

# Contents

- 1 Introduction . . . . . 1**
  - 1.1 Background and Significance of Topics . . . . . 1
  - 1.2 Advances in Climate Change Research . . . . . 10
    - 1.2.1 The Fact of Climate Change. . . . . 10
    - 1.2.2 The Mechanism of Climate Change. . . . . 17
    - 1.2.3 The Impact of Climate Change. . . . . 20
    - 1.2.4 The Current Characteristics of the Climate Change Research . . . . . 23
  - 1.3 The Main Contents . . . . . 25
  - References. . . . . 26
- 2 Data and Methods . . . . . 37**
  - 2.1 Data . . . . . 37
    - 2.1.1 The Observation Data . . . . . 37
    - 2.1.2 The Data on Glacier Change . . . . . 44
    - 2.1.3 The Reanalyzed Data . . . . . 46
  - 2.2 Methods . . . . . 47
    - 2.2.1 The Linear Trend . . . . . 47
    - 2.2.2 Moving Mean . . . . . 48
    - 2.2.3 The Calculation of Regional Trend . . . . . 48
    - 2.2.4 The Definition of Urban Station and Rural Station and the Basis of Classification. . . . . 49
    - 2.2.5 The Division of Sub-regions. . . . . 50
    - 2.2.6 The Changes of Atmospheric Circulation System in a Large Scale . . . . . 50
    - 2.2.7 The Definition and Calculation of Extreme Event Index . . . . . 52

2.2.8	The Calculation of Glacier Length and Material Balance . . . . .	55
2.2.9	The Calculation of Water Output in Snow and Ice at High Altitudes . . . . .	56
	References . . . . .	57
<b>3</b>	<b>Spatial and Temporal Variation of Temperature and Precipitation in Southwestern China . . . . .</b>	<b>61</b>
3.1	Temporal Variation of Temperature and Precipitation . . . . .	61
3.1.1	Mean Temperature and Precipitation . . . . .	61
3.1.2	The Annual Change of Temperature . . . . .	64
3.1.3	The Annual Precipitation Variation . . . . .	66
3.1.4	Inter-annual Variation of Temperature and Precipitation in Monsoon Period and Non Monsoon Period . . . . .	68
3.1.5	The Temperature and Precipitation Variation Reflected by Ice Cores and Tree Rings . . . . .	71
3.2	Spatial Variation of Temperature and Precipitation . . . . .	74
3.2.1	The Spatial Distribution of Temperature Variation . . . . .	74
3.2.2	The Spatial Distribution of Precipitation Variation . . . . .	75
3.2.3	The Spatial Distribution of Temperature and Precipitation Variation in Summer Monsoon Period and Winter Monsoon Period . . . . .	77
3.3	Driving Mechanism for Temperature and Precipitation . . . . .	79
3.3.1	The Relationship of Temperature and Precipitation Variation with Elevation . . . . .	79
3.3.2	The Correlation with Temperature Variation, Radiation, Sea Surface Temperature and Sunshine Hours . . . . .	84
3.3.3	The Correlation of Temperature and Precipitation Variation and Atmospheric Circulation . . . . .	87
3.3.4	The Comparison of Variation Magnitude of Temperature in Urban and Rural Stations . . . . .	94
3.4	Summary . . . . .	97
	References . . . . .	99
<b>4</b>	<b>Spatial and Temporal Variation of Climate Extremes in Southwestern China . . . . .</b>	<b>101</b>
4.1	Spatial and Temporal Variation of Climate Extremes . . . . .	101
4.1.1	Spatial and Temporal Variation of Indices of Temperature Extremes . . . . .	101
4.1.2	Spatial and Temporal Variations of Precipitation Extremes . . . . .	106

