# Contents

<b>1</b>	<b>Introduction.</b>	<b>1</b>
<b>2</b>	<b>Freezing of Lakes.</b>	<b>11</b>
2.1	Lake Types and Characteristics	12
2.1.1	Classification and Geometry of Lakes	12
2.1.2	Physical Properties of Lake Waters	17
2.2	Weather and Climate	24
2.2.1	General Regional Climate.	24
2.2.2	Air Pressure	29
2.2.3	Precipitation	30
2.2.4	Air Temperature, Humidity and Wind	32
2.2.5	Radiation Balance	33
2.3	Water Budget of Lakes.	36
2.3.1	General Form	36
2.3.2	Inflow and Outflow.	39
2.3.3	Lake–Atmosphere Water Fluxes	39
2.3.4	Budgets of Impurities.	40
2.4	Ice-Covered Lakes	41
2.4.1	Zonation of Freezing Lakes	41
2.4.2	Seasonal Lake Ice Zone	41
2.4.3	Lakes with Perennial Ice	44
2.5	Lake Ice Climatology.	46
<b>3</b>	<b>Structure and Properties of Lake Ice</b>	<b>51</b>
3.1	Ice Ih: The Solid Phase of Water on Earth	52
3.1.1	Ice Crystal Structure	52
3.1.2	Ice Nucleation.	55
3.1.3	Ice Formation in Lakes	58
3.1.4	Physical Properties of Lake Ice	59
3.2	Lake Ice Types and Stratigraphy	60
3.2.1	Ice Structure Analysis	60

3.2.2	Lake Ice Stratigraphy . . . . .	61
3.2.3	Snow Cover . . . . .	68
3.2.4	Case Study . . . . .	69
3.3	Impurities in Lake Ice Cover . . . . .	71
3.4	Light Transfer Through Ice Cover . . . . .	77
3.4.1	Solar Radiation . . . . .	77
3.4.2	Radiance and Irradiance . . . . .	80
3.4.3	Light Transfer in Ice-Covered Lakes . . . . .	83
3.5	Ice Mass Balance . . . . .	88
<b>4</b>	<b>Thermodynamics of Seasonal Lake Ice . . . . .</b>	<b>91</b>
4.1	Heat Budget of Lakes . . . . .	92
4.1.1	Total Heat Budget . . . . .	92
4.1.2	Solar Radiation . . . . .	94
4.1.3	Terrestrial Radiation . . . . .	95
4.1.4	Turbulent Heat Exchange with the Atmosphere . . . . .	97
4.1.5	Linearized Heat Flux . . . . .	101
4.2	Ice Growth and Melting . . . . .	103
4.2.1	Thermodynamic Principles . . . . .	103
4.2.2	Congelation Ice Growth . . . . .	106
4.2.3	Superimposed Ice Growth . . . . .	110
4.2.4	Frazil Ice Growth . . . . .	111
4.2.5	Ice Melting . . . . .	112
4.3	Analytic Models . . . . .	115
4.3.1	Basic Principles . . . . .	115
4.3.2	Congelation Ice . . . . .	116
4.3.3	Snow-Ice . . . . .	121
4.3.4	Frazil Ice . . . . .	122
4.3.5	Melting . . . . .	123
4.3.6	Multi-year Ice . . . . .	125
4.4	Numerical Models . . . . .	126
4.4.1	Structure of Models . . . . .	126
4.4.2	Quasi-steady Models . . . . .	127
4.4.3	Time-Dependent Models . . . . .	129
<b>5</b>	<b>Mechanics of Lake Ice . . . . .</b>	<b>137</b>
5.1	Rheology . . . . .	138
5.1.1	Stress . . . . .	139
5.1.2	Strain and Rotation . . . . .	140
5.1.3	Rheological Models . . . . .	141

