

# Contents

<b>Preface</b>	<b>xi</b>
<b>0 Introduction</b>	<b>1</b>
0.1 Indeterminacy . . . . .	1
0.2 Frequency . . . . .	2
0.3 Belief Degree . . . . .	3
0.4 Summary . . . . .	7
<b>1 Uncertain Measure</b>	<b>9</b>
1.1 Measurable Space . . . . .	9
1.2 Event . . . . .	11
1.3 Uncertain Measure . . . . .	12
1.4 Uncertainty Space . . . . .	16
1.5 Product Uncertain Measure . . . . .	16
1.6 Independence . . . . .	21
1.7 Polyrectangular Theorem . . . . .	23
1.8 Conditional Uncertain Measure . . . . .	25
1.9 Bibliographic Notes . . . . .	28
<b>2 Uncertain Variable</b>	<b>29</b>
2.1 Uncertain Variable . . . . .	29
2.2 Uncertainty Distribution . . . . .	31
2.3 Independence . . . . .	43
2.4 Operational Law . . . . .	44
2.5 Expected Value . . . . .	66
2.6 Variance . . . . .	76
2.7 Moment . . . . .	79
2.8 Entropy . . . . .	82
2.9 Distance . . . . .	88
2.10 Conditional Uncertainty Distribution . . . . .	90
2.11 Uncertain Sequence . . . . .	93
2.12 Uncertain Vector . . . . .	98
2.13 Bibliographic Notes . . . . .	102

<b>3</b>	<b>Uncertain Programming</b>	<b>105</b>
3.1	Uncertain Programming . . . . .	105
3.2	Numerical Method . . . . .	108
3.3	Machine Scheduling Problem . . . . .	110
3.4	Vehicle Routing Problem . . . . .	113
3.5	Project Scheduling Problem . . . . .	117
3.6	Uncertain Multiobjective Programming . . . . .	121
3.7	Uncertain Goal Programming . . . . .	122
3.8	Uncertain Multilevel Programming . . . . .	123
3.9	Bibliographic Notes . . . . .	124
<b>4</b>	<b>Uncertain Statistics</b>	<b>127</b>
4.1	Expert's Experimental Data . . . . .	127
4.2	Questionnaire Survey . . . . .	128
4.3	Empirical Uncertainty Distribution . . . . .	129
4.4	Principle of Least Squares . . . . .	130
4.5	Method of Moments . . . . .	132
4.6	Multiple Domain Experts . . . . .	133
4.7	Delphi Method . . . . .	134
4.8	Bibliographic Notes . . . . .	135
<b>5</b>	<b>Uncertain Risk Analysis</b>	<b>137</b>
5.1	Loss Function . . . . .	137
5.2	Risk Index . . . . .	139
5.3	Series System . . . . .	140
5.4	Parallel System . . . . .	140
5.5	$k$ -out-of- $n$ System . . . . .	141
5.6	Standby System . . . . .	141
5.7	Structural Risk Analysis . . . . .	142
5.8	Investment Risk Analysis . . . . .	145
5.9	Value-at-Risk . . . . .	146
5.10	Expected Loss . . . . .	147
5.11	Hazard Distribution . . . . .	148
5.12	Bibliographic Notes . . . . .	149
<b>6</b>	<b>Uncertain Reliability Analysis</b>	<b>151</b>
6.1	Structure Function . . . . .	151
6.2	Reliability Index . . . . .	152
6.3	Series System . . . . .	153
6.4	Parallel System . . . . .	153
6.5	$k$ -out-of- $n$ System . . . . .	154
6.6	General System . . . . .	154
6.7	Bibliographic Notes . . . . .	155

<b>7</b>	<b>Uncertain Propositional Logic</b>	<b>157</b>
7.1	Uncertain Proposition . . . . .	157
7.2	Truth Value . . . . .	159
7.3	Chen-Ralescu Theorem . . . . .	161
7.4	Boolean System Calculator . . . . .	163
7.5	Uncertain Predicate Logic . . . . .	163
7.6	Bibliographic Notes . . . . .	167
<b>8</b>	<b>Uncertain Entailment</b>	<b>169</b>
8.1	Uncertain Entailment Model . . . . .	169
8.2	Uncertain Modus Ponens . . . . .	171
8.3	Uncertain Modus Tollens . . . . .	172
8.4	Uncertain Hypothetical Syllogism . . . . .	174
8.5	Bibliographic Notes . . . . .	175
<b>9</b>	<b>Uncertain Set</b>	<b>177</b>
9.1	Uncertain Set . . . . .	177
9.2	Membership Function . . . . .	183
9.3	Independence . . . . .	192
9.4	Set Operational Law . . . . .	196
9.5	Arithmetic Operational Law . . . . .	200
9.6	Expected Value . . . . .	204
9.7	Variance . . . . .	210
9.8	Entropy . . . . .	211
9.9	Distance . . . . .	215
9.10	Conditional Membership Function . . . . .	216
9.11	Uncertain Statistics . . . . .	216
9.12	Bibliographic Notes . . . . .	220
<b>10</b>	<b>Uncertain Logic</b>	<b>221</b>
10.1	Individual Feature Data . . . . .	221
10.2	Uncertain Quantifier . . . . .	222
10.3	Uncertain Subject . . . . .	229
10.4	Uncertain Predicate . . . . .	232
10.5	Uncertain Proposition . . . . .	235
10.6	Truth Value . . . . .	236
10.7	Algorithm . . . . .	240
10.8	Linguistic Summarizer . . . . .	243
10.9	Bibliographic Notes . . . . .	246
<b>11</b>	<b>Uncertain Inference</b>	<b>247</b>
11.1	Uncertain Inference Rule . . . . .	247
11.2	Uncertain System . . . . .	251
11.3	Uncertain Control . . . . .	255
11.4	Inverted Pendulum . . . . .	255

