

Contents

Preface	V
Contents.....	VII
Part I Outline	1
1 Introduction.....	3
2 Abstracts	5
Part II Sensors and Actuators	17
3 New Concepts for Distributed Actuators and Their Control.....	19
4 Artificial Muscles, Made of Dielectric Elastomer Actuators - A Promising Solution for Inherently Compliant Future Robots	33
5 Musculoskeletal Robots and Wearable Devices on the Basis of Cable- driven Actuators.....	42
6 Capacitive Tactile Proximity Sensing: From Signal Processing to Applications in Manipulation and Safe Human-Robot Interaction	54
Part III Modeling, Simulation and Control	67
7 Perception of Deformable Objects and Compliant Manipulation for Service Robots	69
8 Soft Robot Control with a Behaviour-Based Architecture.....	81
9 Optimal Exploitation of Soft-Robot Dynamics	92
10 Simulation Technology for Soft Robotics Applications	100
11 Concepts of Softness for Legged Locomotion and Their Assessment..	120
12 Mechanics and Thermodynamics of Biological Muscle - A Simple Model Approach	134
Part IV Materials, Design and Manufacturing	145
13 Nanostructured Materials for Soft Robotics – Sensors and Actuators..	147
14 Fibrous Materials and Textiles for Soft Robotics	157
15 Opportunities and Challenges for the Design of Inherently Safe Robots.....	173
16 Aspects of Human Engineering – Bio-optimized Design of Wearable Machines.....	184
17 3D Printed Objects and Components Enabling Next Generation of True Soft Robotics	198
Part V Soft Robotic Applications	209
18 Soft Hands for Reliable Grasping Strategies	211

19	Task-specific Design of Tubular Continuum Robots for Surgical Applications.....	222
20	Soft Robotics with Variable Stiffness Actuators: Tough Robots for Soft Human Robot Interaction	231
21	Soft Robotics Research, Challenges, and Innovation Potential, Through Showcases.....	255
22	Flexible Robot for Laser Phonomicrosurgery.....	265
23	Soft Components for Soft Robots.....	272
24	Soft Robotics for Bio-mimicry of Esophageal Swallowing.....	282

Soft Robotics

Transferring Theory to Application

Verl, A.; Albu-Schäffer, A.; Brock, O.; Raatz, A. (Eds.)

2015, VIII, 291 p. 100 illus., Hardcover

ISBN: 978-3-662-44505-1
