Part I Setting for Environmental Project Management

1	The Need to Protect and Conserve the Environment	3
1.1	Environmental Project Management—An Introduction	5
1.1.1	What Is Environment?	7
1.1.2	What Is a Project?	9
1.1.3	What Is Project Management?	10
1.1.4	The Importance of Project Management	11
1.2	Environmental Protection, Conservation, and Remediation. . . .	13
1.2.1	Environmental Protection	14
1.2.2	Environmental Conservation	17
1.2.3	Environmental Contamination and Remediation	19
1.3	Examples of World's Worst Environmental Disasters	22
1.3.1	The BP Macondo Oil Well Disaster in 2010	22
1.3.2	PTTEPA Montara Gas Well Disaster in 2009	24
1.3.3	Exxon Valdez Oil Spill Disaster 1989.	25
1.3.4	Lake Nyos Limnic Eruption in 1986.	25
1.4	Lessons Learned	26
1.5	Concluding Remarks	27
	References	27
2	The Need for Environmental Project Management	31
2.1	Environmental Project Management—An Overview	31
2.1.1	Environmental-Based Project: A Definition	31
2.1.2	Environmental-Based Project Versus Business Operations.	32
2.1.3	Examples of Environmental-Based Projects in Australia	33
2.1.4	Definition of Environmental Project Management. . . .	35
2.1.5	Significance of Environmental Project Management	37

2.2	Scope and Objective of the Book	38
2.3	Concluding Remarks	39
	References	40

Part II Principles of Environmental Project Management

3	Environmental Project Management Methodology	43
3.1	Principles of Project Management	43
3.1.1	Project Management as a Process	45
3.1.2	Project Management as a Planning Tool	46
3.1.3	Project Management as a Decision-Making Tool	50
3.1.4	Project Management as a Resource Optimization Tool	51
3.1.5	The Triple Constraints of Project Management.	53
3.1.6	The Project Life Cycle	56
3.1.7	Project Organisation Structure	59
3.1.8	Leadership in Project Management	65
3.2	Project Management Standards and Processes	68
3.3	Project Management Versus Environmental Management	70
3.4	Incorporating Environmentalism into Project Management.	71
3.4.1	The Environmental Project Life Cycle.	73
3.4.2	Environmental Project Phase Activities	73
3.4.3	Environmental Project Management Triangle	75
3.5	Integrating Sustainability Thinking into Project Management	76
3.6	Concluding Remarks	78
	References	79
4	Essential Project Management Functions.	83
4.1	Coordinating Function: Project Integration Management	84
4.2	Planning and Controlling Functions	84
4.2.1	Scope Management	84
4.2.2	Time Management and Scheduling	85
4.2.3	Cost Management and Budgeting	85
4.2.4	Quality and Performance Management	85
4.3	Facilitating Functions	86
4.3.1	Risk and Uncertainty Management	86
4.3.2	Human Resources and Interface Management	87
4.3.3	Communications and Information Management	87
4.3.4	Contract and Procurement Management.	89
4.3.5	Stakeholder and Requirements Management	90
4.4	Concluding Remarks	91
	References	92

5	Broad Framework for Environmental Project Management	93
5.1	Introductory Remarks	93
5.2	Developing an Environmental Project Management Framework	93
5.3	Environmental Project Management Methodology	95
5.3.1	ISO 14001 Environmental Management System	96
5.3.2	The PMBoK Guide	102
5.3.3	ISO 9001 Plan Do Check Act (PDCA) Circle	103
5.3.4	The Six Sigma (DMAIC) Systems	103
5.4	Concluding Remarks	105
	References	106
6	Environmental Project Economics.	109
6.1	Introduction.	109
6.2	The Role of Economics in Environmental Project Management	110
6.3	The Circular Market Economy.	111
6.3.1	Market Demand for Natural Resources	112
6.3.2	Market Supply for Natural Resources	113
6.3.3	The Law of Supply and Demand	115
6.3.4	The Interdependence of Market Economy and the Environment.	117
6.3.5	The Law of Diminishing Returns	118
6.4	Economics of Environmental Pollution	119
6.5	Economic Evaluation of Environmental Projects.	121
6.5.1	Cost Benefit Analysis	122
6.5.2	Cash Flow Analysis	124
6.5.3	Payback Period	125
6.5.4	Time Value of Money: Compounding the Future Cash Flow	126
6.5.5	Discounting the Future Cash Flow	127
6.5.6	The Rationale for Discounting	128
6.5.7	Discounted Cash Flow	129
6.5.8	Net Present Value	130
6.5.9	Profit-to-Investment Ratio	131
6.5.10	Internal Rate of Return	132
6.5.11	Present Worth Ratio	133
6.6	Concluding Remarks	134
	References	135
7	Environmental Risk and Decision Analysis	137
7.1	Introductory Remark.	137
7.2	Perceptions of Risk	138