11.5 Bibliographic Notes . . . . .	257
<b>12 Uncertain Process</b>	<b>259</b>
12.1 Uncertain Process . . . . .	259
12.2 Uncertainty Distribution . . . . .	261
12.3 Independence and Operational Law . . . . .	265
12.4 Independent Increment Process . . . . .	266
12.5 Stationary Independent Increment Process . . . . .	268
12.6 Extreme Value Theorem . . . . .	273
12.7 First Hitting Time . . . . .	277
12.8 Time Integral . . . . .	280
12.9 Bibliographic Notes . . . . .	282
<b>13 Uncertain Renewal Process</b>	<b>283</b>
13.1 Uncertain Renewal Process . . . . .	283
13.2 Block Replacement Policy . . . . .	287
13.3 Renewal Reward Process . . . . .	288
13.4 Uncertain Insurance Model . . . . .	290
13.5 Age Replacement Policy . . . . .	294
13.6 Alternating Renewal Process . . . . .	298
13.7 Bibliographic Notes . . . . .	302
<b>14 Uncertain Calculus</b>	<b>303</b>
14.1 Liu Process . . . . .	303
14.2 Liu Integral . . . . .	308
14.3 Fundamental Theorem . . . . .	313
14.4 Chain Rule . . . . .	315
14.5 Change of Variables . . . . .	315
14.6 Integration by Parts . . . . .	316
14.7 Bibliographic Notes . . . . .	318
<b>15 Uncertain Differential Equation</b>	<b>319</b>
15.1 Uncertain Differential Equation . . . . .	319
15.2 Analytic Methods . . . . .	322
15.3 Existence and Uniqueness . . . . .	327
15.4 Stability . . . . .	329
15.5 $\alpha$ -Path . . . . .	331
15.6 Yao-Chen Formula . . . . .	332
15.7 Numerical Methods . . . . .	343
15.8 Bibliographic Notes . . . . .	345
<b>16 Uncertain Finance</b>	<b>347</b>
16.1 Uncertain Stock Model . . . . .	347
16.2 Uncertain Interest Rate Model . . . . .	358
16.3 Uncertain Currency Model . . . . .	359

16.4 Bibliographic Notes . . . . .	363
<b>A Probability Theory</b>	<b>365</b>
A.1 Probability Measure . . . . .	365
A.2 Random Variable . . . . .	369
A.3 Probability Distribution . . . . .	370
A.4 Independence . . . . .	372
A.5 Operational Law . . . . .	373
A.6 Expected Value . . . . .	376
A.7 Variance . . . . .	382
A.8 Moment . . . . .	386
A.9 Entropy . . . . .	388
A.10 Random Sequence . . . . .	390
A.11 Law of Large Numbers . . . . .	395
A.12 Conditional Probability . . . . .	399
A.13 Random Set . . . . .	401
A.14 Stochastic Process . . . . .	403
A.15 Stochastic Calculus . . . . .	405
A.16 Stochastic Differential Equation . . . . .	406
<b>B Chance Theory</b>	<b>409</b>
B.1 Chance Measure . . . . .	409
B.2 Uncertain Random Variable . . . . .	413
B.3 Chance Distribution . . . . .	415
B.4 Operational Law . . . . .	417
B.5 Expected Value . . . . .	424
B.6 Variance . . . . .	428
B.7 Law of Large Numbers . . . . .	431
B.8 Uncertain Random Programming . . . . .	433
B.9 Uncertain Random Risk Analysis . . . . .	436
B.10 Uncertain Random Reliability Analysis . . . . .	439
B.11 Uncertain Random Graph . . . . .	440
B.12 Uncertain Random Network . . . . .	444
B.13 Uncertain Random Process . . . . .	445
B.14 Bibliographic Notes . . . . .	450
<b>C Frequently Asked Questions</b>	<b>453</b>
C.1 What is the meaning that an object follows the laws of probability theory? . . . . .	453
C.2 Why does frequency follow the laws of probability theory? . .	454
C.3 Why is probability theory unable to model belief degree? . .	455
C.4 Why should belief degree be understood as an oddsmaker's betting ratio rather than a fair one? . . . . .	457
C.5 Why does belief degree follow the laws of uncertainty theory?	458

C.6	What is the difference between probability theory and uncertainty theory? . . . . .	459
C.7	What goes wrong with Cox's theorem? . . . . .	459
C.8	What is the difference between possibility theory and uncertainty theory? . . . . .	460
C.9	Why is fuzzy variable unable to model indeterminate quantity? . . . . .	460
C.10	Why is fuzzy set unable to model unsharp concept? . . . . .	461
C.11	Does the stock price follow stochastic differential equation or uncertain differential equation? . . . . .	462
C.12	How did "uncertainty" evolve over the past 100 years? . . . . .	464
