

INDEX – Volume 1

SECTION 1

MOTORSPORTS

Chairperson: Prof. Dr. Günter Hohenberg

- Formula 1: The show must go on?** **1**
Friedrich Indra, TU Wien
- The Audi V6 TDI for Le Mans** **19**
Ulrich Baretzky, H. Diel, W. Kotauschek, S. Dreyer, A. Schneider,
P. Kuntz, M. Mühlmeier, AUDI AG
- Anti-combustion deposit fuel development** **21**
for 2009 Toyota Formula One racing engine
Kazuo Takeuchi, Peer Pfeilmaier, TOYOTA Motorsport GmbH

HYBRID I

Chairperson: Prof. Karl-Ernst Noreikat

- PERSIST – A scalable software architecture for the control of** **37**
diverse automotive hybrid topologies
Johannes Richenhagen, Axel Schloßer, FEV GmbH; Hariharan
Venkitachalam, Stefan Pischinger, VKA, RWTH Aachen University
- Predictive operation strategy for hybrid vehicles** **57**
Jue Wang, Hermann Koch-Groeber, Heilbronn University
- Concept analysis & system design of a hybrid electric vehicle** **73**
with virtual test driving
Christian Donn, Michael Folie, Valerie Bensch, IPG Automotive GmbH;
Johannes Friebe, Jonathan Spike, Paul Goossens, Maplesoft;
Christine Schwarz, ISKO engineers AG

**Operating strategy for optimized CO₂ and NO_x emissions of
diesel-engine mild-hybrid vehicles** 93

Marcel Wüst, Michael Krüger, Dirk Naber, Lisa Cross, Andreas Greis,
Sebastian Lachenmaier, Ingo Stotz, Robert Bosch GmbH Stuttgart

**AUTOMOTIVE PROCESS AND
PRODUCTION TECHNOLOGIES I**

Chairperson: Carsten Glanz

Introduction to the Automotive business unit at the Fraunhofer IPA 113

Ivica Kolaric, Fraunhofer IPA

Electrochemical capacitors for electromobility: A review 121

Sabrina Hellstern, Peter Kitzler, Raphael Neuhaus, Ivica Kolaric, Fraunhofer IPA

**Nanocarbons in aluminium alloys for automotive applications –
Advantages, challenges and outlook** 139

R. Addinall, C. Hubrich, I. Kolaric, Fraunhofer IPA

DRIVING DYNAMICS I

Chairperson: Prof. Dr. Ferit Küçükay

**MBS-integrated control of longitudinal and lateral dynamics
for riding comfort simulation** 155

Michael Herrnberger, Victor Fäßler, TWT GmbH – Science & Innovation

**Advanced model-based control functions to design the longitudinal
vehicle dynamics in passenger cars** 169

Christoph André Malonga Makosi, Frank Uphaus, Frank Kirschbaum,
Julien Pillas, Daimler AG

**Methodological approaches for the development of a test facility
to represent system dynamic aspects in automotive engineering** 183

Kay Büttner, André Stoller, Günther Prokop, TU Dresden IAD

NETWORKING AND ARCHITECTURE

Chairperson: Prof. Dr. Eric Sax

A methodology for the optimized design of an E/E architecture component platform 203

Sebastian Graf, Michael Glaß, Jürgen Teich, University of Erlangen-Nürnberg; Daniel Platte, AUDI AG

EcoGuru – A system for the integrated management of electrified mobility systems 217

Dionysios Satikidis, Kavivarman Sivarasah, Kristian Lehmann, Ilko Hoffmann, Gabriele Scheffler, Fraunhofer IAO

Security in vehicle networks of connected cars 233

Armin Happel, Vector Informatik GmbH;
Christof Ebert, Vector Consulting Services GmbH

SMALL ENGINES AND TESTING

Chairperson: Prof. Dr. Cornel Stan

Advantages and challenges of lean operation of two-stroke engines for hand-held power tools 247

Stephan Meyer, Armin Kölmel, Tim Gegg, ANDREAS STIHL AG & Co. KG;
Alexander Trattner, Helmut Grassberger, Oliver Schögl, Stephan Schmidt,
Roland Kirchberger, Helmut Eichlseder, TU Graz

Quality characteristics of hydraulic injection quantity measurements – Transferability of non-engine tests to real systems 263