7.3	Structuring an Environmental Decision Problem.	139
7.3.1	Decision Tree	141
7.3.2	The Concept of Expected Monetary Value.	142
7.3.3	Analyzing a Basic Risky Decision with a Decision Tree	142
7.3.4	Analyzing CO ₂ Sequestration Options with a Decision Tree	144
7.4	Risk Management Approaches	147
7.4.1	Deterministic Approach.	147
7.4.2	Stochastic Approach.	151
7.5	Concluding Remarks	160
	References	160

Part III Essential Tools and Techniques for Environmental Project Management

8	Geospatial Tools and Techniques	165
8.1	Need for Geospatial Techniques in EnvPM	165
8.2	Dimensions of Space, Time, and Scale	166
8.3	Geodata	170
8.4	Digital Earth Concept.	171
8.5	Fundamentals of Geospatial.	173
8.6	Concluding Remarks	174
	References	174
9	Global Navigation Satellite System (GNSS)	177
9.1	Environmental Monitoring Parameters.	177
9.2	Design of GNSS Monitoring Survey.	178
9.3	Mission Planning and Reconnaissance	179
9.4	GNSS Field Procedures.	184
9.4.1	Single Point Positioning	186
9.4.2	Static Relative Positioning.	187
9.4.3	Real-Time GNSS (RTGNSS).	189
9.4.4	Differential and Augmented GNSS	190
9.4.5	Rapid Positioning Methods	192
9.4.6	Real-Time Kinematic (RTK)	194
9.5	Environmental Surveillance: CORS Monitoring	197
9.6	Coordinate Reference System	203
9.6.1	Datum	203
9.6.2	Coordinate Systems and Transformations	206
9.6.3	Map Projection	209
9.7	Concluding Remarks	209
	References	210

10 Photogrammetry	213
10.1 Definition and Scope	213
10.2 Geometry of Aerial Photography	215
10.2.1 Central Perspective Projection	215
10.2.2 Photographic Scale	216
10.2.3 Classification of Aerial Photographs	217
10.3 Photogrammetric Procedures	218
10.3.1 Data Acquisition	219
10.3.2 Photogrammetric Restitution	223
10.3.3 Photogrammetric Output and Use in EnvPM	228
10.4 Concluding Remarks	229
References	230
11 Remote Sensing	231
11.1 Basic Concept	231
11.2 Principles of Electromagnetic Radiation	233
11.2.1 Electromagnetic Spectrum	233
11.2.2 Interaction with the Atmosphere and Targets	235
11.3 Passive Versus Active Remote Sensing	237
11.4 Concluding Remarks	237
References	238
12 Geographical Information System (GIS)	239
12.1 Basic Concept	239
12.2 Key Components	241
12.3 Basic Functions and Applications	243
12.4 Reasons for Success or Failure	246
12.5 Concluding Remarks	247
References	248
13 Web GIS and Mapping	249
13.1 The Web and Its Influence	249
13.2 Concept and Applications of Web GIS	250
13.3 The Development of Web Mapping	252
13.4 Web Services	254
13.5 Mobile and Cloud-Based GIS	257
13.6 Concluding Remarks	260
References	261
14 Geospatial in Support of EIA, SEA, and SA	263
14.1 Role of Geospatial Techniques in EIA, SEA, and SA	263
14.1.1 EIA and the Need for Monitoring	263
14.1.2 Applications of Geospatial Techniques	264
14.2 Impact Monitoring to Detect Change	266

14.3	Project EIA	267
14.3.1	Geospatial in Support of EIA Process	267
14.3.2	Geospatial Technique and Multi-Criteria Analysis (MCA).	270
14.3.3	Example of Gngangara Mound Groundwater Resources	277
14.4	Strategic Environmental Assessment (SEA).	285
14.4.1	Geospatial and Cumulative Impacts Assessments	286
14.4.2	Example of Marillana Creek (Yandi) Mine	287
14.5	Sustainability Assessment	289
14.6	Concluding Remarks	290
	References	290
15	Project Management Toolbox	295
15.1	Introduction.	295
15.2	Project Initiation Tools	296
15.2.1	Brainstorming	296
15.2.2	Stakeholder Analysis	297
15.2.3	SWOT Analysis.	299
15.2.4	Project Portfolio Selection and Optimization	301
15.3	Project Planning Tools	303
15.3.1	Affinity Diagram	303
15.3.2	The Work Breakdown Structure (WBS)	306
15.3.3	Responsibility Assignment Matrix (RAM).	308
15.3.4	Network Diagram.	309
15.3.5	Gantt Chart	310
15.4	Project Implementation Tools.	312
15.4.1	Milestone Chart	312
15.4.2	Pareto Chart	313
15.4.3	Cause-and-Effect (Ishikawa) Diagram	315
15.5	Project Performance Evaluation Tools.	317
15.5.1	Earned Value Analysis	319
15.5.2	Elements of Earned Value Analysis	319
15.5.3	Variance Analysis: Formulas and Their Interpretation	324
15.5.4	Project Management Software	329
15.6	Integrating WBS with Cost and Schedule Control System . . .	330
15.7	Linking Project Management Tools to PMBoK	331
15.8	Concluding Remarks	332
	References	333

