

Contents

1	Introduction	19
1.1	Motivation and Research goals.....	19
1.2	Species.....	21
1.2.1	Arecaceae.....	21
1.2.2	<i>Krameria lappacea</i>	23
1.3	Ecosystem goods and services.....	23
1.3.1	What are ecosystem goods and services?	23
1.3.2	Importance and valuation of ecosystem goods and services	24
1.4	Ecosystem goods, legal extraction, and value chains.....	25
1.4.1	NTFPs and MAPs - Plant resources from nature.....	25
1.4.2	Legality of the extraction of and trade in NTFPs in NW South America.....	26
1.4.3	Value chain analysis.....	27
1.5	Aims and scope of the study.....	29
1.5.1	Research questions.....	29
1.5.2	Specific objectives	29
1.5.3	Overview.....	30
2	Standardized data collection on trade in palm products.....	33
2.1	Introduction	33
2.2	Protocol design	33
2.3	Structure and use of the protocol.....	34
2.3.1	Interview forms.....	34
2.3.2	Manual	34
2.3.3	Data capture table	35
2.4	Data storage and exchange	35
2.5	Problems and limitations	35
2.6	Perspective.....	36

3	Trade in Palm Products in North-Western South America.....	39
3.1	Introduction	39
3.2	Materials and Methods	40
3.3	Results	40
3.3.1	Timber.....	40
3.3.2	Thatch	45
3.3.3	Leaves Used for Ceremonial Purposes	47
3.3.4	Fibre	47
3.3.5	Palm Heart	50
3.3.6	Fruit.....	52
3.3.7	Palm Oil from Native Species.....	57
3.3.8	Vegetable Ivory	60
3.4	Discussion.....	62
3.4.1	Trade	62
3.4.2	Value Chains	63
3.4.3	Sustainability.....	64
3.4.4	Conservation through Use.....	65
3.5	Conclusions and Recommendations.....	66
4	Productivity and management of <i>Phytelephas aequatorialis</i> in Ecuador	69
4.1	Introduction	69
4.2	Materials and methods.....	71
4.2.1	Study area.....	71
4.2.2	Field data.....	71
4.2.3	Statistical analysis.....	73
4.3	Results	76
4.3.1	Population density and sex ratio	76
4.3.2	Use of leaves for thatch.....	76
4.3.3	Leaf production.....	78
4.3.4	Fruit and vegetable ivory production.....	80
4.3.5	Impact of leaf harvest on fruit production	84
4.4	Discussion.....	84
4.4.1	Distribution and population structure	84
4.4.2	Leaf production and harvest.....	85

4.4.3	Fruit production and development time	86
4.4.4	Impact of leaf harvest on fruit production	87
5	Parasitism and haustorium anatomy of <i>Krameria lappacea</i> (Dombey) Burdet & B.B.Simpson (Krameriaceae), an endangered medicinal plant from the Andean deserts	89
5.1	Introduction	89
5.2	Material and methods	93
5.2.1	Study area and plant material.....	93
5.2.2	Microscopic techniques	93
5.2.2.1	Preparation for light microscopy (LM)	93
5.2.2.2	Preparation for scanning electron microscopy (SEM)	94
5.3	Results	94
5.3.1	Hemiparasitism and host plants	94
5.3.2	Roots and root system.....	96
5.3.3	Hauatoria	96
5.3.4	Pre-hauatoria	97
5.4	Discussion.....	100
6	Now, where did all the <i>Rhatanies</i> go? Abundance, seed ecology, and regeneration of <i>Krameria lappacea</i> from the Peruvian Andes	103
6.1	Introduction	103
6.2	Material and Methods.....	104
6.2.1	Study areas	104
6.2.2	Species	105
6.2.3	Methods.....	105
6.2.3.1	Precipitation rates in the study areas	105
6.2.3.2	Soil analyses.....	109
6.2.3.3	Population inventories.....	109
6.2.3.4	Seed material and design of germination experiment	110
6.2.4	Statistical analyses of data	111
6.2.4.1	Population inventories.....	111
6.2.4.2	Germination experiment.....	111
6.3	Results	111

6.3.1	Precipitation rates in the study areas.....	111
6.3.2	Soil analyses.....	113
6.3.3	Population inventories	113
6.3.4	Fruits and Germination	114
6.4	Discussion.....	118
6.4.1	Abiotic conditions in the study areas	118
6.4.2	Population size and condition	118
6.4.3	Seed dispersal and germination	120
6.4.4	Statistical analyses of data from the population inventories.....	121
6.5	Conclusion	121
7	Conclusions	123
7.1	Trade in palm products in NW South America.....	123
7.1.1	Standardized data collection	123
7.1.2	The economically most important palm species	124
7.1.3	Socio-economic importance.....	128
7.1.4	Sustainability.....	130
7.1.5	Productivity and management of <i>Phytelephas aequatorialis</i>	131
7.1.5.1	Leaf and fruit production.....	131
7.1.5.2	Impact of leaf harvest on fruit production	131
7.2	Biology, management and sustainability of <i>Krameria lappacea</i>	132
7.2.1	Parasitism, seed ecology, abundance, and harvest impact	132
	Abstract	135
	Zusammenfassung.....	139
	Contribution to Chapters.....	143
	Publication list	145
	Congress contributions.....	147
	References.....	149
	Appendix A to Chapter 2.....	181
	Appendix B to Chapter 6	199

Relevance and Sustainability of Wild Plant Collection in
NW South America

Insights from the Plant Families Arecaceae and
Krameriaceae

Brokamp, G.

2015, XVIII, 199 p. 11 illus., Softcover

ISBN: 978-3-658-08695-4