4.2	Comparison Among Climate Extremes Indexes . . . . .	111
4.2.1	The Consistency of Climate Extremes Indexes . . . . .	111
4.2.2	The Regional Difference of Climate Extremes Indexes . . . . .	115
4.2.3	The Comparison of Coldness and Warmth Indexes . . .	117
4.2.4	The Comparison of This Study and Other Sources . . .	119
4.3	Driving Mechanism for Climate Extremes . . . . .	119
4.3.1	The Correlation with Climate Extremes and Atmospheric Circulation . . . . .	119
4.3.2	The Correlation with Climate Extremes and Elevation . . . . .	125
4.3.3	The Comparison of Temperature Extremes Between Urban and Rural Station . . . . .	131
4.4	Summary . . . . .	133
	References . . . . .	134
<b>5</b>	<b>Spatial and Temporal Variation of Sunshine Hours in Southwestern China . . . . .</b>	<b>137</b>
5.1	Temporal Variation of Sunshine Hours . . . . .	137
5.1.1	Mean Sunshine Hours . . . . .	137
5.1.2	The Interannual Variation of Sunshine Hours . . . . .	139
5.2	Spatial Variation of Sunshine Hours . . . . .	144
5.2.1	Spatial Distribution of Variation Trends in Sunshine Hours During 1961–2008 . . . . .	144
5.2.2	Spatial Distribution of Variation Trends in Sunshine Hours Between 1961–1990 and 1991–2008 . . . . .	146
5.3	Driving Mechanism for Sunshine Hours . . . . .	150
5.3.1	Relationship Between Wind Speed and Sunshine Hours . . . . .	150
5.3.2	The Relationship Between Relative Humidity and Sunshine Hour . . . . .	153
5.3.3	The Comparison of Sunshine Hours Between Urban and Rural Stations . . . . .	155
5.3.4	Correlation with Sunshine Hour and Other Meteorological Factors . . . . .	161
5.3.5	Correlation with Sunshine Hour and Altitude . . . . .	163
5.4	Summary . . . . .	165
	References . . . . .	167

<b>6</b>	<b>Spatial and Temporal Variation of Wind Speed in Southwestern China . . . . .</b>	<b>169</b>
6.1	Temporal Variation of Wind Speed . . . . .	169
6.1.1	The Mean Wind Speed . . . . .	169
6.1.2	The Interannual Variation of Wind Speed . . . . .	171
6.2	Spatial Variation of Wind Speed . . . . .	174
6.2.1	The Spatial Distribution of the Wind Speed Variation Between 1969–2008 and 1969–2000 . . . . .	174
6.2.2	Spatial Distribution of Wind Speed Variation . . . . .	178
6.3	Driving Mechanism for Wind Speed . . . . .	180
6.3.1	Correlation with Wind Speed and Large-Scale Atmospheric Circulation . . . . .	180
6.3.2	Correlation with Wind Speed and Regional Warming . . . . .	186
6.3.3	Correlation with Wind Speed and Sunshine Hour . . . . .	190
6.3.4	Correlation with Wind Speed and Altitude . . . . .	191
6.3.5	Comparison of Wind Speed Between Urban and Rural Stations. . . . .	192
6.4	Summary . . . . .	194
	References. . . . .	196
<b>7</b>	<b>Glaciers Response to Climate Change in Southwestern China . . . . .</b>	<b>199</b>
7.1	Characteristics of Glaciers Change . . . . .	199
7.1.1	The Glacier Retreat and Shrinking Areas . . . . .	199
7.1.2	Severe Mass Loss of Glacier . . . . .	202
7.1.3	Expansion of Ice Lakes or Lakes Supplied by Ices . . . . .	203
7.1.4	The Significant Glacier Melt . . . . .	205
7.2	Shortening of Glaciers Length . . . . .	206
7.2.1	Characteristics of Stage in Glaciers Length . . . . .	206
7.2.2	The Spatial Difference of Glacier Retreat. . . . .	207
7.2.3	The Relationship of Glacier Length and Climate Change . . . . .	208
7.3	Negative Balance of Glacier Mass. . . . .	212
7.3.1	Balance of Glacier Mass in Hailuogou Glacier . . . . .	212
7.3.2	The Relationship Between Mass Balance Changes in Hailuogou Glacier and Climate Changes . . . . .	213
7.4	Increasing of Glacial Runoff . . . . .	215
7.4.1	Process of Runoff Changes in Yanggong River . . . . .	215
7.4.2	Process of Runoff Change in Hailuogou . . . . .	219
7.4.3	Possibale Effects of Increasing Discharge at High Altitude . . . . .	221

7.5	Fragmentation of Glacier Microtopography . . . . .	222
7.5.1	Surface Morphology Change of Baishui No. 1 . . . . .	222
7.5.2	Surface Morphology Change of Hailuoguo Glacier . . .	224
7.5.3	The Changes of Gongba Glacier . . . . .	225
7.5.4	The Response of Glacier Surface Morphology Changes to Climate Change . . . . .	226
7.6	Summary . . . . .	227
	References. . . . .	229
8	<b>The Main Conclusion and Prospect . . . . .</b>	<b>233</b>
8.1	Conclusions . . . . .	233
8.2	Prospect. . . . .	239
	References. . . . .	242

Study on Climate Change in Southwestern China

Li, Z.

2015, XXVII, 243 p. 84 illus., 37 illus. in color., Hardcover

ISBN: 978-3-662-44741-3
