

Contents

| | | |
|----------|--|-----------|
| 1 | Introduction | 1 |
| 1.1 | Advances in the Study of Ecological Geology | 2 |
| 1.2 | Climate Change Over the Past 2,000 Years | 3 |
| 1.3 | Biotransport and Biovectors | 5 |
| 1.4 | Seabird Population Reconstruction | 7 |
| 1.5 | Palaeo-Diet Reconstruction | 9 |
| 1.5.1 | Morphological Identification by Prey Remains | 9 |
| 1.5.2 | DNA Barcoding | 9 |
| 1.5.3 | Stable Isotope Analysis | 10 |
| 1.6 | The Study of Paleoceanography in the South China Sea | 11 |
| 1.7 | The Ecological Study of Coral Islands in the South China Sea | 12 |
| 1.7.1 | The Great Barrier Reef | 13 |
| 1.7.2 | History of Expeditions to the Xisha Islands | 14 |
| 1.7.3 | Modern Observations of Seabird Ecology on the Xisha Islands | 16 |
| | References | 16 |
| 2 | Research Contents and Methodology | 23 |
| 2.1 | Background and Research Significance | 23 |
| 2.1.1 | Background | 23 |
| 2.1.2 | Significance of the Present Work | 24 |
| 2.2 | Research Objectives | 25 |
| 2.3 | Research Contents | 26 |
| 2.4 | Methodology | 27 |
| | References | 28 |
| 3 | Study Area and Sample Collection | 29 |
| 3.1 | Introduction to the South China Sea | 29 |
| 3.1.1 | Geological Settings and Natural Resources | 29 |
| 3.1.2 | Prevailing Monsoons and Ocean Circulation | 31 |

| | | |
|----------|---|-----------|
| 3.2 | Introduction to the Xisha Islands | 32 |
| 3.2.1 | Geological Settings of the Xisha Islands | 32 |
| 3.2.2 | Flora and Fauna on the Xisha Islands | 34 |
| 3.3 | Sample Collection | 35 |
| 3.4 | Preliminary Treatment of Samples | 37 |
| 3.5 | Analytical Methods | 38 |
| | References | 39 |
| 4 | Chronology | 41 |
| 4.1 | Age Determination of Coral Sand Ornithogenic Sediments by High-Resolution ^{210}Pb - ^{137}Cs Dating | 41 |
| 4.1.1 | About ^{210}Pb Dating | 41 |
| 4.1.2 | Analytical Methods | 43 |
| 4.1.3 | Distribution and Accumulation of Radionuclides in the Xisha Islands | 43 |
| 4.1.4 | Potential Impacts of Anthropogenic Nuclear Test on the Xisha Islands | 47 |
| 4.1.5 | Influence of Seabird Activities on Radionuclide Distribution | 47 |
| 4.2 | Radiocarbon Dating and Established Chronology of the Studied Sediment Cores | 50 |
| 4.2.1 | About ^{14}C Dating | 50 |
| 4.2.2 | Radiocarbon Analysis of Bird Bone Samples from the Xisha Islands | 51 |
| 4.2.3 | Establishment of Chronology for the Studied Cores GQ, GJ3, JQ, CH and JY2 | 52 |
| | References | 54 |
| 5 | Geochemical Evidence for the Development of Coral Island Ecosystem on the Xisha Archipelago of the South China Sea | 57 |
| 5.1 | Source Materials of the Ornithogenic Sediments | 57 |
| 5.2 | Identification of Avian Bio-elements | 63 |
| 5.3 | Geochemical Characteristic of Elements Fe, Al, Ti, Mn and K | 66 |
| | References | 70 |
| 6 | Reconstruction of Seabird Population Record on the Xisha Islands | 73 |
| 6.1 | Reconstruction of Seabird Population on the Ganquan Island Over the Past 2,200 Years | 73 |
| 6.2 | Possible Causes for the Seabird Population Alterations on the Ganquan Island | 76 |
| 6.3 | Reflectance Spectroscopy: A New Approach to Reconstructing Seabird Population | 79 |
| 6.3.1 | Introduction to Reflectance Spectroscopy | 79 |
| 6.3.2 | Analytical Methods | 80 |

