4	Communication Risk in Clinician–Patient Consultations	79
4.1	Introduction	79
4.2	Link Between Communication and Health Outcomes	80

4.3	Potential Risk Points in the Consultation	81
4.3.1	Potential Risk Point: Failure to Track the Patient's Narrative and Listen to the Patient's Cues	82
4.3.2	Potential Risk Point: Patient Involvement—Not Listening to the Patient	85
4.3.3	Potential Risk Point: Patient Involvement—Not Informing the Patient	87
4.3.4	Potential Risk Point: Delivery of Diagnosis	87
4.3.5	Communication Breakdowns in Transitions of Care	88
4.4	Systemic Order of Risk	91
4.5	Communication as a Risk Factor in Patient Safety	94
4.6	Conclusion	94
	References	95
5	Effective Clinician–Patient Communication: Strategies for Communicating Medical Knowledge	97
5.1	Introduction	97
5.2	Bridging the Information Gap: Effective Strategies for Developing Shared Medical Knowledge and Decision-Making	98
5.2.1	Make Space for the Patient's Story	98
5.2.2	Recognise the Patient's Knowledge and Opinions About Their Condition	107
5.2.3	Explain Medical Concepts in Common-sense Language	110
5.2.4	Spell Out Explicitly Management/Treatment Rationales	111
5.2.5	Provide Clear Instructions for Medication and Other Follow-Up Treatment	115
5.2.6	Signpost the Hospital Process	117
5.2.7	Negotiate Shared Decision-Making About Treatment	119
5.2.8	Repeat, Check and Clarify Throughout	122
5.3	Conclusion	123
	References	124
6	Effective Clinician–Patient Communication: Strategies for Bridging the Interpersonal Gap	125
6.1	Introduction	125
6.2	Bridging the Interpersonal Gap—Effective Strategies for Developing Rapport and Empathy with Patients	129
6.2.1	Introduce Yourself as Clinicians and Explain your Roles	129
6.2.2	Use Inclusive Language	132
6.2.3	Use Colloquial Language and Softening Expressions	134
6.2.4	Give Positive and Supportive Feedback	136
6.2.5	Recognise the Patient's Perspective	140
6.2.6	Intersperse Medical Talk with Interpersonal Chat	141

6.2.7	Share Laughter and Jokes	142
6.2.8	Demonstrate Intercultural Sensitivity	143
6.3	Conclusion	143
	References	145
7	Action Strategies for Implementing Change	147
7.1	Introduction	147
7.2	Action Strategies	148
7.2.1	Achieve a Balance Between Medical and Interpersonal Communication	148
7.2.2	Provide Explicit Explanations to Patients About Processes and Procedures in the Emergency Department	148
7.2.3	Develop Effective Interdisciplinary Teamwork	150
