

Contents

1	General Introduction to Upconversion Luminescence	
	Materials	1
1.1	Energy Transfer Mechanism of the Upconversion Materials . . .	4
1.2	The Category of the Upconversion Materials	6
1.2.1	Lanthanide-based Upconverters.	7
1.2.2	Transition Metal Upconverters	13
1.2.3	Mixed Rare Earth/Transition Metal Upconverters	14
1.2.4	Organic Upconverters	14
1.2.5	Lanthanide-doped Upconversion Nanomaterials	15
1.3	Summary	17
	References.	17
2	“Wet” Chemical Synthesis and Manipulation	
	of Upconversion Nanoparticles	21
2.1	Introduction	21
2.2	Mechanism for the Synthesis of Monodisperse Nanocrystals. . .	22
2.2.1	Nucleation	23
2.2.2	Synthetic Techniques for the Separation of Nucleation and Growth	26
2.2.3	Growth	27
2.3	Synthesis Routes for the Upconversion Nanoparticles	34
2.3.1	Thermolysis Strategy.	34
2.3.2	Hydro(Solvo)Thermal Strategy	39
2.3.3	Other Methods for the Synthesis of the Lanthanide-Doped Luminescent Nanoparticles	41
2.3.4	Ultrasmall Upconversion Nanoparticles with Bright Upconversion Luminescence	42
2.4	Synthesis Routes for the Fabrication of the Core@Shell Structured Upconversion Nanoparticles	44

2.4.1	One-Pot Heating-Up Method	44
2.4.2	Successive Layer-by-Layer Strategy for the Fabrication of Multi-shell-Structured Upconversion Nanoparticles	46
2.4.3	Ostwald Ripening Strategy for the Fabrication of Core@Shell Upconversion Nanoparticles	48
2.4.4	Cation Exchange Strategy for the Fabrication of Core@Shell Upconversion Nanoparticles	49
2.5	Characterizations.	49
2.5.1	Optical Characterization.	49
2.5.2	Chemical and Structural Characterization	55
2.6	Summary and Perspectives.	61
	References.	62
3	Upconversion Luminescence of Lanthanide Ion-Doped Nanocrystals.	73
3.1	Introduction	73
3.2	Upconversion Emission Color Tunability	74
3.2.1	Multi-color Emission Using Different Host-Dopant Combinations	74
3.2.2	Doping Concentration-Induced Multi-color Emission	77
3.2.3	Tuning Upconversion Emission Using FRET or LRET	79
3.2.4	Single-Band Upconversion Luminescence	80
3.2.5	Other Ways to Tune Upconversion Emission	81
3.3	Strategies for Enhancement of Upconversion Efficiency.	83
3.3.1	Selection of Novel Host Matrix	83
3.3.2	Plasmonic-Enhanced Upconversion Luminescence	88
3.3.3	Fabrication of Highly Efficient Lanthanide Upconversion Nanoparticles by Homogeneous Doping	91
3.3.4	Tuning the Excitation Wavelength	92
3.4	Core@Shell Structure-Based Luminescence Engineering of the Upconversion Nanocrystals.	93
3.4.1	Enhancing Upconversion Luminescence with Core@Shell Structure.	93
3.4.2	Tuning Upconversion Emission Using Core@Shell Structures.	98
3.4.3	Tuning of the Excitation Wavelength	98
3.5	Upconversion Nanocrystals Versus Quantum Dots and Dyes	101
3.6	Summary and Perspectives.	107
	References.	108

4	Upconversion Nanoparticle-Based Nanocomposites	121
4.1	Introduction	121
4.2	UCNP-mSiO ₂	122
4.2.1	Two-Step Sol-gel Method for the Fabrication of UCNP-mSiO ₂ Nanocomposites	125
4.2.2	One-Step Sol-gel Method for the Fabrication of UCNP-mSiO ₂ Nanocomposites	126
4.2.3	Yolk-Shell UCNP-mSiO ₂ Nanocomposites	127
4.3	UCNPs-MNPs	130
4.3.1	SiO ₂ -Assisted Synthesis of UCNP-MNPs Multi-functional Nanocomposites	132
4.3.2	Cross-Linker-Assisted Synthesis of UCNP-MNPs Multi-functional Nanocomposites	133
4.3.3	Seed-Mediated Growth Method for the Synthesis of UCNP-MNPs Multi-functional Nanocomposites	134
4.3.4	Applications of UCNP-MNPs Nanocomposites	135
4.4	UCNPs-Metals	137
4.5	UCNPs-Semiconductors	141
4.6	Summary and Perspectives	146
	References	147
5	Surface Modification and Bioconjugation of Upconversion Nanoparticles	159
5.1	Introduction	159
5.2	Ligand Engineering	162
5.2.1	Ligand Exchange	162
5.2.2	Oxidation of Oleic Acid	169
5.3	Ligand Attraction	171
5.4	Layer-by-Layer Assembly	174
5.5	Surface Modifications Using Silane Reagents	175
5.6	Surface Polymerization	177
5.7	Surface Control During Synthesis	178
5.8	Summary	180
	References	180
6	Upconversion Nanoparticles for Biomedical Imaging	187
6.1	Introduction	187
6.2	In Vitro and In Vivo Toxicity Assessment	190
6.2.1	Recent Progress on Toxicity Assessment of UCNP	191
6.2.2	Evaluation Methods for the Long-Term Toxicity of UCNP in Small Animals	192
6.3	Biomedical Imaging Using UCNP Under 980-nm Excitation	193

