

Contents

Preface	VII
Acknowledgements	XIII
Abbreviations, Constants and Symbols	XIX
1 Synthetic Instruments	1
1.1 Fundamental Idea	1
1.2 Critical Millimeter-Wave Components for Synthetic Automatic Test Systems	3
References	10
2 Resistive Diode Frequency Multipliers	11
2.1 Theoretical Limitations	12
2.2 Schottky Barrier Diode Modelling	17
2.2.1 Junction Modelling	17
2.2.2 Diode Architectures	25
2.2.3 Linear Parts of Diode Model	31
2.2.4 Market Overview	48
2.3 Single Tone Large Signal (LS) Analysis	51
2.4 Frequency Multiplier Design	58
2.4.1 Multiplier Architectures	58
2.4.2 Optimum Embedding Impedances	64
2.4.3 Design Flow	67
2.5 Octave Bandwidth Tripler for 20 to 40 GHz	69
2.6 Frequency Doublers and Triplers for 50/60 to 110 GHz	77
2.6.1 Frequency Tripler $\times 3_{HE1}$ (#1)	92
2.6.2 Frequency Tripler $\times 3_{uFIN}$ (#2)	100

2.6.3	Frequency Tripler x3_SIDE (#3)	107
2.6.4	Frequency Doubler x2_uFIN (#4)	115
2.6.5	Frequency Doubler x2_uFINring (#5)	121
2.7	D-Band Frequency Doubler and Y-Band Frequency Tripler	131
2.7.1	Dolph-Chebyshev Taper	150
2.7.2	Uncertainty Analysis of Spectral Power Measurements above 50 GHz	152
	References	163
3	Planar Directional Couplers and Filters	165
3.1	Theoretical Foundations of Cascaded Coupled Waveguides	166
3.2	Backward Wave Directional Couplers	181
3.2.1	Synthesis Procedure	182
3.2.2	Dielectric Overlay Technique	196
3.2.3	Wiggly-Line Technique	213
3.3	Codirectional Couplers	227
3.4	Impedance Terminations and Attenuators	236
3.5	Edge and Broadside Coupled Line Filters with Equalized Phase Velocities	250
3.5.1	Synthesis Procedure	250
3.5.2	Experimental Results	252
	References	263
4	Triple Balanced Mixers	265
4.1	General Comments on Commutative Mixers	266
4.2	Analytical and Numerical Methods for Mixer Analysis	267
4.2.1	Large Signal / Small Signal (LSSS) Analysis .	269
4.3	Balanced Mixer Configurations	288
4.4	Planar Crossed Quad Triple Balanced Mixer	298
	References	326
5	Zero Bias Schottky Power Detectors	327
5.1	Theoretical Foundations	327

5.2	Power Detector Architectures	336
5.3	Power Detector for 1 to 40 GHz	338
5.4	Power Detector for 60 to 110 GHz	345
	References	358
6	Integrated Front End Assemblies	359
6.1	Planar Signal Source for 20 to 40 GHz	360
6.2	Planar Signal Source for 60 to 110 GHz	372
	References	382
7	Summary	383
8	Zusammenfassung	391
A	Filter Synthesis	401
	Publications	421
	About the Author	425

Critical mm-Wave Components for Synthetic Automatic
Test Systems

Hrobak, M.

2015, XXXII, 425 p. 294 illus., Softcover

ISBN: 978-3-658-09762-2
