1	Introduction	1
1.1	The State of Research in Vehicle Dynamics	1
1.2	The State of Research in Road Dynamics	5
1.3	The State of Research in Tire Dynamics	11
1.4	The Research Scheme of Vehicle-Road Coupled System Dynamics	13
1.5	Outline and the Main Issues of Vehicle-Road Coupled System Dynamics	14
	References	15
2	Dynamic Analysis of a Heavy Vehicle Using Lumped Parameter Model	23
2.1	Experimental Modeling for the Nonlinear Components in Vehicle Suspension	23
2.1.1	Experimental Damping Characteristics of the Shock Absorber	24
2.1.2	Experimental Stiffness Characteristics of the Leaf Springs	33
2.2	Dynamic Analysis of a Two-Axle Heavy Vehicle	37
2.2.1	Vehicle Model and Differential Equations of Motion	37
2.2.2	Calculation of the Vehicle Response	41
2.2.3	Analysis of Vehicle-Vibration Response Under Random Excitation	44
2.2.4	Numerical Results and Discussions	46
2.3	Dynamic Analysis of a Three-Axle Heavy Vehicle	51
2.3.1	Modeling for a Three-Axle Vehicle with a Balanced Suspension	51
2.3.2	Modeling for a Vehicle-Tire-Road Coupling System	55
2.3.3	Numerical Results and Discussions	61
2.4	Chapter Summary	67
	References	68

3	Dynamic Analysis of a Heavy Vehicle Using Function Virtual Prototype	69
3.1	Modeling of Vehicle Suspension, Tire, and Road	69
3.2	Orthogonal Optimization of a Heavy Vehicle	77
3.3	Semiactive Control of a Heavy Vehicle	89
3.4	Chapter Summary	93
	References	94
4	Dynamic Analysis of a Pavement Structure Under a Vehicle's Moving Load	95
4.1	The Dynamic Response of a Vehicle–Pavement System Based on a Finite Beam on a Nonlinear Foundation	95
4.1.1	Equation of Motion [16]	97
4.1.2	Galerkin's Discretization	98
4.1.3	Numerical Results	101
4.2	The Dynamic Response of a Finite Timoshenko Beam on a Nonlinear Viscoelastic Foundation to a Moving Load [18]	105
4.2.1	Equation of Motion	105
4.2.2	Normal Modes	107
4.2.3	Galerkin's Discretization	109
4.2.4	Numerical Results	111
4.3	Vibration of a Vehicle–Pavement Coupled System Based on a Finite Timoshenko Beam on a Nonlinear Foundation [21]	118
4.3.1	The Mathematical Model	118
4.3.2	The Schemes of Solution	121
4.3.3	Numerical Case Studies	123
4.4	The Dynamic Response of an Infinite Timoshenko Beam on a Nonlinear Viscoelastic Foundation [19, 25]	133
4.4.1	The Mathematical Model	134
4.4.2	The Perturbation Method	135
4.4.3	The Modified ADM	139
4.4.4	The Moving Force	146
4.4.5	Parametric Studies	153
4.5	Chapter Summary	157
	References	157
5	Road Dynamic Responses Under Moving Vehicle Loads Based on Double-Layer Plate Model	161
5.1	Description of the Moving Vehicle Loads	161
5.1.1	Mathematical Model of the Moving Vehicle Loads	161
5.1.2	Calculation of the Tire Contact Area	163
5.2	Dynamic Responses of an Infinite Double-Layer Plate on a Kelvin Foundation	164
5.2.1	Governing Equations of the Infinite Double-Layer Plate	164
5.2.2	The Displacement and the Stress of the Double-Layer Plate Under Moving Vehicle Loads Supported by a Kelvin Foundation	167

5.3	Numerical Simulations of an Infinite Double-Layer Plate on a Kelvin Foundation	172
5.3.1	Result Verification	172
5.3.2	The Dynamic Response of the Double-Layer Plate	173
5.4	Dynamic Responses of an Infinite Double-Layer Plate on an Elastic Half Space Foundation	176
5.4.1	Governing Equations of the Infinite Double-Layer Plate	176
5.4.2	Governing Equations of the Elastic Half-Space Foundation	179
5.4.3	The Solutions of a Half-Space Foundation in a Number-Frequency Domain	180
5.4.4	Displacement Green's Functions of the Elastic Half-Space Foundation	183
5.4.5	The Displacement and Stress of the Double-Layer Plate Under Moving Vehicle Loads Supported by Elastic Half-Space	185
5.5	Numerical Simulations of an Infinite Double-Layer Plate on an Elastic Half Space Foundation	188
5.5.1	Result Verification	189
5.5.2	The Dynamic Response of the Double-Layer Plate	190
5.6	Chapter Summary	192
	References	192
6	Road Dynamic Responses Under Moving Vehicle Loads Based on Three-Dimensional Finite Element Model	195
6.1	Three-Dimensional Finite Element Model of Road System	195
6.1.1	Road Model of a Layered Plate and Its Basic Assumptions	195
6.1.2	Three Dimensional Finite Element Model of the Road System	196
6.1.3	A Transient Dynamic Analysis of Road System Vibration	197
6.2	Dynamic Responses of Road System to the Moving Vehicle Loads	201
6.2.1	Vertical Displacement Analysis of Road System	201
6.2.2	Stress Analysis of Road System	202
6.2.3	Stain Analysis of Road System	206
6.3	Analysis of Asphalt Pavement Fatigue Life Under Moving Vehicle Loads	208
6.3.1	Prediction Model of Asphalt Pavement Fatigue Life	208
6.3.2	Parameter Influence Analysis of Asphalt Pavement Fatigue Life	209
6.4	Chapter Summary	213
	References	213

