
Contents

Part I Basics of Respiratory Physiology and Mechanics in the Neonate and the Growing Child

1 Development of the Respiratory System (Including the Preterm Infant)	3
2 The Neonatal Neuromechanical Unit: Generalities of Operation	27
3 Basics of Gas Exchange	43
4 The Respiratory System	55

Part II Basics of Respiratory Support and Mechanical Ventilation

5 Neonatal Intubation (Specific Considerations)	115
6 Oxygen Supplementation, Delivery, and Physiologic Effects	123
7 Nasal CPAP: An Evidence-Based Assessment	135
8 Mechanical Ventilation	149
9 Airway Humidification	275
10 Specific Equipment Required for Home Mechanical Ventilation in Children	283

Part III Respiratory Mechanics in the Mechanically Ventilated Patient

11 Respiratory Mechanics in the Mechanically Ventilated Patient	293
--	------------

Part IV Respiratory Monitoring in the Mechanically Ventilated Patient

12	Classical Respiratory Monitoring	375
13	Monitoring of the Mechanical Behaviour of the Respiratory System During Controlled Mechanical Ventilation	421
14	Monitoring Lung Volumes During Mechanical Ventilation	441
15	Monitoring Interactions Between Spontaneous Respiration and Mechanical Inflations	473
16	Basic and Practically Useful Respiratory Monitoring of a Mechanically Ventilated Patient in Resource-Limited Countries	491

Part V Indications for Respiratory Support

17	Indications for Noninvasive Respiratory Support	503
18	Indications for Invasive Conventional Mechanical Ventilation	535
19	Indications for Nonconventional Ventilation Modes	559
20	Respiratory Support in Developing Countries Where Resources Are Limited	603

Part VI Clinical Use of Conventional Modes of Ventilator Support

21	Respirator Cycle Control Modes	615
-----------	---	------------

Part VII Clinical Use of Nonconventional Modes of Ventilator Support

22	Clinical Use of Nonconventional Modes of Ventilator Support	645
-----------	--	------------

Part VIII General Management of the Ventilator-Supported Patient

23	The Prone Position in Acute Lung Injury	671
-----------	--	------------

24	Respiratory Physiotherapy and Endotracheal Suctioning During Mechanical Ventilation	687
25	Fluid Management in the Ventilated Patient	711
 Part IX Permissive Hypercapnia		
26	Permissive Hypercapnia	727
27	Permissive Hypercapnia in Neonates: Specific Experience and Limitations	743
 Part X Adjunctive Therapies in Mechanically Ventilated Children and Neonates		
28	Surfactant	761
29	Selective Pulmonary Vasodilators	809
30	Drug Nebulization During Mechanical Ventilation	837
31	Use of Potent Inhalational Anesthetic Agents During Mechanical Ventilation	863
32	Rational Use of Adjunctive Therapies: Efficacy and Efficiency	887
 Part XI Complications of Mechanical Ventilation		
33	Ventilator-Associated Lung Injury	917
34	Gross Air Leaks	947
35	Infectious Complications in Mechanically Ventilated Patients	961
36	Post-extubation Stridor	981
 Part XII Bronchoscopy in Pediatric and Neonatal Intensive Care		
37	Bronchoscopy in Pediatric and Neonatal Intensive Care	1001

Part XIII Sedation, Analgesia and Neuromuscular Blockade During Mechanical Ventilation

- 38 Sedation, Analgesia and Neuromuscular Blockade in the Neonatal ICU 1019**
- 39 Sedation, Analgesia and Neuromuscular Blockade in the Paediatric ICU 1031**

Part XIV A Practical Approach to Noninvasive Mechanical Ventilation

- 40 Noninvasive Respiratory Support in the Neonate 1063**
- 41 Noninvasive Respiratory Support in the Paediatric Patient 1073**

Part XV Practical Evidence-Based and Goal-Directed Approach to Conventional Mechanical Ventilation

- 42 Setting the Ventilator in the NICU 1101**
- 43 Setting the Ventilator in the PICU 1127**
- 44 Approaches to Adverse Patient-Ventilator Interactions. 1143**

Part XVI Practical Goal-Directed Approach to Nonconventional Mechanical Ventilation

- 45 High-Frequency Oscillatory Ventilation in the Neonate 1161**
- 46 High-Frequency Jet Ventilation (HFJV) 1173**

Part XVII Mechanical Ventilation in Various Pulmonary Pathologies

- 47 Acute Neonatal Respiratory Failure 1185**
- 48 Chronic Respiratory Failure in Neonates 1267**
- 49 Pediatric Acute Lung Injury 1279**
- 50 Bronchiolitis 1291**
- 51 Pediatric Asthma 1313**
- 52 Diaphragmatic Palsy 1325**

**Part XVIII Cardiopulmonary Interactions in the Mechanically
Ventilated Patient**

53 Cardiopulmonary Interactions in the Ventilated Patient . . .	1333
---	-------------

**Part XIX Mechanical Ventilation in Infection, Sepsis
and Organ Failure**

54 Mechanical Ventilation in Infection, Sepsis and Organ Failure	1369
--	-------------

Part XX Mechanical Ventilation in Neuromuscular Disorders

55 Mechanical Ventilation in Neuromuscular Disorders	1387
--	-------------

Part XXI Specific Conditions

56 Tracheostomy	1399
-------------------------------------	-------------

Part XXII Weaning from Mechanical Ventilator Support

57 Weaning Children from Mechanical Ventilator Support . . .	1415
--	-------------

58 Weaning from Mechanical Ventilator Support in Neonates	1425
---	-------------

Part XXIII Automation of Mechanical Ventilation

59 Explicit Computerized Protocols for Mechanical Ventilation in Children and Neonates	1435
--	-------------

60 Automated Control of Oxygen in Neonates	1447
--	-------------

61 Automation of Weaning in Children	1455
--	-------------

62 Automation of ALI/ARDS Ventilation in Children	1467
---	-------------

Part XXIV Long-Term Outcomes After Mechanical Ventilation

63 Long-Term Outcomes After Mechanical Ventilation in Neonates	1475
--	-------------

64 Long-Term Outcomes After Mechanical Ventilation in Children	1489
--	-------------

Part XXV	Mechanical Ventilation in the Operating Room	
65	Mechanical Ventilation in the Operating Room	1503
Part XXVI	Extracorporeal Membrane Oxygenation in Acute Hypoxemic Respiratory Failure	
66	Extracorporeal Membrane Oxygenation in Acute Hypoxic Respiratory Failure	1525
Part XXVII	Evaluating Mechanical Ventilators for Use in Neonatal and Pediatric Patients	
67	Evaluating Mechanical Ventilators for Use in Neonatal and Pediatric Patients	1537
Part XXVIII	Organization and Management of Mechanical Ventilation Worldwide	
68	Organization Characteristics in North Africa	1565
69	Organization Characteristics in North America.	1571
70	Organization Characteristics in South America.	1575
71	Organization Characteristics in Europe	1583
72	Organization Characteristics in Oceania.	1589
Part XXIX	Ethical Concerns	
73	Ethical Concerns	1599
Index	1613

Pediatric and Neonatal Mechanical Ventilation
From Basics to Clinical Practice

Rimensberger, P. (Ed.)

2015, X, 1642 p. 405 illus., 109 illus. in color.,
Hardcover

ISBN: 978-3-642-01218-1
