

Contents

1	Introduction	1
1.1	Smart Grid	1
1.2	Internet Data Centers	4
1.3	Energy Management of Internet Data Centers in Smart Grid and Challenges	5
1.4	Related Works	7
1.4.1	Existing Works	7
1.4.2	Observations	8
1.5	Contents and Organizations	9
	References	10
2	Energy Cost Minimization for Internet Data Centers	
	Considering Power Outages	13
2.1	Introduction	13
2.2	System Model	15
2.2.1	Models Related to Front-End Servers and Internet Data Centers	16
2.2.2	Models Related to Smart Microgrids	18
2.2.3	Models Related to Main Grids	20
2.2.4	Energy Cost Model	21
2.2.5	Some Discussions About Models	21
2.3	Problem Formulation and Algorithm Design	22
2.3.1	Relaxed Problem	22
2.3.2	Proposed Operation Algorithm	24
2.3.3	Solution	26
2.4	Analysis and Simulations	28
2.4.1	Analysis	28
2.4.2	Simulations	31
2.5	Summary	35
	References	35

3	Carbon-Aware Energy Cost Minimization for Internet Data Centers	
	Data Centers	37
3.1	Introduction	37
3.2	System Model	38
3.2.1	Models Related to Front-End Servers and Internet Data Centers	39
3.2.2	Models Related to Smart Microgrids	41
3.3	Problem Formulation and Algorithm Design	44
3.3.1	Relaxed Problem	45
3.3.2	Proposed Operation Algorithm	47
3.4	Analysis and Simulations	49
3.4.1	Analysis	49
3.4.2	Simulations	52
3.5	Summary	55
	References	55
4	Joint Workload and Battery Scheduling for Data Center Energy Cost Minimization	59
4.1	Introduction	59
4.2	System Model	61
4.2.1	Internet Data Center Capacity	61
4.2.2	Workload Model	61
4.2.3	Battery Model	62
4.2.4	Energy Cost Model	63
4.3	Problem Formulation and Algorithm Design	64
4.3.1	Relaxed Problem	65
4.3.2	Proposed Operation Algorithm	66
4.4	Analysis and Simulations	70
4.4.1	Analysis	70
4.4.2	Simulations	72
4.5	Summary	77
	References	77
5	Risk-Constrained Operation for Internet Data Centers in Deregulated Electricity Markets	79
5.1	Introduction	79
5.2	Proposed Decision Framework	82
5.2.1	Electricity Forward Markets	82
5.2.2	Risk-Constrained Decision Framework	82
5.2.3	Uncertainty Characterization	83
5.3	System Model	84
5.3.1	Models Related to Front-End Servers and Internet Data Centers	85
5.3.2	Model Related to Electricity Forward Contracts	86

5.3.3	Expected Energy Cost	87
5.3.4	Operation Risk	87
5.4	Problem Formulation and Algorithm Design.	88
5.4.1	The First-Stage Problem	88
5.4.2	The Second-Stage Problem	89
5.4.3	Deterministic Equivalent Programming Problem	89
5.4.4	Algorithm Design	90
5.5	Simulations	93
5.5.1	Simulation Settings	94
5.5.2	Simulation Results	95
5.6	Summary	97
	References.	97
6	Conclusions	101

Energy Management of Internet Data Centers in Smart
Grid

Jiang, T.; Yu, L.; Cao, Y.

2015, XIV, 102 p. 23 illus., Hardcover

ISBN: 978-3-662-45675-0
