

## Preface and Acknowledgement

This publication presents the results of my PhD research which started in 2010 and concluded with the submission and defense of my thesis in the course of 2014. The support of many people was crucial to the completion of this long journey. First of all, I would like to thank my supervisors at the Freie Universität Berlin, Professor Guenther Maihold and Professor Miranda Schreurs, for their critical comments, intellectual rigor and the freedom to develop this PhD project according to my own ideas.

The German Institute for International and Security Affairs (SWP) was the intellectual home of my PhD years. It provided an inspiring and supportive environment as well as close interactions with researchers and decision-makers alike. I would like to extend very special thanks to my SWP mentor Kirsten Westphal. With her expertise on global energy governance, she was a major source of inspiration for my PhD research. Joint projects – be it for academic purposes or policy advice – also gave me the opportunity to grow professionally. I would also like to express my gratitude to Claudia Zilla, who involved me in policy advice early on, supported my research and was always an inspiring discussion partner, not only on Brazilian matters. Thanks to Susanne Dröge, I had the freedom to pursue my PhD research and involve myself in many interesting SWP projects. Sabine Herrmann was a great source of moral support.

My research benefited considerably from the constructive PhD colloquia at SWP and the Environmental Policy Research Center at the Freie Universität Berlin. The International Futures Program of the Federal Foreign Office allowed for a very fruitful exchange of ideas with young professionals from different emerging countries on a range of global issues. I am particularly grateful to a number of colleagues, whose detailed and constructive feedback was of tremendous value to the success of this PhD project: Leonie Beining, Marianne Beisheim, Oliver Geden, Roberto Guimarães, Peer Krumrey, Johannes Plagemann, Henriette Rytz, Ursula Stiegler, Sonja Thielges, Kathrin Ulmer, Florian Wassenberg, and Clara Weinhardt. In addition, I would like to thank Isabel Faulhaber for sharing her quantitative expertise, Sandra Boyd for reliable and quick proofreading, and Inder Kumar Popat and the SWP library staff for all their support.

I am very thankful to the host institutions of my research stay in Brazil: the Brazilian Center for International Relations (CEBRI) in Rio de Janeiro and the Division for International Studies, Political and Economic Relations at the Institute

for Applied Economic Research (IPEA-Dinte) in Brasília. They not only provided a working space, but also served as a door-opener and source of intellectual inspiration. Special thanks go to Selenia Herrera and Guilherme Schmitz, who considerably enriched my research stay in Brazil. For the analysis of the German and the Brazilian ideas on global renewable energy governance, the insights of 75 interviews were of utmost importance. I would like to thank all my interview partners in Brazil and Germany for sharing their time and thoughts, making this PhD project a truly inspiring journey.

Last but not least, I would like to express my deepest gratitude to my friends and family, whose backing of all kinds was not only central for the completion of this thesis, but is my backbone in the ups and downs of life. Of this group of people, I would like to single out my uncle Michael Bunte, my parents Sabine and Burkhard Röhrkasten and my sisters Regine Sprenger and Miriam Röhrkasten, who – as always – deserve my deepest thanks. A special ‘thank you’ also goes to Alex Farid for his moral support and patience during the last stages of this journey – and for helping me getting my priorities right in life.
