List of Figures	xiii
List of Tables	xvii
List of Algorithms	xix
I. Focus and Objectives	1
1. Introduction	3
2. Background	5
2.1. Planning Process of Public Bus Transport Companies	5
2.2. Crew Rostering Problem	7
2.2.1. Input Information	7
2.2.2. Cyclic and Non-Cyclic Crew Rostering	11
2.2.3. Sequential vs. Integrated Approach	12
2.3. Mathematical Background	13
2.3.1. Linear and Mixed-Integer Programming	13
2.3.2. Network Flow Problem	14
2.3.3. Dantzig-Wolfe Decomposition and Column Generation	16
2.3.4. Branch-and-Bound	19
2.3.5. Metaheuristics	19
2.3.6. Multi-Objective Optimization	24
3. Crew Rostering: State of the Art	25
3.1. Cyclic Crew Rostering (CCR)	25
3.2. Non-Cyclic Crew Rostering (NCCR)	29
3.3. Multi-Objective CCR and NCCR	34
3.4. Decision Support Systems	34
4. Required Work and Scope of the Thesis	37
II. Solution Approaches	39
5. Mathematical Programming and Optimal Crew Rostering	41
5.1. The Underlying Network	41

5.2.	The Mathematical Model of NCCR	44
5.2.1.	Rota Scheduling for NCCR	44
5.2.2.	Duty Sequencing for NCCR	50
5.2.3.	Integrated Problem for NCCR	51
5.3.	The Mathematical Model of CCR	52
5.3.1.	Rota Scheduling for CCR	52
5.3.2.	Duty Sequencing for CCR	54
5.3.3.	Integrated Problem for CCR	55
6.	Computational Experiments for the MIP Models	57
6.1.	Properties of the Real-World Data Instances	57
6.2.	Results of Solving the Sequential Planning	58
6.3.	Results of Solving the Integrated Planning	62
6.4.	Summary	65
7.	Heuristics for Solving the Crew Rostering Problem	67
7.1.	Characteristics of Heuristics	67
7.1.1.	Update of Meta-Information	67
7.1.2.	Local Search Operators	68
7.1.3.	Initial Solution	72
7.2.	Metaheuristics for Solving the Rota Scheduling Problem	73
7.2.1.	Ant Colony Algorithm	74
7.2.2.	Simulated Annealing	78
7.2.3.	Tabu Search	78
7.2.4.	Computational Results	80
7.3.	Simulated Annealing for the Integrated Problem	88
7.4.	Column Generation for the Crew Rostering Problem	88
7.4.1.	Column Generation for NCCR	88
7.4.2.	Column Generation for CCR	93
7.5.	Multi-Objective Simulated Annealing for the Crew Rostering Problem	96
7.6.	Advanced Computational Results	98
7.7.	Summary	104
III.	Decision Support System	107
8.	Web-Based Decision Support System for Crew Rostering	109
8.1.	Purpose of the Web-Based DSS	109
8.2.	Functionality of the Web-Based DSS	110
8.3.	Model-Solver Integration	118
8.3.1.	Model Agent	118
8.3.2.	Solver Agent	122
8.4.	Summary	126

9. Conclusion & Outlook	127
9.1. Summary	127
9.2. Theoretical Implications	128
9.3. Practical Implications	129
Bibliography	131
A. Additional Results	141

Decision Support for Crew Rostering in Public Transit
Web-Based Optimization System for Cyclic and
Non-Cyclic Rostering

Xie, L.

2015, XIX, 172 p. 79 illus., 5 illus. in color., Softcover

ISBN: 978-3-658-08166-9