Kerstin Rensing, Thorsten Hergemöller, Franz-Paul Gulde,
Daimler AG

Software system control of a dual-injection system for future emission standards 279

Anja Blau, Oliver Abendroth, Jan-Christian Arnold, Markus Hummel,
René Passon, Bosch Engineering GmbH

SECTION 2

TESTING I – DRIVING DYNAMICS

Chairperson: Prof. Dr. Jochen Wiedemann

Product development at Opel – A synthesis of CAE and test 289
Henning Holzmann, Adam Opel AG

**Uncompromised design – Changing the vehicle development process
to meet rising design and engineering requirements** 303
Stephen Remondi, Brad Duncan, Exa Corporation

**Porsche vehicle dynamics development – Virtual approval of
car model derivatives in collaboration with road testing** 323
Thomas Maulick, Gauthier Boisdequin, Maurice van de Weerd,
Dr. Ing. h.c.F. Porsche AG

DIESEL ENGINES

Chairperson: Prof. Dr. Helmut Eichlseder

**Advanced diesel technology to meet multi-dimensional challenges
of the diesel engine** 337
Thomas Wintrich, Jürgen Hammer, Dirk Naber, Michael Raff,
Robert Bosch GmbH

**Investigation of cylinder deactivation on an off-highway diesel engine
for use in mobile machinery** 353
Wolfgang Monschein, Peter Grabner, Helmut Eichlseder, TU Graz;
Marcus Quasthoff, Pascal Kiwitz, Liebherr Machines Bulle SA

Investigations in using higher FAME-blends in DI-CR-Dieselenines 369
Bernhard Geringer, Clemens Roßboth, P. Hofmann, IFA, TU Vienna

AUTOMOTIVE PROCESS AND PRODUCTION TECHNOLOGIES II

Chairperson: Dr. Marco Schneider

Machining technologies for multi-materials 387

Andreas Gebhardt, Hector Vazquez Martinez, Tim Mayer,
Robert Beckenlechner, Philipp Esch, Fraunhofer IPA

Joining technologies for multi-material-design 405

Manuel Schuster, Michael Stroka, Fraunhofer IPA

Multi-material design for the optimization of the automotive production process 419

Noelia González Vila, Jochen Burkhardt, Christoph Birenbaum,
Fraunhofer IPA

DIAGNOSTICS AND TESTING

Chairperson: Prof. Dr. Tobias Flämig-Vetter

Highest measurement and calibration performance through cooperation of OEM, Tier1, μ C, Tool-Supplier 437

Alfred Kless, Vector Informatik GmbH

ETAS LABCAR-XiL: Bridging the gap between development phases by harmonizing concepts and tools 449

Corina Mitrohin, Christoph Störmer, Andreas Thuy, Ghizlane Tibba,
ETAS GmbH

AERODYNAMICS

Chairperson: Dr. Thomas Schütz

- Experimental and numerical study of wind noise
caused by cowl area on Volvo XC60** 471

Olga Roditcheva, Dragos Moroianu, Pär Harling, Holger Bernhardsson,
Volvo Car Corporation

- On the aerodynamic performance of two Silver Arrows from the thirties** 485

Lennart Löfdahl, Teddy Hobeika, Alexey Vdovin,
Chalmers University of Technology, Gothenburg

- Upgrade of the full-scale aeroacoustic wind tunnel of
Stuttgart University by FKFS** 497

Armin Michelbach, Reinhard Blumrich, FKFS

HYBRID II

Chairperson: Prof. Dr. Ferdinand Panik

- Predictive planning of the battery state of charge trajectory
for hybrid-electric passenger cars** 525

Gunter Heppeler, Marcus Sonntag, Oliver Sawodny,
ISYS, University of Stuttgart

- Enhanced online thermal modeling for power electronic temperatures
in (hybrid) electric vehicles** 539

Manuel Warwel, Gerd Wittler, University of Applied Sciences Esslingen;
Michèle Hirsch, Robert Bosch GmbH; Hans-Christian Reuss, FKFS/IVK,
University of Stuttgart

- Modeling of the electrical DC-link in fuel cell vehicles
for DC-DC converter control design** 555

Conrad Sagert, Prof. Dr.-Ing. Dr. h.c. Oliver Sawodny,
ISYS, University of Stuttgart

