rainer Unland</i>	
Author Index	291

Multiagent System Technologies

13th German Conference, MATES 2015, Cottbus,

Germany, September 28 - 30, 2015, Revised Selected

Papers

Müller, J.P.; Ketter, W.; Kaminka, G.; Wagner, G.; Bulling,

N. (Eds.)

2015, XII, 291 p. 109 illus. in color., Softcover

ISBN: 978-3-319-27342-6
