

Contents

1	Introduction	1
1.1	Scope of the Book	1
1.2	Possible Approaches to This Text	2
1.3	Outline of the Book	4
1.4	Brief Discussion of Core Terms: Humanoid, Evolutionary, Robotics	5
1.5	Very Briefly: Why Evolve Bioinspired/Humanoid Robots?	6
1.6	Conclusion	7
2	Evolutionary Algorithms and the Control of Systems	9
2.1	Control of Systems	9
2.2	Recent Rapid Developments in the Field of Intelligent Robotics	9
2.3	Evolutionary Algorithms	10
2.3.1	Genetic Algorithms (GA)	10
2.3.2	Genetic Programming (GP)	15
2.3.3	Evolutionary Strategies (ES)	15
2.3.4	Covariance Matrix Adaptation (CMA) Approach	15
2.3.5	Neuroevolution of Augmenting Technologies (NEAT)	16
2.4	Evolutionary Algorithms for Control—A Simple Example	16
3	Evolutionary Robotics (ER)	21
3.1	Introduction to Evolutionary Robotics	21
3.1.1	Categorisation of Research in ER in Terms of Level of Biological Inspiration and Level of Physical Realisation	21
3.2	Natural Versus Artificial Embodied Evolution	22
3.3	Fitness Functions for Evolutionary Robotics	22
3.3.1	Fitness Function Formulation	23
3.3.2	Design of a Tailored Fitness Function	25

3.4	Evolving “Interesting” Behaviours—What Exactly Constitutes an Interesting Behaviour?	27
3.5	Why Is ER Still a “Fringe” Topic for Many Robotics Researchers?	28
3.5.1	Four Critical Areas for Success in the Application of EHR Techniques.	29
3.6	How Might Perceived Failings in the ER Field Be Addressed?	31
4	Humanoid Robots, Their Simulators, and the Reality Gap	33
4.1	Introduction to Humanoid Robotics.	33
4.1.1	Some Potential Applications of Humanoid Robots . . .	34
4.1.2	Our Criterion for Inclusion as a Humanoid.	35
4.2	Our “Definition” of Humanoid (Levels of Anthropomorphicity)	35
4.2.1	Level 0: Replicant.	36
4.2.2	Level 1: Android	36
4.2.3	Level $n-3$: Humanoid	36
4.2.4	Level $n-2$: IH (Inferior Humanoid).	36
4.2.5	Level $n-1$: HI (Human-Inspired)	37
4.2.6	Level n : BFH (Built-for-Human).	37
4.3	Brief Overview of Selected Humanoid Robot Platforms.	37
4.3.1	Introduction	37
4.3.2	Humanoid Robot Platforms Used in Evolutionary Robotics Experiments	37
4.3.3	Other Humanoid Robot Platforms	39
4.3.4	Conclusion.	45
4.4	Simulators Used for the Evolution of Humanoid Robots	46
4.4.1	Introduction	46
4.4.2	Conclusion and Summary	50
4.5	Crossing the “Reality Gap” Between Simulation and Embodied Robots	51
4.5.1	Introduction	51
4.5.2	The Reality Gap, and Approaches to Minimise Its Impact	51
4.6	Conclusion.	58
5	Evolutionary Humanoid Robotics (EHR)	59
5.1	Background to, and Motivation for, Evolutionary Humanoid Robotics.	59
5.1.1	Why Treat Evolutionary Humanoid Robotics as a Special Case of Evolutionary Robotics?	60
5.1.2	Why Are Evolutionary Techniques Not Currently More Widely Applied to Humanoid Robot Design?	61

5.2	Approaches to EHR	62
5.2.1	Evolution of Humanoid “Brain”	62
5.2.2	Evolution of Humanoid “Body”/Coevolution of “Body” and “Brain”	62
5.3	Overview of Main Application Domains	63
5.3.1	Bipedal Locomotion	63
5.3.2	Dance	64
5.3.3	Other Locomotive Skills—Kicking, Crawling, Jumping, Ladder Climbing.	66
5.3.4	Grasping and Manipulation	66
5.3.5	The Investigation of Human Motor/Locomotive Skills.	67
5.3.6	Other Application Areas	69
5.4	Commercial Applications of EHR.	70
5.5	Initial Research in EHR.	72
5.5.1	EHR “Prehistory”—Developments in EHR Prior to 2000	73
5.6	Simple Illustrative Example: The Evolution of Dance	81
5.6.1	An Example Outline Interactive Evolutionary Algorithm for Generating an “Evolutionary Dance”. . .	83
6	The State of the Art in EHR.	85
6.1	Developments in EHR from 2000 to the Present.	85
6.1.1	The Early Years: 2000–2007	85
6.2	Recent Research Developments in the Field of Evolutionary Humanoid Robotics.	97
7	Performance Evaluation and Benchmarking of Humanoid Robots	111
7.1	Introduction	111
7.2	The DARPA Robotics Challenge	113
7.2.1	The DRC Trials	113
7.2.2	The DRC Finals	115
7.3	RoboCup.	116
7.3.1	RoboCup@Home/RoboCup@Work.	117
7.3.2	RoboCupRescue	118
7.4	FIRA HuroCup.	118
7.5	Summary and Conclusions.	119
8	Ethical, Philosophical and Moral Considerations	121
8.1	Introduction	121
8.2	Man Versus Machine	122
8.3	The Future Really Doesn’t Need Us?	123

8.4	Fear of the Machine?	123
8.5	Technology Taking Over?	124
8.6	A Way Forward?	125
9	Conclusions, and Looking to the Future.	129
9.1	Beyond Humanoids—Where to Next?	129
	References.	131

Evolutionary Humanoid Robotics