| | | |
|----------|---|------------|
| 6.3.3 | Seabird Population Reconstruction | 81 |
| 6.3.4 | Significance for the Development of Seabird Island Ecosystem | 85 |
| | References | 88 |
| 7 | Isotopic Evidence for Seabird Diet Changes Over the Past 2000 Years on the Xisha Islands | 91 |
| 7.1 | Introduction to Stable Isotope Ecology | 91 |
| 7.2 | Analytical Methods | 92 |
| 7.2.1 | Collagen Extraction | 92 |
| 7.2.2 | Stable Isotope Analysis | 93 |
| 7.3 | A 2000-Year Record of Seabird Diets on Ganquan Island. | 93 |
| 7.3.1 | Seabird Population Reconstruction | 93 |
| 7.3.2 | Stable Carbon ($\delta^{13}\text{C}$) and Nitrogen Isotope ($\delta^{15}\text{N}$) Compositions in Collagen Samples from Ganquan Island | 95 |
| 7.3.3 | Changes of Seabird Diets in Response to Seabird Population Dynamics | 97 |
| 7.4 | Brief Summary | 100 |
| | References | 100 |
| 8 | Evidence of Human Activities from the Ornithogenic Sediments of the Xisha Islands. | 103 |
| 8.1 | A 700-Year Record of Mercury in Avian Eggshells of Guangjin Island, South China Sea | 103 |
| 8.1.1 | Analytical Method | 103 |
| 8.1.2 | Levels of Hg in Eggshells from Guangjin Island of the Xisha Archipelago | 104 |
| 8.1.3 | Environmental Implications of Hg in the Eggshells. | 107 |
| 8.1.4 | Characteristics of Hg Record in the Eggshells Over the Past 700 Years | 108 |
| 8.2 | Historical Change of Mercury Pollution on the Remote Yongle Archipelago, South China Sea | 111 |
| 8.2.1 | Distributions of Hg Concentrations in the Ornithogenic Sediment Profiles and Its Depositional Fluxes. | 111 |
| 8.2.2 | Change of Prehistorical Hg Deposition Flux | 116 |
| 8.2.3 | Recent Change of Hg Deposition Flux. | 117 |
| 8.3 | A 400-Year Record of Black Carbon Flux in the Xisha Archipelago, South China Sea and Its Implication | 121 |
| 8.3.1 | Introduction to Black Carbon (BC) | 121 |
| 8.3.2 | Analytical Methods | 122 |
| 8.3.3 | Vertical Distributions of Black Carbon in the Three Sediment Profiles | 122 |

| | | |
|-----------|--|-----|
| 8.3.4 | BC Fluxes in the Xisha Archipelago Over the Past 400 Years. | 125 |
| 8.3.5 | Brief Summary. | 129 |
| | References. | 130 |
| 9 | A Preliminary Study of Ancient DNA in Guano Subfossils from the Xisha Islands | 137 |
| 9.1 | Climate Change and Evolution | 137 |
| 9.2 | Ancient DNA | 138 |
| 9.2.1 | Ecological Implications of Ancient DNA from a Variety of Biological Materials. | 138 |
| 9.2.2 | Technical Problems in Ancient DNA Study. | 139 |
| 9.3 | Isolation of DNA from Guano Samples of the Xisha Islands | 140 |
| 9.3.1 | DNA Barcoding | 140 |
| 9.3.2 | Isolation of DNA from Ancient Guano Samples | 140 |
| 9.3.3 | Polymerase Chain Reaction (PCR) | 143 |
| | References. | 145 |
| 10 | Conclusions | 149 |

Impact of Climate Change and Human Activity on the
Eco-environment

An Analysis of the Xisha Islands

Xu, L.

2015, XVI, 150 p. 53 illus., 14 illus. in color., Hardcover

ISBN: 978-3-662-45002-4
