

2 History of the automobile

- 2 Development history
- 4 Pioneers of automotive technology
- 6 Robert Bosch's life's work (1861–1942)

8 Basics of the gasoline (SI) engine

- 8 Method of operation
- 12 Cylinder charge
- 16 Torque and power
- 18 Engine efficiency
- 20 Specific fuel consumption
- 22 Combustion knock

24 Fuels

- 24 Fuels for spark-ignition engines (gasolines)
- 29 Alternative fuels

32 Cylinder-charge control systems

- 32 Electronic throttle control (ETC)
- 36 Variable valve timing
- 39 Dynamic supercharging
- 42 Mechanical supercharging
- 44 Exhaust-gas turbocharging
- 47 Intercooling
- 48 Controlled charge flow
- 49 Exhaust-gas recirculation (EGR)

50 Gasoline injection systems over the years

- 50 Overview
- 52 Beginnings of mixture formation
- 60 Evolution of gasoline injection systems

76 Fuel supply

- 76 Fuel delivery with manifold injection
- 78 Fuel delivery with gasoline direct injection
- 79 Evaporative-emissions control system
- 80 Electric fuel pump
- 83 Gasoline filter
- 85 High-pressure pumps for gasoline direct injection
- 92 Fuel rail
- 93 Pressure-control valve
- 94 Fuel-pressure regulator
- 95 Fuel-pressure damper

96 Manifold injection

- 96 Overview
- 97 Method of operation
- 100 Instants of injection

- 101 Mixture formation
- 105 Ignition of homogeneous air/fuel mixtures
- 106 Electromagnetic fuel injectors

110 Gasoline direct injection

- 110 Overview
- 110 Method of operation
- 111 Combustion process
- 114 Operating modes
- 117 Mixture formation
- 119 Ignition
- 120 High-pressure injector

122 Operation of gasoline engines on natural gas

- 122 Overview
- 124 Design and method of operation
- 125 Mixture formation
- 127 Natural-gas injector NGI2
- 130 Natural-gas rail
- 130 Combined natural-gas pressure and temperature sensor
- 131 DS-HD-KV4 high-pressure sensor
- 132 TV-NG1 tank shutoff valve
- 133 PR-NG1 pressure-regulator module

136 Ignition systems over the years

- 136 Overview
- 138 Early ignition evolution
- 146 Battery ignition systems over the years

152 Inductive ignition system

- 152 Design
- 153 Function and method of operation
- 155 Ignition parameters
- 159 Voltage distribution
- 160 Ignition driver stage
- 161 Connecting devices and interference suppressors

162 Ignition coils

- 162 Function
- 163 Requirements
- 164 Design and method of operation
- 170 Types
- 174 Ignition-coil electronics
- 175 Electrical parameters
- 177 Simulation-based development of ignition coils

178 Spark plugs

- 178 Function
- 179 Usage
- 180 Requirements
- 181 Design
- 184 Electrode materials
- 185 Spark-plug concepts
- 186 Electrode gap
- 187 Spark position
- 188 Spark-plug heat range
- 190 Adaptation of spark plugs
- 194 Spark-plug performance
- 196 Types
- 203 Spark-plug type designations
- 204 Manufacture of spark plugs
- 206 Simulation-based spark-plug development
- 207 Handling spark plugs

212 Electronic Control

- 212 Open- and closed-loop electronic control
- 218 Motronic versions
- 224 System structure
- 226 Subsystems and main functions

234 Sensors

- 234 Automotive applications
- 235 Temperature sensors
- 236 Engine-speed sensors
- 238 Hall-effect phase sensors
- 240 Hot-film air-mass meter
- 243 Piezoelectric knock sensors
- 244 Micromechanical pressure sensors
- 246 High-pressure sensors
- 248 Two-step lambda oxygen sensors
- 252 LSU4 planar broad-band lambda oxygen sensor

254 Electronic control unit (ECU)

- 254 Operating conditions
- 254 Design
- 254 Data processing

260 Exhaust emissions

- 260 Combustion of the air/fuel mixture
- 261 Main constituents of exhaust gas
- 262 Pollutants
- 264 Factors affecting untreated emissions

268 Catalytic emission control

- 268 Overview
- 269 Three-way catalytic converter
- 272 NO_x accumulator-type catalytic converter
- 274 Catalytic-converter configurations
- 276 Catalytic-converter heating
- 280 Lambda control loop

284 Emission-control legislation

- 284 Overview
- 286 CARB legislation (passenger cars/LDTs)
- 289 EPA legislation (passenger cars/LDTs)
- 291 EU legislation (passenger cars/LDTs)
- 294 Japanese legislation (passenger cars/LDTs)
- 294 US test cycles for passenger cars and LDTs
- 296 European test cycle for passenger cars and LDTs
- 297 Japanese test cycle for passenger cars and LDTs

298 Exhaust-gas measuring techniques

- 298 Exhaust-gas test for type approval
- 300 Exhaust-gas analyzers
- 303 Evaporative-emissions test

304 Diagnosis

- 304 Monitoring during vehicle operation (on-board diagnosis)
- 307 On-board-diagnosis system for passenger cars and light-duty trucks
- 324 Diagnosis in the workshop

326 ECU development

- 326 Hardware development
- 330 Function development
- 332 Software development
- 336 Application-related adaptation
- 343 Quality management

Gasoline Engine Management
Systems and Components

Reif, K. (Ed.)
