

About this Book

The Information Security Solutions Europe Conference (ISSE) was started in 1999 by eema and TeleTrusT with the support of the European Commission and the German Federal Ministry of Technology and Economics. Today the annual conference is a fixed event in every IT security professional's calendar.

The range of topics has changed enormously since the founding of ISSE. In addition to our ongoing focus on securing IT applications and designing secure business processes, protecting against attacks on networks and their infrastructures is currently of vital importance. The ubiquity of social networks has also changed the role of users in a fundamental way: requiring increased awareness and competence to actively support systems security. ISSE offers a perfect platform for the discussion of the relationship between these considerations and for the presentation of the practical implementation of concepts with their technical, organisational and economic parameters.

From the beginning ISSE has been carefully prepared. The organisers succeeded in giving the conference a profile that combines a scientifically sophisticated and interdisciplinary discussion of IT security solutions while presenting pragmatic approaches for overcoming current IT security problems.

An enduring documentation of the presentations given at the conference which is available to every interested person thus became important. This year sees the publication of the twelfth ISSE book – another mark of the event's success – and with about 22 carefully edited papers it bears witness to the quality of the conference.

An international programme committee is responsible for the selection of the conference contributions and the composition of the programme:

- **Ammar Alkassar** (TeleTrusT/Sirrix AG)
- **John Colley** ((ISC)²)
- **Jos Dumortier** (time.lex)
- **Walter Fumy** (Bundesdruckerei)
- **David Goodman** (EEMA)
- **Michael Hartmann** (SAP)
- **Marc Kleff** (NetApp)
- **Jaap Kuipers** (Id Network)
- **Patrick Michaelis** (AC – The Auditing Company)
- **Lennart Oly** (ENX)

- **Norbert Pohlmann** (TeleTrusT/if(is))
- **Bart Preneel** (KU Leuven)
- **Helmut Reimer** (TeleTrusT)
- **Wolfgang Schneider** (Fraunhofer Institute SIT)
- **Marc Sel** (PwC)
- **Jon Shamah** (EEMA/EJ Consultants)
- **Franky Thrasher** (Electrabel)
- **Erik R. van Zuuren** (TrustCore)
- **Claire Vishik** (Intel)

The editors have endeavoured to allocate the contributions in these proceedings – which differ from the structure of the conference programme – to topic areas which cover the interests of the readers. With this book TeleTrusT aims to continue documenting the many valuable contributions to ISSE.