6.4	Biomedical Imaging Using UCNPs Excited at Different Wavelength	197
6.5	Ultrasmall UCNPs for Biomedical Imaging	198
6.6	Optical Tomography	200
6.7	Multimodal Imaging Using UCNPs	202
6.7.1	Upconversion PL and Magnetic Resonance Imaging (MRI)	202
6.7.2	Upconversion PL and X-Ray Computed Tomography (CT)	207
6.7.3	Upconversion PL and Positron Emission Tomography (PET)	209
6.7.4	Upconversion PL and Single-Photon Emission Computed Tomography (SPECT)	210
6.7.5	Upconversion PL and Multimodal Imaging (MRI/PET/SPECT/CT)	212
6.8	Upconversion Imaging Techniques	212
6.8.1	Imaging System	212
6.8.2	Penetration Depth Measurement	218
6.9	Conclusion and Future Opportunity for Upconversion-Based Biomedical Imaging	224
	References	226
7	The Applications of Upconversion Nanoparticles in Bioassay	233
7.1	Introduction	233
7.2	Heterogeneous Assay	234
7.3	Homogeneous Assay	238
7.4	UCNPs for Encoding and Multiplexed Detection	241
7.4.1	Tuning UCNPs' Material Composition for Encoding and Multiplexed Detection	244
7.4.2	Tuning UCNPs' Optical Surface Layer for Encoding and Multiplexed Detection	247
7.4.3	Tuning UCNPs' Luminescence Lifetimes for Encoding and Multiplexed Detection	247
	References	248
8	Upconversion Nanoparticles for Biosensing	255
8.1	Introduction	255
8.2	The Construction of UCNPs-Based FRET or LRET Nanosensors with Different Energy Acceptors	258
8.2.1	Organic Dyes as Energy Acceptors	258
8.2.2	Noble Metal Nanoparticles as Energy Acceptors	262
8.2.3	Carbon Nanomaterials as Energy Acceptors	264
8.2.4	MnO ₂ Nanosheets as Energy Acceptors	267

8.3	Biosensing of Different Species of Analytes	268
8.3.1	Biosensing of Ions	269
8.3.2	Biosensing of Gas Molecules	271
8.3.3	Biosensing of Biomolecules	272
8.4	Detection Based on Magnetic Separation	274
8.5	Detection Based on Quenching Effect of Heavy Metal Ions	276
	References.	278
9	Upconversion Nanoparticles for Light-Activated Therapy	285
9.1	Introduction	285
9.2	UCNPs for Photodynamic Therapy	286
9.2.1	History and Mechanism of Photodynamic Therapy	286
9.2.2	Photosensitizers	289
9.2.3	UCNP-Based Photodynamic Therapy	291
9.3	UCNPs for Chemotherapy and Gene Therapy.	314
9.3.1	NIR Light-Triggered Photoisomerization	315
9.3.2	NIR Light-Triggered Photolysis	319
9.3.3	NIR Light-Triggered Photoreduction	328
9.4	UCNPs for Photothermal Therapy.	329
9.5	Conclusion and Perspectives.	330
	References.	331
10	Upconversion Nanoparticles for Thermal Sensing.	343
10.1	Introduction	343
10.2	Rare Earth-Doped Upconversion Nanothermometry.	348
10.2.1	Intensity Upconversion Nanothermometry	348
10.2.2	Band-Shaped Upconversion Nanothermometry-FIR Theory	351
10.2.3	Lifetime Upconversion Nanothermometry	359
10.2.4	Bandwidth Nanothermometry and Spectral Position Nanothermometry.	359
10.3	UCNP-Based Nanocomposite Materials for Nanothermotry	362
10.4	Upconversion Nanoparticles Versus Quantum Dots Versus Gold Nanoparticles Versus Green Fluorescent Protein as Nanothermometry	366
10.4.1	Quantum Dots (QDs)	366
10.4.2	Gold Nanoparticles (GNPs)	368
10.4.3	Green Fluorescent Protein (GFP)	368
10.4.4	Comparison Between UCNPs, GNPs, QDs, and GFP-Based Nanothermometers	369
10.5	Summary and Outlook.	370
	References.	371

11 Upconversion Nanoparticles for Other Applications	375
11.1 Introduction	375
11.2 UCNPs for Photovoltaic Cells	376
11.2.1 Solar Cell Operation Principle and Their Obstacles . . .	377
11.2.2 Recent Solutions to the Above Obstacles	379
11.2.3 Recent Progress in Upconversion-Assisted Solar Cell	381
11.2.4 Conclusion and Future Opportunity for Upconversion-Assisted Solar Cell	383
11.3 UCNPs for Photocatalysis	386
11.3.1 Photocatalysis Mechanism	386
11.3.2 Obstacles and Recent Solutions for Photocatalysis. . . .	388
11.3.3 Recent Progress in Upconversion-Assisted Photocatalysis.	390
11.3.4 Conclusion and Future Opportunity for Upconversion-Assisted Photocatalysis.	394
11.4 UCNPs for Security Application	396
11.5 UCNPs for Optical Storage, Remote-Control Photoswitching and Other Applications	403
References.	404
12 Conclusions and Perspectives	409
Index	413

Photon Upconversion Nanomaterials