SECTION 3

E-MOBILITY I

Chairperson: Prof. Johann Tomforde

Generation 2 Lithium-Ion battery systems – Technology trends and KPIs 571

Stephan Rees, Holger Fink, Robert Bosch Battery Systems GmbH;
Joachim Fetzer, Robert Bosch GmbH

E-Mobility – Voltage classes, challenges and technical solutions 581

Edmund Erich, Delphi

Conception and implementation of a charging station for electric buses in public transport 585

Stefan Büchner, Motion Control & Power Electronics GmbH;
Sven Klausner, Martin Engel, Fraunhofer IVI

VEHICLE TECHNOLOGY I

Chairperson: Prof. Dr. Frank Gauterin

Reduction of CO₂ emissions – Optimization approach: vehicle vs. fleet 595

Michael Martin, MAGNA STEYR Engineering AG & Co KG

Simulation and new correlation method of crash sensor signals in misuse tests 609

Robert Murmann, Lothar Harzheim, Adam Opel AG;
Stefan Dominico, Frankfurt University of Applied Sciences

**AUTOMOTIVE PROCESS AND
PRODUCTION TECHNOLOGIES III**

Chairperson: Dr. Michael Hilt

Innovative approaches to resource efficiency in car body painting 625
Oliver Tiedje, Ulrich Strohbeck, Fraunhofer IPA

**Design of functional automotive components with requirements for
cleanliness** 641
Markus Rochowicz, Fraunhofer IPA

**Managing of quality and safety continuously through development
into production** 653
Stefan Gerstmayr, Fraunhofer IPA

SECTION 4

TURBO CHARGING

Chairperson: Prof. Dr. Wolfgang Thiemann

**Improving the turbocharger acoustics of a four-cylinder
gasoline engine using CFD** 665
Matthias Seltsam, Daimler AG

Control concept for the partial admission of a turbocharger turbine 679
Frederic Heidinger, Thomas Müller, Mirko Ilievski, Damian M. Vogt,
ITSM, University of Stuttgart

A design methodology for combined turbo and supercharger applications 697
Roberto Rastelli, John Shutty, BorgWarner Inc.;
Brandon Biller, Daniel Ouwenga, Eaton

ENGINE THERMAL MANAGEMENT

Chairperson: Prof. Dr. Horst Harndorf

- Engine temperature management and control: Improvements and benefits linked to the replacement of map-controlled thermostat with a mechatronic part** 717

Haitham Mezher, David Chalet, Pierre Emmanuel Prétot, Quentin Montaigne, Antoine Bouedec, Ecole Centrale de Nantes; Mickael Cormerais, Thierry Marimbordes, MANN+HUMMEL France S.A.S.; Heinz Fuchs, MANN+HUMMEL GMBH

- A switching Moving Boundary Model for the simulation of ORC plants in automotive applications** 735

Agostino Gambarotta, Marco Cialesi Esposito, Nicola Pompini, University of Parma; Marcello Canova, Ohio State University

SENSOR AND ACTUATOR TECHNOLOGY

Chairperson: Prof. Dr. Dr. Gerhard Hettich

- A redundant sensor system with driving dynamic models for automated driving** 755

J. Bechtloff, R. Isermann, TU Darmstadt

- Real time minor damage identification system and its validation in a fleet test** 775

Andre Kneifel, Sergei Gontscharov, Karl-Ludwig Krieger, University of Bremen; Klaas Hauke Baumgärtel, Hella Fahrzeugkomponenten GmbH

- Progress in determining the safety of traction batteries for electric vehicles** 787

Detlef Hoffmann, SGS Germany GmbH

INDEX – Volume 2

SECTION 1

TESTING II – AERODYNAMICS

Chairperson: Prof. Dr. Jochen Wiedemann

Modern chassis development as a result of skilfully combining testing and simulation **1**

Thomas Kersten, S. Gies, Volkswagen AG

The new aerodynamic and aeroacoustic wind tunnel of Porsche AG **13**

Hauke Stumpf, P. Röser, T. Wiegand, B. Pfäfflin, J. Ocker,
R. Müller, W. Eckert, H.-U. Kroß, Dr. Ing. h.c. F. Porsche AG;
S. Wallmann, Wallner und Brand Ingenieurgesellschaft mbH

**A modern continuous development process –
an example of interaction between
computer/test stand/road for thermal management** **29**

