

# Contents

<b>1</b>	<b>Introduction and Motivation</b>	<b>1</b>
<b>2</b>	<b>Theory and Background</b>	<b>7</b>
2.1	The Completeness of Quantum Theory . . . . .	7
2.2	The Kochen-Specker Theorem . . . . .	11
2.2.1	Kochen and Specker's Original Proof . . . . .	14
2.2.2	The Peres-Mermin Square . . . . .	22
2.3	Testing the Kochen-Specker Theorem . . . . .	23
2.4	Non-Contextuality Inequalities . . . . .	24
2.4.1	The CHSH-Inequality . . . . .	25
2.4.2	An Inequality from the Peres-Mermin Square . . . . .	26
2.5	The Finite-Precision Problem . . . . .	26
2.5.1	MKC Models . . . . .	27
2.5.2	Answers to the Finite-Precision Problem . . . . .	27
2.6	The Problem of Compatibility . . . . .	30
2.6.1	A Kochen-Specker Test on Separated Qutrits . . . . .	31
2.6.2	Extended KS Inequalities . . . . .	31
<b>3</b>	<b>Noise-Robustness of Kochen-Specker Tests</b>	<b>35</b>
3.1	The Measurement Process . . . . .	35
3.2	Noise Models and Quantum Operations . . . . .	36
3.3	Depolarizing Noise . . . . .	41
3.3.1	The CHSH-Inequality . . . . .	42
3.3.2	The Extended CHSH-Inequality . . . . .	43
3.3.3	The Peres-Mermin Inequality . . . . .	44
3.4	Bit-Flipping . . . . .	45
3.4.1	The CHSH-Inequality . . . . .	45
3.4.2	The Extended CHSH-Inequality . . . . .	46

3.4.3	The Peres-Mermin Inequality . . . . .	47
3.5	Amplitude Damping . . . . .	47
3.5.1	The CHSH-Inequality . . . . .	49
3.5.2	The Extended CHSH-Inequality . . . . .	50
3.5.3	The Peres-Mermin Inequality . . . . .	51
3.6	Phase Damping . . . . .	51
3.6.1	The CHSH-Inequality . . . . .	52
3.6.2	The Extended CHSH-Inequality . . . . .	53
3.6.3	The Peres-Mermin Inequality . . . . .	54
3.7	Summary . . . . .	54
<b>4</b>	<b>Statistical Models for Noisy Measurements</b>	<b>59</b>
4.1	Conceptual Model of the Measurement Process . . . .	59
4.1.1	Ontic State Space . . . . .	60
4.1.2	Violations of Compatibility . . . . .	61
4.2	Markov Models . . . . .	65
4.2.1	Violating KS Inequalities Probabilistically . . .	66
4.2.2	Violating Extended KS-Inequalities . . . . .	69
<b>5</b>	<b>Noncontextual Evolution</b>	<b>75</b>
5.1	Noncontextually Evolving Systems . . . . .	75
5.2	Inequalities for All Noncontextually Evolving Systems	77
5.2.1	Generalizing the CHSH-Inequality . . . . .	79
5.2.2	Generalizing the Peres-Mermin Inequality . . .	81
5.3	An Extension of the KS-Theorem . . . . .	84
5.3.1	Contextually Evolving Hidden Variables . . . .	87
<b>6</b>	<b>Conclusion</b>	<b>95</b>
<b>Appendix</b>		
<b>A</b>	<b>Some Tables of Values</b>	<b>99</b>
A.1	Possible Values for the CHSH-Inequality . . . . .	99
A.2	Possible Values for the CHSH*-Inequality . . . . .	100
<b>Bibliography</b>		<b>101</b>

Testing Quantum Contextuality

The Problem of Compatibility

Szangolies, J.

2015, XVIII, 108 p. 25 illus., Softcover

ISBN: 978-3-658-09199-6