16 Project Management Techniques	335
16.1 Introduction	335
16.2 Delphi Technique	336
16.3 Scope Planning Techniques	337
16.3.1 Decomposition of Work Breakdown Structure (WBS)	338
16.3.2 Decomposition of Organisation Breakdown Structure (OBS)	340
16.3.3 Decomposition of Risk Breakdown Structure (RBS)	341
16.3.4 Integrating the WBS with the OBS and RBS	341
16.4 Cost Estimating Techniques	343
16.4.1 Top-Down Cost Estimating Method	345
16.4.2 Bottom-Up Cost Estimating Method	345
16.4.3 Parametric Cost Estimating Method	345
16.4.4 Decomposition of the Cost Breakdown Structure (CBS)	346
16.5 Activity Scheduling Techniques	347
16.5.1 Critical Path Method (CPM)	348
16.5.2 Critical Path Terminology	352
16.5.3 Logic Rules, Sequences and Dependencies	354
16.5.4 Activity Duration and Timing	356
16.5.5 Critical Path Calculations	356
16.5.6 Pros and Cons of Critical Path Method	361
16.6 Schedule Compression Techniques	362
16.6.1 Crashing the Schedule	362
16.6.2 Fast-Tracking the Schedule	362
16.7 Resource Scheduling Techniques	363
16.7.1 Resource Allocation	363
16.7.2 Resource Levelling Heuristics	364
16.8 Concluding Remarks	365
References	366
17 Implementing Environmental Project Management	367
17.1 Critical Success/Failure Factors	368
17.2 Planning, Monitoring and Control System	369
17.3 Education and Training	370
17.4 Concluding Remarks	370
References	371

Part IV Case Studies on Environmental Conservation and Remediation Projects

18 Case Study of Environmental Projects in Australia	375
18.1 City of Stirling Natural Environment Coastcare, Western Australia.	375
18.1.1 Problem/Challenges	375
18.1.2 Project Detail.	375
18.1.3 Project Outcome.	376
18.2 Whole of Paddock Rehabilitation Program, Australian Capital Territory	376
18.2.1 Problem/Challenges	376
18.2.2 Project Detail.	377
18.2.3 Project Outcome.	377
18.3 Hybrid Air Conditioning Systems, New South Wales	377
18.3.1 Project Challenge/Objective	377
18.3.2 Project Detail.	378
18.3.3 Project Outcome.	378
18.4 East Trinity Remediation Project, Cairns, Queensland	379
18.4.1 Project Background	379
18.4.2 Project Challenge/Objective	379
18.4.3 How the Project Was Carried Out	379
18.4.4 Project Outcome.	380
18.5 Regent Honeyeater Habitat Restoration Project, Victoria	380
18.5.1 Project Background	380
18.5.2 Project Challenge/Objectives	381
18.5.3 Project Outcome.	381
18.6 Goolwa Biodiversity Protection and Restoration Project, South Australia	382
18.6.1 Project Challenge/Objectives	382
18.6.2 Project Detail.	382
18.6.3 Project Outcome.	383
18.7 Restoring Critical Riparian Areas in Southern Tasmania	383
18.7.1 Project Challenge/Objectives	383
18.7.2 Project Detail.	384
18.7.3 Project Outcome.	384
18.8 Concluding Remarks	384
References	385
19 Case Study of Environmental Projects in Developing Countries.	387
19.1 Hydrocarbon Pollution Restoration Project, Ogoniland, Nigeria	387
19.1.1 Project Description	387
19.1.2 Project Challenges and Objectives	388

- 19.1.3 Environmental Monitoring Tools
Used in Ogoniland 388
 - 19.1.4 Project Outcome. 389
 - 19.2 Waste to Wealth Programme: Nigeria, Kenya, Uganda,
Cameroon 389
 - 19.2.1 Programme Objectives 389
 - 19.2.2 Programme Background 390
 - 19.2.3 Programme Outcome 390
 - 19.3 Concluding Remarks 391
 - References 392
- 20 Challenges of Applying EnvPM in Developing Countries 393**
 - 20.1 Projects and Project Management. 393
 - 20.2 Sustainable Waste Management Challenges 394
 - 20.3 Proposed Solution to Waste Management Challenges 395
 - 20.4 Concluding Remarks 396
 - References 396
- Index 397**

Environmental Project Management
Principles, Methodology, and Processes

Sholarin, E.A.; Awange, J.L.

2015, XIX, 406 p. 149 illus., 32 illus. in color., Hardcover