Raimund Siegert, Daimler AG

PLUG-IN HYBRID ELECTRIC POWERTRAINS

Chairperson: Prof. Dr. Stefan Pischinger

**PLUG-IN Hybrid from Mercedes-Benz –The next generation
PLUG-IN Hybrid with 4-cylinder gasoline engine** **31**

Uwe Keller, N. S. Schmiedler, J. Strenkert, N. Ruzicka, F. Nietfeld,
Daimler AG

**Investigation of raw exhaust and diluted exhaust emission measurement
systems with different modern plug-in hybrid electrical vehicles** **53**

Matthias Schroeder, H. Kurz, P. Baumann, HORIBA Europe GmbH;
U. Strehl, HORIBA Europe Automation Division GmbH

**Analysis of serial plug-in hybrid-drives by interconnection of
component specific simulation tools** **79**

Andreas Schmidt, M. Grimm, FKFS; H.-C. Reuss,
FKFS/IVK, University of Stuttgart

AUTOMOTIVE PROCESS AND PRODUCTION TECHNOLOGIES IV

Chairperson: Dr. Bernhard Budaker

Ergonomic lightweight design for workers in automotive production **91**

Raphael Geiger, Steve Rommel, Fraunhofer IPA

Assistive technologies for workers in the automotive industry **101**

Urban Daub, B. Budaker, U. Schneider, Fraunhofer IPA

Optimization of global production network structures **111**

Andrea Prinz, T. Bauernhansl, Fraunhofer IPA

DRIVING DYNAMICS II

Chairperson: Dr. Andreas Wagner

An effective method to identify thermodynamic tire characteristics through driving maneuvers **123**

Michael Unterreiner, P. Bortolussi, F. Büttner

Dr. Ing. h.c. F. Porsche AG;

Valid vehicle dynamics prediction by objective description of tyre behavior under real operating conditions **139**

Sebastiaan van Putten, G. Prokop, IAD, TU Dresden;

S. Einsle, A. Wagner, AUDI AG

Dynamic measurements and simulation of road surface characteristics **141**

Marcos Manuel Sánchez, W. Ressel, University of Stuttgart;

K. Tejkl, kosima GmbH,

EXHAUST GAS AFTERTREATMENT

Chairperson: Prof. Dr. Thomas Koch

Experimental investigation of urea-water sprays in selective catalytic reduction (SCR) systems 155

Yujun Liao, P. Dimopoulos Eggenschwiler, A. Spiteri, EMPA,
Swiss Federal Laboratories for Materials Science and Technology;
L. Nocivelli, Politecnico di Milano

The influence of organometallic additive in gasoline on the exhaust gas aftertreatment components 169

Wolfgang Reiser, D. Wiese, A. Binde,
Abgaszentrum der Automobilindustrie (ADA)

Impacts of Diesel-HEVs on exhaust gas aftertreatment systems for future emission legislations 185

Christoph Rathgeber, C. Beidl, VKM, TU Darmstadt;
P. Spurk, U. Göbel, Umicore AG & Co. KG

FVV PROJECTS

Chairperson: Dr. Karl Kollmann

A quasi-dimensional charge motion and turbulence model for engine process calculations 203

Christoph Bossung, IVK, University of Stuttgart;
M. Bargende, FKFS/IVK, University of Stuttgart,
O. Dingel, IAV GmbH; M.Grill, FKFS

Alteration of fuel properties at extreme conditions – Formation of deposits in common-rail injectors 223

Christian Fink, U. Schürmann, S. Crusius, R. Junk,
H. Harndorf, University of Rostock

Impact of H₂-admission to natural gas on gas engines 235

Stefan Weber, L. Baumgartner, G. Wachtmeister, TU München

SECTION 2

ADVANCED DRIVER ASSISTANCE SYSTEMS

Chairperson: Prof. Dr. Hans-Christian Reuss

- Electronic horizon: Flexible implementation
of predictive driver assistance features** 251

Jürgen Ludwig, Elektrobit Automotive GmbH

- Robust estimation of vehicle sideslip angle from variables
measured by ESC system** 265

Mario Milanese, I. Gerlero, Modelway srl;

C. Novara, Politecnico di Torino

- Application of haptic signals for driver to car
communication during autonomous driving** 279

