Contents

1 Introduction 1
1.1 Background 1
1.1.1 Academic Background 1
1.1.2 Engineering Background 3
1.2 Physical Analysis 5
1.3 Questions Proposed 7
1.4 Research Status 8
1.4.1 Rarefied Gas Effects 8
1.4.2 Nonequilibrium Real Gas Effects 10
1.4.3 Coupling Interaction Between Rarefied Gas Effects and Nonequilibrium Real Gas Effects 11
1.5 Content and Innovations of this Thesis 13
1.5.1 Methodology 13
1.5.2 Research Content 14
1.5.3 Innovations of this Work 16
References 17

2 Theoretical Modeling of Aeroheating Under Rarefied Gas Effects 21
2.1 Problem Description 21
2.2 Analysis and Research Idea 24
2.3 Nonlinear Heat Transfer in Hypersonic Rarefied Flows 24
2.3.1 Theoretical Basis 24
2.3.2 Rarefied Flow Criterion 27
2.3.3 Analysis of Flow Field Structure Features 31
2.3.4 Flow Regime Classification and Flow Field Structure Discussion 34
2.3.5 Aeroheating Performance and Bridging Function 35
2.3.6 DSMC Results and Experimental Data 38
2.3.7 Extension and Discussion of the Rarefaction Criterion . . . 40

2.4 Engineering Applications 42
2.5 Chapter Summary 43
References 44

3 Theoretical Modeling of the Chemical Nonequilibrium Flow Behind a Normal Shock Wave 47
3.1 Problem Description 48
3.2 Physical Model 49
3.3 Dissociation-Recombination Reaction Rate Equation 52
3.4 Analysis of Post-shock Chemical Nonequilibrium Flow Features 55
3.4.1 Equilibrium Degree of Dissociation 55
3.4.2 Characteristic Nonequilibrium Scale 57
3.4.3 Nonequilibrium Transient Process 60
3.5 Engineering Applications 62
3.6 Chapter Summary 63
References 63

4 Theoretical Modeling of Aeroheating Under Nonequilibrium Real Gas Effects 65
4.1 Problem Description and Modeling 66
4.2 Dissociation Nonequilibrium Flow Outside SPBL 69
4.2.1 Governing Equation 70
4.2.2 Explicitly Analytical Shock Mapping Relation 72
4.2.3 Nonequilibrium Flow Criterion and Flow Regime Classification 75
4.2.4 Validations 76
4.2.5 Discussions 79
4.3 Recombination Nonequilibrium Flow Inside SPBL and Heat Transfer 81
4.3.1 Governing Equation 82
4.3.2 Recombination Nonequilibrium Flow Criterion 82
4.3.3 Bridging Function of the Nonequilibrium SPBL Heat Transfer 83
4.3.4 Features of Nonequilibrium SPBL Heat Transfer 85
4.4 Discussion of Flow Similarity 87
4.5 Engineering Applications 90
4.6 Chapter Summary 91
References 91

5 Conclusions and Prospect 93
5.1 Conclusions 93
5.2 Prospect 94
