

# Contents

## Introduction

|   |   |
|---|---|
| How to Read the Book “Foundations of Biomedical Knowledge Representation” . . . . . | 3 |
| <i>Peter J.F. Lucas and Arjen Hommersom</i>   |   |
| An Introduction to Knowledge Representation and Reasoning in Healthcare . . . .     | 9 |
| <i>Arjen Hommersom and Peter J.F. Lucas</i>   |   |

## Diagnosis of Disease

|  |    |
|--|----|
| Representing Knowledge for Clinical Diagnostic Reasoning . . . . . | 35 |
| <i>Peter J.F. Lucas and Felipe Orihuela-Espina</i>                 |    |
| Automated Diagnosis of Breast Cancer on Medical Images . . . . .   | 47 |
| <i>Marina Velikova, Inês Dutra, and Elizabeth S. Burnside</i>      |    |

## Monitoring of Health and Disease and Conformance

|  |     |
|--|-----|
| Monitoring in the Healthcare Setting . . . . .   | 71  |
| <i>Federico Chesani, Catherine G. Enright, Marco Montali, and Michael G. Madden</i>                                |     |
| Conformance Verification of Clinical Guidelines in Presence of Computerized and Human-Enhanced Processes . . . . . | 81  |
| <i>Stefano Bragaglia, Federico Chesani, Paola Mello, and Marco Montali</i>   |     |
| Modelling and Monitoring the Individual Patient in Real Time . . . . .   | 107 |
| <i>Catherine G. Enright and Michael G. Madden</i>  |     |

## Assessment of Health and Personalisation

|   |     |
|---|-----|
| Personalised Medicine: Taking a New Look at the Patient . . . . . | 139 |
| <i>Marco Scutari</i>  |     |
| Graphical Modelling in Genetics and Systems Biology . . . . .     | 143 |
| <i>Marco Scutari</i>  |     |
| Chain Graphs and Gene Networks. . . . .                           | 159 |
| <i>Dag Sonntag and Jose M. Peña</i>                               |     |

## Prediction and Prognosis of Health and Disease

|   |     |
|---|-----|
| Prediction and Prognosis of Health and Disease . . . . .  | 181 |
| <i>Agnieszka Onisko, Allan Tucker, and Marek J. Druzdzal</i>                                    |     |
| Trajectories Through the Disease Process: Cross Sectional<br>and Longitudinal Studies . . . . . | 189 |
| <i>Allan Tucker, Yuanxi Li, Stefano Ceccon, and Stephen Swift</i>                               |     |
| Dynamic Bayesian Network for Cervical Cancer Screening . . . . .                                | 207 |
| <i>Agnieszka Onisko and R. Marshall Austin</i>  |     |
| Modeling Dynamic Processes with Memory by Higher Order<br>Temporal Models . . . . .             | 219 |
| <i>Anna Łupińska-Dubicka and Marek J. Druzdzal</i>  |     |

## Treatment of Disease

|   |     |
|---|-----|
| Treatment of Disease: The Role of Knowledge Representation<br>for Treatment Selection . . . . . | 235 |
| <i>Jesse Davis, Luis Enrique Sucar, and Felipe Orihuela-Espina</i>                              |     |
| Predicting Adverse Drug Events from Electronic Medical Records . . . . .                        | 243 |
| <i>Jesse Davis, Vitor Santos Costa, Peggy Peissig, Michael Caldwell,<br/>and David Page</i>     |     |
| User Modelling for Patient Tailored Virtual Rehabilitation . . . . .                            | 259 |
| <i>Luis Enrique Sucar, Shender Maria Ávila-Sansores,<br/>and Felipe Orihuela-Espina</i>         |     |

## Recommendation

|  |     |
|--|-----|
| Supporting Physicians and Patients Through Recommendation:<br>Guidelines and Beyond . . . . .  | 281 |
| <i>Luca Anselma, Alessio Bottrighi, Arjen Hommersom, Paolo Terenziani,<br/>and Anthony Hunter</i>  |     |
| A Hybrid Approach to the Verification of Computer<br>Interpretable Guidelines . . . . .  | 287 |
| <i>Luca Anselma, Alessio Bottrighi, Laura Giordano, Arjen Hommersom,<br/>Gianpaolo Molino, Stefania Montani, Paolo Terenziani,<br/>and Mauro Torchio</i> |     |
| Aggregation of Clinical Evidence Using Argumentation:<br>A Tutorial Introduction . . . . .   | 317 |
| <i>Anthony Hunter and Matthew Williams</i>   |     |

|                               |     |