Christoph Liedecke, IVK, University of Stuttgart; G. Baumann, FKFS;

H.-C. Reuss, FKFS/IVK, University of Stuttgart

- Exploiting the potential of eye movements analysis
in the driving context** 295

Christian Braunagel, W. Stolzmann, Daimler AG; W. Fuhl, E. Kasneci,

T. C. Kübler, W. Rosenstiel, University of Tübingen;

ELECTRIC MOTORSPORTS

Chairperson: Prof. Dr. Christian Beidl

- System design and optimization of The Ohio State University
Electric Motorcycle for the 2014 Isle of Man TT Zero Race** 309

Marcello Canova, A. Bonnell-Kangas, P. Brodsky, J. Cline,

N. Lord, The Ohio State University

- Venturi Formula E Team in the 100 % Electric
New FIA Championship** 329

Nicolas Mauduit, G. Pastor, Venturi Automobiles

The fastest electric vehicles on earth: A history of electric land speed racing and of the Venturi Buckeye Bullet program	331
Giorgio Rizzoni, D. Cooke, The Ohio State University; G. Pastor, Venturi Automobiles	
Development of a four-wheel drive electric racecar	333
Benedikt Bauersachs, D. Mitrovic, S. Schmidt, Greenteam Uni Stuttgart e.V.	
 ARENA2036	
Chairperson: Ivica Kolaric	
Automotive industry without conveyer belt and cycle – research campus ARENA2036	347
Thomas Bauernhansl, Fraunhofer IPA	
Robots as enablers for changeability in assembly applications	357
Martin Naumann, M. Fechter, Fraunhofer IPA	
Changeable and reconfigurable assembly systems – A structure planning approach in automotive manufacturing	375
Petra Foith-Förster, T Bauernhansl, Fraunhofer IPA;	
Changes in production logistics for automobile manufacturing	395
Karl-Heinz Wehking, J. Popp, IFT, University of Stuttgart	
 ENGINE COMPONENTS	
Chairperson: Prof. Dr. Bernhard Geringer	
A model based system approach to innovative smart intake products: CO₂ savings and specific performance	403
Jerome Migaud, V. Raimbault, MANN+HUMMEL France SAS; H. Bühl, A. Korn, MANN+HUMMEL GMBH; D. Chalet, H. Mezher, Q. Montaigne, P.-E. Prétot, Ecole Centrale de Nantes	
Electrical 48V coolant pump for highest thermal management requirements–	421
Michael Krappel, C. Heidecker, A. Elsäßer, S. Streng, MAHLE International GmbH	

Aspects of engine start/stop comfort	437
Christoph Steffens, G. Eisele, F. Wolter, FEV GmbH; T. Wellmann, K. Govindswamy, FEV Inc.	

E-MOBILITY II

Chairperson: Prof. Dr. Clemens Gühmann

Automatic driving and e-mobility, technical challenges and benefits	453
Klaus Dietmayer, M. Buchholz, J. Wiest, University of Ulm	
The impact of the introduction of DoIP and Ethernet for the development of electric vehicles – Use cases and benefits	457
Thomas Kotschenreuther, A. Rupalla, RA-Consulting GmbH	
Testing a battery management system (BMS) using a battery cell simulator and test automation	473
Anita Athanasas, K. Athanasas, comemso GmbH	
Integration of modularized battery technology into a stationary storage for electric vehicles	485
Felix Gottwald, M. Hübner, HTW Dresden	

VEHICLE ACOUSTICS

Chairperson: Prof. Dr. Philip Leistner

Mercedes-Benz SLS AMG Coupé Electric Drive NVH development and sound design of an electrical sports car	497
Oliver Engler, M. Hofmann, R. Mikus, T. Hirle, Mercedes-AMG GmbH	
Motion behaviour of ball joints in automotive chassis with respect to structure-borne sound	513
Thomas Jeglitzka, FKFS; J. Wiedemann, FKFS/IVK, University of Stuttgart; D. Schulze-Fehrenbach, Daimler AG	
Determination of acoustic contributions of car components to the far field using transfer functions	525
David Landes, A. Albers, M. Behrendt, Karlsruhe Institute of Technology (KIT); C. Weber, A. Siegel, S. Husung, TU Ilmenau	

Hybrid TPA method applying measurement and simulation	537
Alexander Rabofsky, T. Eggner, W. Reinalter, Magna Steyr Engineering	

