1	Telemedicine and Knowledge Representation for Traditional Chinese Medicine	1
1.1	Traditional Chinese Medicine and a Consensus Certified Knowledge Base	1
1.2	Traditional Chinese Medicine and Telemedicine	2
1.2.1	What is Telemedicine?	2
1.2.2	Knowledge Consultation	4
1.2.3	Curative Aspects	4
1.2.4	Training by E-Learning	4
1.2.5	Management and Control	5
1.2.6	Efficient and Reliable Information Communication Technology (ICT) Support	5
1.2.7	Explicit Semantics	5
1.3	Automatic System Generation and Evolution of the TCM Knowledge	7
1.4	Major Aspects of the Ontology Base TCM Telemedicine System	7
1.4.1	Ontology Modelling	8
1.4.2	Ontology Implementation Tool	8
1.4.3	Internet Capability	9
1.4.4	Architecture and Cross-layer Logical Transitivity	9
1.4.5	Automatic System Generation	10
1.4.6	Pervasive Support	10
1.4.7	Ontology Evolution Approach	11
1.5	Overview of the Ontology-Based Automatic System Generation (ASG/C)	12
1.6	Recapitulation	16
	References	16

2	The TCM Ambit.	19
2.1	The Evolution of Traditional Chinese Medicine	19
2.2	Underlying Theory	20
2.3	TCM Diagnosis and Treatment	22
2.4	Herbal Pharmacology	24
2.5	Computer-Aided TCM Takes Various Forms	25
2.6	Contemporary TCM Telemedicine	27
	References.	28
3	Semantics and Ontology	29
3.1	Introduction	29
3.2	Ontology	30
3.2.1	What is an Ontology	30
3.2.2	Generic Ontologies and Specific Ontologies	31
3.3	The Ontology Argument	32
3.4	Ontology Modelling Notation	35
3.5	Purposes for Which Ontologies are Being Used	39
3.5.1	Strong and Unambiguous Communication Mechanism	40
3.5.2	Ontology Mediated Information Access	41
3.5.3	Ontology and Semantic Web Services	42
3.5.4	Ontology Based Multi Agent Systems	46
3.6	Ontology Modelling and Representation	46
3.7	Differentiating Conceptual Modelling for Data Modelling, Knowledge Modelling and Ontology Modelling and a Notation for Ontology Modelling	48
3.8	W3C—The Strong Metadata Modeling Promoter	52
3.9	The Web is an Information Treasure Trove	53
3.10	Some Insight into RDF and OWL	54
3.11	Transformation of Markup Languages	61
3.12	OWL Language	63
3.13	Recapitulation	64
	Appendix 1	65
	Appendix 2	69
	References.	74
4	Ontology for Traditional Chinese Medicine (TCM)	77
4.1	Introduction	77
4.2	Usefulness of Ontology in TCM	77
4.3	Semantic Aliasing	79
4.4	Choice of Modeling Tools	83
4.5	The Realm of Metadata Modeling	89

4.6	Enterprise TCM Ontology Core	90
4.7	Cross-Layer Onto-Core Semantic Transitivity (COST).	93
4.8	COST Check Anytime and Anywhere	95
4.9	Recapitulation	97
	References.	97
5	Ontology Driven System Generation and Remote Installation	99
5.1	Introduction	99
5.2	The Mobile-Clinic Experience Unveils the Importance of Ontological Adherence	99
5.3	Provision of Standard Diagnosis and Prescription	102
5.4	Error-Free System Customization by the Meta-Interface (MI) Concept	105
5.5	Automatic Remote Web-Based Installation.	109
5.6	Recapitulation	113
	References.	116
6	Ontology Evolution and the Living TCM Ontology	117
6.1	Introduction	117
6.2	“Living/Live” Onto-core to Support On-line Evolution	118
6.3	Knowledge and Experience Absorption	120
6.4	Enablement of Easy Knowledge Reabsorption and Evolution.	123
6.4.1	“Living Ontology” Aids Knowledge Absorption and Evolution.	123
6.5	Coherent Consensus-Certified Knowledge Engineering	126
6.6	Recapitulation	128
	References.	128
7	TCM Telemedicine Infrastructure	129
7.1	Introduction	129
7.2	Performance Modelling of the Pervasive TCM Telemedicine Infrastructure on the Mobile Internet	129
7.3	Realization Example	133
7.4	Recapitulation	136
	References.	136
8	Recapitulation and Future Directions.	137
8.1	Introduction	137
8.2	Recapitulation	137
8.3	Future Work	139
8.3.1	Collaborative Multi Agent Recommender Systems . . .	139
8.3.2	Integrative Medicine	140

8.3.3	Cloud Computing for TCM Telemedicine	141
8.3.4	Cyber Physical Systems and the Internet of Things for TCM Telemedicine	143
8.4	Conclusion.	151
	References.	151

Semantically Based Clinical TCM Telemedicine Systems

Wong, A.K.Y.; Wong, J.H.K.; Lin, W.W.K.; Dillon, T.S.;

Chang, E.J.

2015, XVI, 152 p. 79 illus., Hardcover

ISBN: 978-3-662-46023-8