7 Modeling and Dynamic Analysis of Vehicle–Road	
Coupled Systems	215
7.1 Modeling of A Two-Dimensional Vehicle–Road	
Coupled System	215
7.1.1 Model of Tire–Road Contact	215
7.1.2 Equations of a Two-Dimensional Vehicle–Road	
Coupled System	217
7.1.3 Interaction of Tire and Road	219
7.1.4 Calculation Program and Model Verification	220
7.2 Effects of the Two Tire Models on the Responses of the	
Vehicle–Road Coupled System	223
7.3 Modeling of a Three-Dimensional Vehicle–Road	
Coupled System	232
7.3.1 Equations of Motion for the Vehicle	232
7.3.2 Equations of Motion for the Road	235
7.3.3 Interaction Between the Vehicle and the Road	236
7.4 Response Comparison of the Coupled System with the Tra-	
ditional Separated System	240
7.5 Chapter Summary	245
References	249
8 Parameter Design of Vehicle–Road System	
with Low Dynamic Interaction	251
8.1 Verification of the New Theory of Vehicle–Road	
Coupled System	251
8.2 Evaluation Criteria of Low Dynamic Interaction	253
8.3 Effects of Vehicle System Parameters	254
8.3.1 The Effect of Vehicle Speed	254
8.3.2 The Effect of Vehicle Load	254
8.3.3 The Effect of Wheel Mass	256
8.3.4 The Effects of Tire Stiffness	257
8.3.5 The Effects of Suspension Stiffness	258
8.3.6 The Effects of Tire Damping	259
8.3.7 The Effects of Suspension Damping	260
8.3.8 The Effect of Wheelbase	261
8.3.9 The Effect of Wheel Tread	264
8.4 Effects of Road System Parameters	265
8.4.1 The Effects of Pavement Density	265
8.4.2 The Effects of Pavement Height	266
8.4.3 The Effects of Elastic Modulus	267
8.4.4 The Effects of the Pavement Poisson Ratio	270
8.4.5 The Effect of the Foundation Response Modulus	270
8.4.6 The Effect of the Foundation Damping coefficient	272
8.5 Chapter Summary	273
References	273

9 Modeling and Interaction of a Vehicle–Road System with Nonlinearity and Viscoelasticity	275
9.1 System Models and Equations of Motion	275
9.1.1 Modeling Nonlinearity and Viscoelasticity	275
9.1.2 The Equations of Motion for a Nonlinear Vehicle	278
9.1.3 The Equations of Motion for the Nonlinear and Viscoelastic Pavement	279
9.1.4 The Interaction Between the Vehicle and the Pavement	285
9.2 Dynamic Responses of the Nonlinear Vehicle–Road Coupled System	287
9.3 The Effects of Nonlinearity and Viscoelasticity on Vehicle and Road Responses	293
9.4 Chapter Summary	300
References	300
10 The Construction of a Highway Fieldtest Section for Vehicle–Road Interaction	303
10.1 The Experiment Scheme of the Vehicle–Road System	303
10.2 The Highway Field Test System	304
10.2.1 Introduction of the Highway Road Structure	304
10.2.2 The Testing System of the Road	304
10.2.3 The Laying Process of the Sensor	306
10.3 Vehicle Test System	309
10.3.1 Introduction of the Vehicle System	309
10.3.2 Introduction of Vehicle Test System	309
10.4 Analysis of the Road Test Results	311
10.4.1 Analysis of Road Dynamic Strain Response	311
10.4.2 Analysis of Road Vertical Dynamic Stress	315
10.5 Analysis of the Vehicle Test Results	318
10.6 Chapter Summary	323
References	324
Index	325

Dynamics of Vehicle-Road Coupled System

Yang, S.; Chen, L.; Li, S.

2015, XV, 327 p. 255 illus., 36 illus. in color., Hardcover