SECTION 3

FUTURE IC ENGINES

Chairperson: Prof. Dr. Michael Bargende

Driving with fire – Ways to CO₂ free mobility	551
Rolf Leonhard, Robert Bosch GmbH	

The future of the diesel engine as a means of propulsion in passenger cars	565
Fritz Steinparzer, W. Stütz, P. Nefischer, BMW Motoren GmbH	

The future of gasoline engines	583
Günter Fraidl, P. Kapus, AVL List GmbH	

VEHICLE TECHNOLOGY II

Chairperson: Prof. Dr. Lutz Eckstein

Worldwide harmonized light-vehicles test procedure (WLTP) and real driving emissions (RDE) – current status of discussion and first test results	605
Helge Schmidt, TÜV NORD Mobilität GmbH & Co. KG	

The new generation of rear-wheel-drive transmissions at Mercedes-Benz	615
Ralf Koesling, T. Gödecke, K. Mühlebach, A. Franke, Daimler AG	

Quality assurance of adhesive processes in the body shop	623
Jaan Mattes Reiling, P. Middendorf, IFB, University of Stuttgart; M. Sindel, AUDI AG	

Next generation car– Lightweight design through function integration in vehicle structures	635
Gundolf Kopp, S. Brückmann, M. Kriescher, M. Ruff, H. E. Friedrich, The German Aerospace Center – Institute of Vehicle Concepts	

ENGINE CONTROL

Chairperson: Prof. Dr. Peter Eilts

Optimization of DPF regeneration with a cylinder pressure based combustion control 645

Nikolaus Held, T. Betz, F. Duvinage, P. Lückert, Daimler AG

Trigger wheel based misfire detection for sports cars with eight or more cylinders 663

Christoph Junker, H. Schmid, Bosch Engineering GmbH

Intelligent control of automated calibration of engine management systems by using a new process scheduler 675

Sven Meyer, IAV GmbH

SECTION 4

VEHICLE THERMAL MANAGEMENT

Chairperson: Prof. Dr. Stefan Böttinger

Increase in range of a battery electric vehicle by means of predictive thermal management 697

Markus Auer, IVK, University of Stuttgart; T. Kuthada, FKFS; N. Widdecke, J. Wiedemann, FKFS/IVK, University of Stuttgart

Improving 1D simulations of thermal management systems with embedded 3D CFD 711

Christoph Janssen, M. Effenberger, R. Gneiting, A. Kleber, S. Larpent, R. Stauch, MAHLE Behr GmbH & Co. KG

Impact of visual preconditioning on the comfort rating of the vehicle interior 725

Roland Mandel, T. Maier, IKTD, University of Stuttgart; J. Klarzyk, EDAG Engineering AG

Thermal management of Li-ion batteries and its influence on electrical performance 737

Daniel Werner, A. Loges, T. Wetzel, Karlsruhe Institute of Technology (KIT); O. Heeg, N. Sautter, A. Wiebelt, MAHLE Behr GmbH & Co. KG

SOFTWARE PROCESSES

Chairperson: Prof. Dr. Karl-Ludwig Krieger

Model-based software development – solutions for series software 753

Oliver Schneider, T. Mindel, J. Liebmann,
R. Gonzalez Ramos, ZF Friedrichshafen AG

From conductive charging to inductive charging – Challenges for the software of the OnBoard Charger ECU 763

Dirk Großmann, Vector Informatik GmbH

Physical modeling of environment detection sensors, based on GPU-supported shader technology 769

Sebastian Hafner, TESIS DYNAware GmbH

RAILWAY VEHICLES

Chairperson: Thomas Moser

Contactless energy transfer for main-line rail vehicles 789

Sebastian Streit, J. Winter, German Aerospace Center

BPLE – brake pipe length estimation (detection of brake pipe consistency for freight trains) 801

Benjamin Kumpfe, Knorr Bremse Systeme für Schienenfahrzeuge GmbHG

15. Internationales Stuttgarter Symposium

Automobil- und Motorentechnik

Bargende, M.; Reuss, H.-C.; Wiedemann, J. (Hrsg.)

2015, XXXVI, 1599 S. 500 Abb. In 2 Bänden, nicht
einzeln erhältlich., Softcover

ISBN: 978-3-658-08843-9
