

Contents

1	Swimming and Flying in Vertebrates	1
1.1	Some Associated Physics	2
1.1.1	Forces Acting on Materials	2
1.1.2	I-Beams (or H Beams)	7
1.1.3	Thin-Walled Cylinders	9
1.2	Newton's Three Laws of Motion	11
1.3	Fluid Mechanics	13
1.3.1	Dimensionless Theorems	14
1.3.2	Dynamic Similarity	18
1.3.3	Fluid Responses	19
1.4	Flight and Fluid Mechanics	25
1.4.1	The Aerofoil	27
1.4.2	The Bound Vortex	27
1.4.3	Drag	29
1.4.4	Angle of Attack	32
1.4.5	Wing Planform	33
1.5	Points of Debate	38
1.5.1	Bernoulli or Newton's Laws for Lift?	38
1.5.2	Flying Upside-Down	39
1.5.3	Turbulence and Supercomputers	40
1.6	Aquatic Locomotion	43
1.6.1	Axial Undulatory Swimming (<i>Anguilla</i>)	45
1.6.2	Axial Subundulatory to Axial Suboscillatory Swimming (Most Fishes)	47
1.6.3	Oscillatory Swimming (Thunniform)	50
1.7	Energy Saving Devices in Vertebrate Swimming	55
1.7.1	Reverse Von Karman Vortex Street	55
1.7.2	Diamond-Shaped Shoals	56
1.7.3	Porpoising	56
	References	58

2	Vertebrate Swimming	61
2.1	The Deeper Dermis of Marine Vertebrates.	65
2.1.1	Non-thunniform Sharks	65
2.1.2	Thunniform Swimmers	70
2.1.3	Anguilliform Swimmers.	99

3.1	Gliding: Economy Class Air Travel	105
3.1.1	Exploiting the Laws of Physics	106
3.1.2	Evolution of Flapping Flight: Is a Transition from Gliding Flight Possible?	127
	References	130
4	Flight by Membrane	131
4.1	The First True Fliers, Pterosaurs	131
4.1.1	The Pterosaur Wing	133
4.1.2	Huge Body Size and Flight in Pterosaurs.	142
4.1.3	Pterosaur Feeding Behavior	147
4.2	Bats, the Only Mammalian True Fliers	149
4.2.1	Wing Structure and Mechanics	150
	References	159
5	Birds	163
5.1	<i>Archaeopteryx</i> , the First Bird or Urvogel.	163
5.1.1	Ground-Up or Trees-Down Origin of Flight?	166
5.2	Feather Evolution	178
5.3	The Unique Flight Apparatus of Birds	182
5.3.1	Wing Structure	182
5.3.2	Flight Muscles	182
5.3.3	Flight Feathers	185
5.4	Flight Control Center	187
5.4.1	Bird Brains	189
5.5	The Phenomenon of Flapping Flight in Birds	192
5.5.1	Some Early Observations on Bird Flight	192
5.5.2	Understanding Flapping Flight.	193
5.5.3	Departures and Arrivals	199
5.6	The Power of Flight	199
5.6.1	The Power Curve	203
5.6.2	Wake Vortices	205
5.7	Behavior and Flight in Birds: Horses for Courses	208
5.7.1	Wingbeat Kinematics in Slow-Flying	208
5.7.2	Going Nowhere Fast—Hovering	209
5.7.3	Silent Flight	218

5.8	Offsetting the Costs of Bird Flight	221
5.8.1	Bounding Flight	221
5.8.2	Soaring	221
5.8.3	Flying in Formation	237
5.9	How β -Keratin Crucially Influenced Bird Evolution	239
5.9.1	Feather Structure at Angstrom and Molecular Levels	239
5.9.2	Feather Microstructure—Fibers and Foam	241
5.9.3	Feather Biomechanics at the Microstructural Level.	247

The Vertebrate Integument Volume 2

Structure, Design and Function

Lingham-Soliar, T.

2015, XIII, 348 p. 208 illus., 42 illus. in color., Hardcover

ISBN: 978-3-662-46004-7