5.2	Ice Cover as a Plate on Water Foundation . . . . .	144
5.2.1	Elastic Lake Ice Cover. . . . .	144
5.2.2	Viscous Behaviour of Lake Ice . . . . .	146
5.2.3	Thermal Cracking and Expansion . . . . .	148
5.2.4	Displacements in the Ice Cover. . . . .	149
5.3	Bearing Capacity of Ice . . . . .	152
5.4	Ice Forces. . . . .	156
5.4.1	Ice Load Problems . . . . .	156
5.4.2	Estimation of Ice Loads . . . . .	157
5.5	Drift Ice in Large Lakes . . . . .	158
5.5.1	Drift Ice Material . . . . .	158
5.5.2	Equations of Drift Ice Mechanics . . . . .	164
5.5.3	Static Ice Cover . . . . .	167
5.5.4	Models of Drift Ice Dynamics. . . . .	168
5.5.5	Ice Thickness and Compactness Profiles. . . . .	172
5.5.6	Numerical Modelling. . . . .	173
<b>6</b>	<b>Proglacial Lakes. . . . .</b>	<b>179</b>
6.1	Ice Sheets and Glaciers. . . . .	180
6.2	Epiglacial Lakes . . . . .	183
6.2.1	Occurrence of Epiglacial Lakes. . . . .	183
6.2.2	Physics of Epiglacial Lakes . . . . .	184
6.3	Supraglacial Lakes. . . . .	188
6.3.1	Occurrence of Supraglacial Lakes . . . . .	188
6.3.2	Structure of Supraglacial Lakes. . . . .	190
6.3.3	Thermodynamics of Supraglacial Lakes . . . . .	192
6.3.4	Case Study. . . . .	196
6.4	Subglacial Lakes . . . . .	198
6.4.1	Formation and Diversity. . . . .	199
6.4.2	Lake Vostok. . . . .	200
<b>7</b>	<b>Lake Water Body in the Ice Season . . . . .</b>	<b>203</b>
7.1	Ice Formation . . . . .	204
7.1.1	Cooling Process . . . . .	204
7.1.2	Two-Dimensional Features in Pre-winter . . . . .	209
7.1.3	Analytic Slab Models . . . . .	209
7.1.4	Mixed Layer Models . . . . .	213
7.1.5	Turbulence Models . . . . .	214
7.2	Thermal Structure and Circulation Under Ice-Cover . . . . .	215
7.2.1	Water Body During the Ice Season . . . . .	215
7.2.2	Stratification. . . . .	219

7.3	Dynamics of Water Body Beneath Ice-Cover. . . . .	223
7.3.1	Circulation . . . . .	223
7.3.2	Shallow Water Waves . . . . .	228
7.3.3	Melting Period . . . . .	230
7.4	Light Conditions . . . . .	233
7.4.1	Optically Active Substances . . . . .	233
7.4.2	Light Below the Ice Cover . . . . .	236
7.5	Wintertime Budgets of Gases and Nutrients . . . . .	238
7.5.1	Oxygen . . . . .	238
7.5.2	Methane. . . . .	243
7.5.3	Nutrients . . . . .	244
<b>8</b>	<b>Ice-Covered Lakes Environment. . . . .</b>	<b>245</b>
8.1	Winter Ecology . . . . .	246
8.1.1	General . . . . .	246
8.1.2	Water Quality . . . . .	248
8.1.3	Quantum Irradiance . . . . .	250
8.1.4	Primary Production . . . . .	253
8.2	Frozen Lakes at Settlements . . . . .	254
8.2.1	Monitoring and Remote Sensing . . . . .	254
8.2.2	Use of Lake Ice . . . . .	256
8.2.3	Shoreline Erosion and Deformation . . . . .	258
8.2.4	Sports on Lake Ice . . . . .	259
8.3	Lake Ice Engineering . . . . .	260
8.3.1	Background . . . . .	260
8.3.2	Ice Loads . . . . .	261
8.3.3	On-Ice Traffic. . . . .	261
8.3.4	Navigation . . . . .	262
8.4	Climate Change Impact on Lake Ice Season . . . . .	264
8.4.1	Background Physics . . . . .	264
8.4.2	Analytic Modelling . . . . .	266
8.4.3	Numerical Modelling . . . . .	268
8.4.4	Future Ice Seasons . . . . .	269
<b>9</b>	<b>Future of Frozen Lakes . . . . .</b>	<b>271</b>
9.1	Role of Ice Cover . . . . .	272
9.2	Science and Technology Needs . . . . .	274
9.3	What Will Be? . . . . .	277
	<b>Annex: Physics Data . . . . .</b>	<b>279</b>
	<b>References. . . . .</b>	<b>283</b>

Freezing of Lakes and the Evolution of their Ice Cover

Leppäranta, M.

2015, X, 301 p. 136 illus., 90 illus. in color., Hardcover

ISBN: 978-3-642-29080-0
